International Standard Banking Practice (ISBP) for the examination of documents under documentary credits, answers the most relevant questions practitioners have concerning how UCP 500, ICC's universally used rules on documentary credits, are to be integrated into day-to-day practice. The product of more than two years of work by the ICC Banking

Commission, ISBP is based on the official Opinions issued by the Banking Commission in response to queries submitted by users of UCP 500. The text provides responses to the key questions relating to the examination of drafts, multimodal transport documents, insurance documents, certificates of origin and a range of other documents associates with letters of credit. This publication reflects international standard banking practice for all parties to a documentary credit. Figures show that 60%-70% of credits are rejected for discrepancies on first presentation. The law of personal property covers a very wide spectrum of scenarios and, unfortunately, has had little detailed

scrutiny of its overarching structure over the years. It is a system and can best be understood as a system. Indeed, without understanding it as a system, it becomes much more difficult to comprehend. The second edition of this acclaimed textbook continues to provide a comprehensive yet detailed coverage of the law of personal property in England and Wales. It includes transfer of legal title to chattels, the nemo dat rule, negotiable instruments and assignment of choses in action. It also looks at defective transfers of property and the resulting proprietary claims, including those contingent on tracing, the tort of conversion, bailment and security interests. By bringing together areas often scattered throughout company law, commercial law, trusts and tort

textbooks, it enables readers to see common themes and issues and to make otherwise impossible generalisations across different contexts about the nature of the concepts English law applies. Throughout the book, concepts are explained rigorously, with reference to how they are used in commercial practice and everyday life. The new edition also includes a new chapter on secured transactions law reform, and introduces new material on the Cape Town Convention, IP rights and other intangible property. The book will be of primary interest to academics and practitioners in the area. However, it will also be of use to students studying commercial or personal property law. *USA Business* Kogan Page Publishers

This book, Principles of International Trade: Import-Export, is intended for students studying international trade and for business people who want to engage in international trade. This book covers the basic concepts and procedures that are required for starting and completing international transactions. All businesses, regardless of whether they do only domestic business or not, are affected by international trade and business. Consumers encounter imported products at most retail stores, and domestic businesses are exposed to stiff foreign competition. As a consumer or as a businessperson, all of us need to understand international trade for our

own benefits. The draft version of this book, annually or biannually revised, had been used as a textbook at California State University, Los Angeles, California (Cal State, Los Angeles), and Pacific States University, Los Angeles, California (PSU), for over ten years before this book was first published in 1993 with the help and encouragement of my family, friends, students, and colleagues at both campuses. This book consists of thirty-seven chapters, a bibliography, websites, indexes, and endnotes. The text is divided into two parts. The first part, chapters 1 through 27, covers matters for importing goods from overseas and common topics related to both importing and exporting. The second part, chapters 28 through 37, is devoted to topics for exporting overseas.
