As a work of cultural
criticism that recalls the

concerns of Foucault,
Hayden White, Zizek, and
others Decentering Music
examines the struggle for
the authority to speak

about music at a time when the humanities are in crisis. By linking the institutions that support musical research, including professional associations and universities, to complex historical changes such as globalization and the commodification of knowledge, Korsyn undertakes a critique of musical scholarship as an institutional discourse, while contributing to a general theory of disciplinary structures that goes beyond the limits of any single field.

In asking a number of fundamental questions about the models through which disciplinary objects in music are constructed, Korsyn suggests unexpected relationships between works of musical scholarship and the cultural networks in which they participate. Thus David Lewin's theory of musical perceptions is compared to Richard Rorty's concept of the "liberal ironist," Susan McClary's feminist narrative of music history is juxtaposed with T.S. Eliot's "dissociation of

sensibility," and Steven Feld's work in recording the music of the Kaluli people is compared to the treatment of ambient sound in contemporary cinema. Developing a framework for interpretation in dialogue with a number of poststructuralist writers, Korsyn goes far beyond applying their thought to the analysis of music; by showing the cultural dilemmas to which their work responds, Korsyn suggests how musical research already participates in these

ideas. Rather than impose any single method, *Decentering Music* empowers readers to choose for themselves by interrogating their own values and ideological commitments, exploring the enabling conditions for statements about music. By demonstrating the complicity of opposing positions and challenging readers to reexamine their own values, *Decentering Music* will surely provoke debate, while appealing to readers in a variety of fields, and to anyone concerned

about the crisis in the humanities.

CLUB PICK • The author of the international phenomenon Crazy Rich Asians takes us from Capri to NYC, where a young woman finds herself torn between two men—and two very different cultures. "Another riveting tale of privilege, culture and romance ... extravagant fashion and deceit, resulting in one truly modern love story." —CNN On her very first morning on the jewel-like island of Capri, Lucie Churchill sets eyes on George Zao and she

instantly can't stand him. She can't stand it when he gallantly offers to trade hotel rooms with her so that she can have a view of the Tyrrhenian Sea, she can't stand that he knows more about Casa Malaparte than she does, and she really can't stand it when he kisses her in the darkness of the ancient ruins of a Roman villa and they are caught by her snobbish, disapproving cousin Charlotte. The daughter of an American-born Chinese mother and a blue-blooded New York father,

Lucie has always sublimated the Asian side of herself in favor of the white side, and she adamantly denies having feelings for George. But several years later, when George unexpectedly appears in East Hampton, where Lucie is weekending with her new fiancé, Lucie finds herself drawn to George again. Soon, Lucie is spinning a web of deceit that involves her family, her fiancé, the co-op board of her Fifth Avenue apartment building, and, ultimately, herself as she

tries mightily to deny George entry into her world—and her heart. Moving between summer playgrounds of privilege, peppered with decadent food and extravagant fashion, *Sex and Vanity* is a truly modern love story, a daring homage to *A Room with a View*, and a brilliantly funny comedy of manners set between two cultures.

Our senses do not take in the world as it is. Rather the mind construes an intelligible world for human and personal purposes. What remains of reason, truth and

knowledge when this post-modern insight is accepted? This book draws a sharp distinction between responsible pluralism and anything-goes relativism, arguing that Nietzsche and his followers are correct that all cognition depends on willful acts of interpretation, but wrong in concluding that discourse between interpretive cultures can be nothing more than a power struggle. It responds to the post-modern "scandal of interpretations" by

showing how public truth may be construed, and deployed in policy making, as a structure of argument among conflicting strategies of understanding.

Foucault is one of those rare philosophers who has become a cult figure. Born in 1926 in France, over the course of his life he dabbled in drugs, politics, and the Paris SM scene, all whilst striving to understand the deep concepts of identity, knowledge, and power. From aesthetics to the penal system; from madness and civilisation to avant-garde literature, Foucault was happy to reject old models of thinking and replace them with versions that are still widely debated today. A

major influence on Queer Theory and gender studies (he was openly gay and died of an AIDS-related illness in 1984), he also wrote on architecture, history, law, medicine, literature, politics and of course philosophy, and even managed a best-seller in France on a book dedicated to the history of systems of thought. Because of the complexity of his arguments, people trying to come to terms with his work have desperately sought introductory material that

makes his theories clear and accessible for the beginner. Ideally suited for the Very Short Introductions series, Gary Gutting presents a comprehensive but non-systematic treatment of some highlights of Foucault's life and thought. Beginning with a brief biography to set the social and political stage, he then tackles Foucault's thoughts on literature, in particular the avant-garde scene; his philosophical and historical work; his treatment of knowledge and power in modern

society; and his thoughts on sexuality. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles
