ONE OF THE NEW YORK TIMES BOOK REVIEW'S 10 BEST BOOKS
OF THE YEAR A major book about the future of the world,
blending intellectual and natural history and field reporting into a
powerful account of the mass extinction unfolding before our
eyes Over the last half a billion years, there have been five mass
extinctions, when the diversity of life on earth suddenly and
dramatically contracted. Scientists around the world are currently
monitoring the sixth extinction, predicted to be the most
devastating extinction event since the asteroid impact that wiped
out the dinosaurs. This time around, the cataclysm is us. In *The
Sixth Extinction*, two-time winner of the National Magazine Award
and New Yorker writer Elizabeth Kolbert draws on the work of

scores of researchers in half a dozen disciplines, accompanying
many of them into the field: geologists who study deep ocean
cores, botanists who follow the tree line as it climbs up the
Andes, marine biologists who dive off the Great Barrier Reef. She
introduces us to a dozen species, some already gone, others
facing extinction, including the Panamian golden frog, staghorn
coral, the great auk, and the Sumatran rhino. Through these
stories, Kolbert provides a moving account of the disappearances
occurring all around us and traces the evolution of extinction as
concept, from its first articulation by Georges Cuvier in
revolutionary Paris up through the present day. The sixth
extinction is likely to be mankind's most lasting legacy; as Kolbert
observes, it compels us to rethink the fundamental question of
what it means to be human.

World Trade Statistical Review 2019 Infobase Publishing

The universal practice of selecting and excerpting, summarizing
and canonizing, arranging and organizing texts and visual signs,

either in carefully dedicated types of manuscripts or not, is common to all manuscript cultures. Determined by intellectual or practical needs, this process is never neutral in itself. The resulting proximity and juxtaposition of previously distant contents, challenge previous knowledge and trigger further developments. With a vast selection of highly representative case studies – from India, Islamic Asia and Spain to Ethiopian cultures, from Ancient Christian to Coptic, and Medieval European domains – this volume deals with manuscripts planned or growing and resulting in time to comprise ‘more than one’. Whatever their contents – the natural world and related recipes, astronomical tables or personal notes, documentary, religious and even highly revered holy texts – codicological and textual features of these manuscripts reveal how similar needs received different answers in varying contexts and times.

Advanced Geography World Health Organization

This book deals with the physical aspects of Geography with illustrative and informative diagrams. It also highlights the relationship between the physical environment and man. The special feature of this book are its diagrams.

New Perspectives National Academies Press

After the break-up of the Soviet Union in 1991, the countries that emerged from it faced myriad challenges, including the need to reorganize the organization, financing and provision of health services. Over two decades later, this book analyzes the progress that twelve of these countries (Armenia, Azerbaijan, Belarus,

Georgia, Kazakhstan, Kyrgyzstan, the Republic of Moldova, the Russian Federation, Tajikistan, Turkmenistan, Ukraine and Uzbekistan) have made in reforming their health systems. Building on the health system reviews of the European Observatory on Health Systems and Policies (the HiT series), it illustrates the benefits of international comparisons of health systems, describing the often markedly different paths taken and evaluating the consequences of these choices. This book will be an important resource for those with an interest in health systems and policies in the post-Soviet countries, but also for those interested in health systems in general. It will be of particular use to governments in central and eastern Europe and the former Soviet countries (and those advising them), to international and non-governmental organizations active in the region, and to researchers of health systems and policies.

Trends in Health Systems in the Former Soviet Countries

Walter de Gruyter GmbH & Co KG

This book offers a comprehensive global examination of the relationship between public transport and tourism as well as exploring other sustainable transport modes. It offers a unique view by analysing tourism through the public transport lens and vice versa. The volume provides an account of how the public transport experience can be improved for tourists so that its value can be maximised and a greater number of people can be encouraged to shift modes. It features a wide range of case studies and examples showing how the tourism industry, as well as regional economies, communities and the environment, benefit when public transport is widely used by tourists. The book will be of interest to researchers and students in the fields of

tourism and transport as well as destination marketing organisations and tourism, transport and urban planners.

Advances in Seismic Event Location Springer Science & Business Media

This book demonstrates how the theories and insights of anthropology have positively influenced the conduct of global business and commerce, providing a foundation for understanding the impact of culture on global business, and global business on culture.

Dunhuang Manuscript Culture Springer Science & Business Media

Across the globe, Google, Amazon, Facebook, Apple and Microsoft have accumulated power in ways that existing regulatory and intellectual frameworks struggle to comprehend. A consensus is emerging that the power of these new digital monopolies is unprecedented, and that it has important implications for journalism, politics, and society. It is increasingly clear that democratic societies require new legal and conceptual tools if they are to adequately understand, and if necessary check the economic might of these companies. Equally, that we need to better comprehend the ability of such firms to control personal data and to shape the flow of news, information, and public opinion. In this volume, Martin Moore and Damian Tambini draw together the world's leading researchers to examine the digital dominance of technologies platforms and look at the evidence behind the rising tide of criticism of the tech giants. In fifteen chapters, the authors examine the economic, political, and social impacts of Google, Amazon, Facebook, Apple, and Microsoft, in order to understand the different facets of their power and how it is manifested. Digital Dominance is the first interdisciplinary

volume on this topic, contributing to a conversation which is critical to maintaining the health of democracies across the world.

