HERRING TESSA

HarperCollins

A perfect and irresistible idea: A cookbook filled with delicious, healthful recipes created for everyone on a tight budget. While studying food policy as a master's candidate at NYU, Leanne Brown asked a simple yet critical question: How well can a person eat on the \$4 a day given by SNAP, the U.S. government's Supplemental Nutrition Assistance Program informally known as food stamps? The answer is surprisingly well: Broiled Tilapia with Lime, Spicy Pulled Pork, Green Chile and

Cheddar Quesadillas, Vegetable Jambalaya, Beet and Chickpea Salad—even desserts like Coconut Chocolate Cookies and Peach Coffee Cake. In addition to creating nutritious recipes that maximize every ingredient and use economical cooking methods, Ms. Brown gives tips on shopping; on creating pantry basics; on mastering certain staples—pizza dough, flour tortillas—and saucy extras that make everything taste better, like spice oil and tzatziki; and how to make fundamentally smart, healthful food choices. The idea for Good and Cheap is already proving itself. The author launched a Kickstarter campaign to self-publish and fund the buy one/give one

model. Hundreds of thousands of viewers watched her video and donated \$145,000, and national media are paying attention. Even high-profile chefs and food writers have taken note—like Mark Bittman, who retweeted the link to the campaign; Francis Lam, who called it “Terrific!”; and Michael Pollan, who cited it as a “cool kickstarter.” In the same way that TOMS turned inexpensive, stylish shoes into a larger do-good movement, Good and Cheap is poised to become a cookbook that every food lover with a conscience will embrace.

NEW YORK TIMES
BESTSELLER • “Facing death is the hardest thing of all, and Tallu

Quinn faces hers in a way that broke and healed my heart. This book is a beautiful tribute to life, to truth, and to love.”—Glennon Doyle, author of the #1 New York Times bestseller *Untamed*
Profound essays on nurturing life while facing a terminal diagnosis, from the dedicated humanitarian and young mother creating “a vibrant legacy for us to hold on to and learn from” (Ann Patchett) “I am holding both my hope and my grief together in the same hands. It is a loose hold, looser than I am accustomed to. My love is so much bigger than me.” Nonprofit leader and minister Tallu Schuyler Quinn spent her adult life working to alleviate hunger, systemic

inequality, and food waste, first as a volunteer throughout the United States and abroad, and then as the founder of the Nashville Food Project, where she supported the vibrant community work of local food justice in Middle Tennessee. That all changed just after her fortieth birthday, when she was diagnosed with stage IV glioblastoma, an aggressive form of terminal brain cancer. In *What We Wish Were True*, Quinn achingly grapples with the possibility of leaving behind the husband and children she adores, and what it means to live with a terminal diagnosis and still find meaning. “I think about how my purpose may be the same in death as it

continues to be in life—surrendering to the hope that our weaknesses can be made strong, that what is broken can be made whole,” she writes. Through gorgeous prose, Quinn masterfully weaves together the themes of life and death by integrating spiritually nourishing stories about family, identity, vocational call, beloved community, God’s wide welcome, and living with brain cancer. Taken together, these stunning essays are a piercing reminder to cherish each moment, whether heartbreaking or hilarious, and cast loose other concerns. As a mother, a kindred spirit, and a dear friend, Tallu Schuyler Quinn looks into our eyes with well-earned tears in her own and

tells us the bittersweet truth: We are all searching for what has already found us—present and boundless love. This love will deliver us and never let us go. *Amazing Stories of the Flying Spaghetti Monster* HarperCollins In this e-book edition, Tomie dePaola retells his classic story against a charming musical score. Strega Nona—"Grandma Witch"—is the source for potions, cures, magic, and comfort in her Calabrian town. Her magical ever-full pasta pot is especially intriguing to hungry Big Anthony. Big Anthony is supposed to look after her house and tend her garden, but one day, when she goes over the mountain to visit Strega Amelia, he

recites the magic verse over the pasta pot, with disastrous results. Pasta by Design David Farmer They are tough. They are mean. They are the fastest, coolest gunslingers of the 1960s, and they don't talk much. They are the heroes of the Italian Spaghetti West and they changed the Western forever. Clint Eastwood's poncho-clad, cigar smoking Man With No Name is the enduring symbol of the genre and his Dollars trilogy with Sergio Leone reinvented action cinema, adding a European freshness to the time-worn Western myths. But Leone and Eastwood weren't the only hombres to saddle-up and head west, and this guide rounds-up and reviews

the best of a very wild bunch, including perennial cult classics *Django*, *The Big Gundown*, *Django Kill*, and *They Call Me Trinity*. He also charts the Spaghetti Western careers of actors like Lee Van Cleef, Terence Hill, and Klaus Kinski as they rode the trail to international success. As well as an introduction to the genre, 31 of the best Spaghetti Westerns are analyzed in detail and there is a comprehensive multi-media reference section.

