Studies in  
Macroeconomic  
Theory,  
Volume 2:

Redistribution and Growth is a compendium of scholarly papers on the behavior and public control of distribution and growth in the market economy. The papers in this volume focus on the subject of public finance under the broad theory of economic policy. The papers are grouped into five groups or sections. Part I covers the steady-state choices. The second part takes up the efficient use of a given

volume of saving in the choice among national investments. Part III explores the alternative approaches to optimal national saving. Part IV discusses the maximin-optimal graduated taxation of wage income. The final section expounds on Rawls's vision of the just economy. Economists will find the text invaluable and insightful. *Introduction to Macroeconomic Theory*

McGraw-Hill Companies  
Part I-An Introduction to Macroeconomics, Actual and Potential GNP : Fluctuations and Growth, A Review of the National Income and Product Accounts, Introduction to Income Determination : The Multiplier, Part II-National Income Determination : The Static Equilibrium Model.  
Preface:  
Methodological principle follow is to develop the aggregate macroeconomics

c functions from basic microeconomic principles. The technique developed naturally in the Princeton lectures in response to a division among the students roughly into one group with a good economics background but little mathematics and another mostly engineers-with mathematical training but little economics.
