Inhaltsangabe: Einleitung: Die vorliegende Arbeit befaßt sich mit der multimedialen Internet-Anwendung "AUDIO ON DEMAND IM WORLD WIDE WEB" und bedeutet "Radio auf Abruf im Internet". Im Internet/World Wide Web können mit Hilfe dieser Technik bereitgestellte Audio-Daten weltweit angehört werden. Die einzelnen Begriffe werden in der Arbeit ausführlich definiert und erklärt. Diese schriftliche Ausarbeitung ist jedoch nur ein Teil der Diplomarbeit, denn parallel dazu wurde von mir ein solches Audio-System im Rahmen meiner Praktikantentätigkeit beim WDR in Köln auf der dortigen Hardware installiert und administriert. Ziel der Tätigkeit beim WDR war es aufzuzeigen, daß ein solches AUDIO ON DEMAND-System auch ohne Millioneninvestitionen einzurichten und zu administrieren ist. Ein

Automatismus muß aufgebaut werden, der die ausgewählten Audiodateien ohne weiteres Zutun erzeugt, konvertiert und in den WWW-Server einbindet. Abschnitt 4.4. befaßt sich mit diesem Thema. Der Automatismus selbst konnte im Rahmen meiner Praktikantentätigkeit aus Zeitgründen nicht implementiert werden. Die von mir in HTML "handgemachten" Pilotseiten sind unter <http://www.wdr.de/radio/radio5/ra-demo/index.html> und weitere Beispiele des Audio-Systems sind unter <http://www.wdr.de/radio/upunkt/index.html> einzusehen. Beachten Sie bitte beim Anschauen dieser Seiten, daß Sie die kostenlose Client-Software, den RealAudio-Player benötigen, um die Töne tatsächlich über das Internet hören zu können. Zu den olympischen Sommerspielen 1996 in Atlanta/USA war dieses System bereits erfolgreich im praktischen Dauereinsatz. Dort wurden zwei Radiosender Live ins Internet eingespeist, so daß sich interessierte Internetsurfer aus aller Welt die Spiele aus Sicht des WDR anhören konnten. Zukünftig ist die Bereitstellung des WDR-Senders EinsLive im Internet geplant. Das rege Interesse

und die weite Verbreitung dieser Technik bei Internetnutzern ist an den Zugriffsstatistiken der Server-Log-Files des WDR zu sehen. Eine Diplomarbeit über das Thema Internet kann lediglich ein "Snapshot", eine Momentaufnahme eines bestimmten Zeitpunktes sein, denn der technische Fortschritt im Internet schreitet enorm schnell voran. Die hier vorliegende Diplomarbeit versteht sich vor diesem Hintergrund als Bestandsaufnahme zur Jahresmitte 1996. Das aktuelle und sehr spannende Praxis-Thema "AUDIO ON DEMAND IM WORLD WIDE WEB" zwang mich, technisch gesehen an vorderster Front zu kämpfen. Daraus folgte, daß keine Literatur [...]

It is my pleasure to write the preface for *Information Processing and Management*. This book aims to bring together innovative results and new research trends in information processing, computer science and management engineering. If an information processing system is able to perform useful actions for an objective in a given domain, it is because the system knows something about that domain. The more knowledge it has, the more useful it can be to its users. Without that knowledge, the system itself is useless. In the information systems field, there is conceptual modeling for the activity that elicits and describes the general knowledge a particular information system needs to know. The main objective of conceptual modeling is to obtain that

description, which is called a conceptual schema. Conceptual schemas are written in languages called conceptual modeling languages. Conceptual modeling is an important part of requirements engineering, the first and most important phase in the development of an information system.