“One Hundred Spaghetti Strings is one hundred percent satisfying. A perfectly blended concoction.”
—Julie Sternberg, acclaimed author of

Like Pickle Juice on a Cookie This brave and heartwarming middle grade novel will leave your belly rumbling and your heart full. Because when life hands you lemons, it’s time to get cooking! Perfect for fans of Sarah Weeks, Leslie Connor, and Lynda Mullaly Hunt. Since Steffy was little, she and her older sister, Nina, have lived with their beloved Auntie Gina. But when the girls’ dad comes home to live with them, everything changes. So Steffy does what she does best: She cooks her way through the hardest year of her life. Sometimes it feels like everything but the kitchen sink is being thrown at her—too many ingredients that don’t quite work. And all Steffy wants is for

her family to be whole again. Can her recipes help bring them back together? One Hundred Spaghetti Strings also includes over twenty recipes—which Steffy cooks throughout the book—so aspiring young chefs can try them out when they're done reading!

The free book "Fundamentals of Computer Programming with C#" is a comprehensive computer programming tutorial that teaches

programming, logical thinking, data structures and algorithms, problem solving and high quality code with lots of examples in C#. It starts with the first steps in programming and software development like variables, data types, conditional statements, loops and arrays and continues with other basic topics like methods, numeral systems, strings and string processing, exceptions, classes and objects. After the basics this fundamental programming book enters into more advanced programming topics like recursion, data structures (lists, trees, hash-tables and graphs), high-quality code, unit testing and

refactoring, object-oriented principles (inheritance, abstraction, encapsulation and polymorphism) and their implementation the C# language. It also covers fundamental topics that each good developer should know like algorithm design, complexity of algorithms and problem solving. The book uses C# language and Visual Studio to illustrate the programming concepts and explains some C# / .NET specific technologies like lambda expressions, extension methods and LINQ. The book is written by a team of developers lead by Svetlin Nakov who has 20+ years practical software development experience. It teaches

the major programming concepts and way of thinking needed to become a good software engineer and the C# language in the meantime. It is a great start for anyone who wants to become a skillful software engineer. The book does not teach technologies like databases, mobile and web development, but shows the true way to master the basics of programming regardless of the languages, technologies and tools. It is good for beginners and intermediate developers who want to put a solid base for a successful career in the software engineering industry. The book is accompanied by free video lessons,

presentation slides and mind maps, as well as hundreds of exercises and live examples. The true story of an ordinary woman living an extraordinary existence all over the world. "Gelman doesn't just observe the cultures she visits, she participates in them, becoming emotionally involved in the people's lives. This is an amazing travelogue." —Booklist

At the age of forty-eight, on the verge of a divorce, Rita Golden Gelman left an elegant life in L.A. to follow her dream of travelling the world, connecting with people in cultures all over the globe. In 1986, Rita sold her

possessions and became a nomad, living in a Zapotec village in Mexico, sleeping with sea lions on the Galapagos Islands, and residing everywhere from thatched huts to regal palaces. She has observed orangutans in the rain forest of Borneo, visited trance healers and dens of black magic, and cooked with women on fires all over the world. Rita's example encourages us all to dust off our dreams and rediscover the joy, the exuberance, and the hidden spirit that so many of us bury when we become adults.

She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom

bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the

Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, The

Immortal Life of Henrietta Lacks captures the beauty and drama of scientific discovery, as well as its human consequences.

In Bali, as in many parts of the world, rice

is more than just a staple food-rice is life! In Bali, life revolves around the planting and harvesting of rice. While eels slip through the mud and dragonflies flutter overhead, farmers plant seedlings in the wet rice field, or 'saweh.' Soon each plant is crowned with flowers, and tiny green kernels appear. Rain nourishes the kernels,

which grow plump and sweet. The green plants turn golden and ripe, and everyone helps harvest the grain. When the harvest is finished, the farmers give thanks to the goddess of rice for a successful crop. From planting the seeds to harvesting the ripe grain, this beautiful, poetic book tells the story of rice and of the Balinese people, for whom rice is life.