End of the First Millennium United Nations

A new series of full-coverage resources developed for the AQA 2016 A/AS Level Geography specification. This full-colour Student Book covers all core and optional units for the AQA AS and A Level Geography specification for first teaching from September 2016. Students are encouraged to develop links between physical and human topics, understand systems, processes, and acquire geographical skills. Helping to bridge the gap from GCSE to A Level, it also provides support for fieldwork skills and for the geographical investigation at A Level. A 'Maths for geographers' feature helps students develop and apply their mathematical and statistical skills, and a range of assessment-style questions support students in developing their exam skills.

The Politics of Population Change Springer

Libraries have always played a special role in times of disaster by continuing to provide crucial information and services. The Stafford Act of 2011, a federal government directive, designates libraries as among the temporary facilities delivering essential services, making a Continuity of Operations Plan imperative for libraries. Peppered with informative first-person narratives from librarians recounting emergency situations, Halsted, Clifton, and Wilson cover such topics as: An eight-step approach to developing a risk assessment plan How to draft a one-page service continuity plan Information on how to use mobile devices and social media effectively in times of disaster Sample disaster plans, along with model exercises, manuals and customizable

communications Published in cooperation with the Medical Library Association (MLA), this nuts-and-bolts resource will enable libraries of all kinds to do their best while planning for the worst. Entrepreneurship in Latin America Walter de Gruyter GmbH & Co KG

Hebrew manuscripts are considered to be invaluable documents and artefacts of Jewish culture and history. Research on Hebrew manuscript culture is progressing rapidly and therefore its topics, methods and questions need to be enunciated and reflected upon. The case studies assembled in this volume explore various fields of research on Hebrew manuscripts. They show paradigmatically the current developments concerning codicology and palaeography, book forms like the scroll and codex, scribes and their writing material, patrons, collectors and censors, manuscript and book collections, illuminations and fragments, and, last but not least, new methods of material analysis applied to manuscripts. The principal focus of this volume is the material and intellectual history of Hebrew book cultures from antiquity to the Middle Ages and Early Modern Period, its intention being to heighten and sharpen the reader's understanding of Jewish social and cultural history in general.

State of Commodity Dependence 2019 Routledge

In the past half century, deadly disease outbreaks caused by novel viruses of animal origin - Nipah virus in Malaysia, Hendra virus in Australia, Hantavirus in the United States, Ebola virus in Africa, along with HIV (human immunodeficiency virus), several

influenza subtypes, and the SARS (sudden acute respiratory syndrome) and MERS (Middle East respiratory syndrome) coronaviruses - have underscored the urgency of understanding factors influencing viral disease emergence and spread. *Emerging Viral Diseases* is the summary of a public workshop hosted in March 2014 to examine factors driving the appearance, establishment, and spread of emerging, re-emerging and novel viral diseases; the global health and economic impacts of recently emerging and novel viral diseases in humans; and the scientific and policy approaches to improving domestic and international capacity to detect and respond to global outbreaks of infectious disease. This report is a record of the presentations and discussion of the event.

Jewish Manuscript Cultures Springer Nature

Advances in Seismic Event Location provides a broad overview of the fundamental issues involved in seismic event location, and presents a variety of state-of-the-art location methods and applications at a wide range of spatial scales. Three important themes in the book are: seismic monitoring for a Comprehensive Nuclear-Test-Ban Treaty (CTBT), seismic event location in three-dimensional Earth models, and methods for multiple-event location. Each chapter contains background material to help readers less familiar with the topics covered, as well as to provide abundant references for readers interested in probing deeper into a topic. However, most of the emphasis is on recent advances in methodology and their application. Audience: The book is intended primarily for academic and professional researchers and graduate students in seismology.

Manuscripts and Archives Hodder Murray

This open access book presents a picture of the current energy challenges on the African continent (and the Sub-Saharan region in particular) and proposes pathways to an accelerated energy transition. Starting with an analysis of the status quo and the outlook for Africa's energy demand and energy access, it provides an account of the available resources, including hydrocarbons and renewable energy resources, which are playing an increasingly crucial role. It then moves on to analyze the level of investment required to scale-up Africa's energy systems, shedding light on the key barriers and elaborating on potential solutions. It also provides a suggestion for improving the effectiveness of EU-Africa cooperation. While mainly intended for policymakers and academics, this book also speaks to a broader audience interested in gaining an overview of the challenges and opportunities of the African energy sector today and in the future.

A Step Up the Social Ladder? Routledge

This work aims to give students a wide range of differentiated and challenging activities, plus practice exam questions. It offers up-to-date case studies and is structured to ensure the content is suitable for candidates of all the major exam board specifications.

Health Employment and Economic Growth World Health Organization

Contains information on a variety of subjects within the field of education statistics, including the number of schools and colleges, enrollments, teachers, graduates, educational attainment, finances, Federal funds for education, libraries, international education, and research and development.
