of questions designed to test and develop knowledge of ICT systems and their impact. - Develop understanding and build confidence: questions and activities will aid preparation for all aspects of examination.

*Cambridge International a Level
Information Technology Student's Book*
Hodder Education

It is hard to deny that todayÆs world can seem apathetic toward Christians. Some may look down at their iPhones when we mention God, motion for the check when we bring up church, or casually change the subject when we talk about prayer. In a world full of people whose indifference is greater than their desire to know Christ, how can we dream of growing the church? In *Contagious Disciple Making*, David Watson and Paul Watson map out a simple method that has sparked an explosion of homegrown churches in the United States and around the world. A companion to Cityteam's two previous books, *Miraculous Movements* and *The Father Glorified*, *Contagious Disciple Making* details the method used by Cityteam disciple-makers. This distinctive process

focuses on equipping spiritual leaders in communities where churches are planted. Unlike many evangelism and church-growth products that focus on quick results, contagious disciple-making takes time to cultivate spiritual leadership, resulting in lasting disciple-making movements. Through *Contagious Disciple Making* readers will come to understand that a strong and equipped leader will continue to grow the church long after church planters move on to the next church. Features include:

- Engagement tools for use in the field
- Practical techniques to equip others to make disciples

The National Curriculum Handbook for Secondary Teachers in England Hodder Education

This title is endorsed by Cambridge Assessment International Education to support the full syllabus for examination from 2023. Written by renowned expert authors, our updated resources enable the learner to effectively navigate through the content of the updated Cambridge IGCSE(tm) Information and Communication Technology syllabuses (0417/0983).

NetLibrary named the Encyclopedia of Information Communication Technology as their September 2008 e-book of the month! [CLICK HERE](#) to view the announcement. The Encyclopedia of Information Communication Technology (ICT) is a comprehensive resource describing the influence of information communication technology in scientific knowledge construction, with emphasis on the roles of product technologies, process technologies, and context technologies. Through 111 authoritative contributions by 93 of the world's leading experts this reference covers the materials and instruments of information technology: from ICT in education to software engineering; the influence of ICT on different environments, including e-commerce, decision support systems, knowledge management, and more; and the most pervasive presence of information technology, including studies and research on knowledge management, the human side of ICT, ICT in healthcare, and virtual organizations, among many others. Addressing many of the fundamental issues of information communication technology, the

Encyclopedia of Information

Communication Technology will be a top-shelf resource for any reference library.
