For anyone planning events—student, novice, or experienced professional—Confessions of an Event Planner is an "apprenticeship in a book." This insider's guide takes you on a narrative journey, following a fictional event planning company that stages various types of events around the world for many different clients. While other books, college courses, and training programs give you the theory and how-to of the profession, Confessions of an Event Planner reveals the real world of event planning and what can happen—usually the unexpected—on an event program when actual participants are added to the event planning design and execution mix. In a climate of media scrutiny and corporate scandals, event planners must be masters of discretion, knowing how to avoid and deal with everything from sexual romps to financial shenanigans, to chainsaw wielding salesmen dead set on "re-landscaping" the grounds of the resort they're staying at. From an event planner who's seen it all and knows how to deal with it all, comes practical first-hand advice delivered in an entertaining and accessible format. Each chapter is set in a unique location, with a cast of characters, and a host of challenges and problems to overcome—from the boardroom to the resort guest bedrooms. Readers learn what they can come up against, how to problem solve creatively on the fly, get ideas for staging spectacular events, and see the principles of event planning in action. The scenario in each chapter is introduced by an outline of what will be covered in the chapter, and each chapter concludes with a series of review questions to explore key issues and stimulate reflection or discussion for individuals or groups. Ideal as a companion to Judy Allen's six other event planning books, as a textbook in event planning courses, or as a professional training tool Confessions of an Event Planner prepares planners for what they can expect once they start working in the world of corporate and social event planning, and will help decision-makers set company policies, procedures and protocol and promote discussion about codes of conduct in the office and offsite.

Semi-infinite programming (SIP) deals with optimization problems in which either the number of decision variables or the number of constraints is finite. This book presents the state of the art in SIP in a suggestive way, bringing the powerful SIP tools close to the potential users in different

scientific and technological fields. The volume is divided into four parts. Part I reviews the first decade of SIP (1962-1972). Part II analyses convex and generalised SIP, conic linear programming, and disjunctive programming. New numerical methods for linear, convex, and continuously differentiable SIP problems are proposed in Part III. Finally, Part IV provides an overview of the applications of SIP to probability, statistics, experimental design, robotics, optimization under uncertainty, production games, and separation problems. Audience: This book is an indispensable reference and source for advanced students and researchers in applied mathematics and engineering.

Volumes in Writing Spaces: Readings on Writing offer multiple perspectives on a wide-range of topics about writing, much like the model made famous by Wendy Bishop's "The Subject Is . . ." series. In each chapter, authors present their unique views, insights, and strategies for writing by addressing the undergraduate reader directly. Drawing on their own experiences, these teachers-as-writers invite students to join in the larger conversation about developing nearly every aspect of craft of writing. Consequently, each essay functions as a standalone text that can easily complement other selected readings in writing or writing-intensive courses across the disciplines at any level. Topics in Volume 1 of the series include academic writing, how to interpret writing assignments, motives for writing, rhetorical analysis, revision, invention, writing centers, argumentation, narrative, reflective writing, Wikipedia, patchwriting, collaboration, and genres. *Awards ... From the authors who created the One Word movement, impacting schools, businesses, and sports teams around the world, comes a charming fable that can be read and shared by everyone. If you could choose only one word to help you have your best year ever, what would it be? Love? Fun? Believe? Brave? It's probably different for everyone. How you find your word is just as important as the word itself. And once you know your word, what do you do with it? In *One Word for Kids*, bestselling author Jon Gordon—along with coauthors Dan Britton and Jimmy Page—asks these questions to children and adults of all ages, teaching an important life lesson in the process. This engaging, fully illustrated fable follows Stevie, a young boy falling asleep on the first day of school. His teacher gives the class an assignment: to find the one word that will help them have their best year ever. To discover their one word, they must look inside themselves, look up, and look out. At home, Stevie is upset because he can't find his word. After his dad offers some helpful advice, Stevie excitedly begins the quest for his word. His search helps him discover a lot about himself, what he loves, and what is important to him. An easy read with a powerful message, *One Word for Kids* appeals to readers of all ages and is an ideal entry point into discussing a valuable lesson in a fun and engaging way.

The assignment of contractual rights is of immense importance for the world of business and finance. Never before have assignments taken place on such a large scale as is the case in the contemporary securitisation market. Many receivables-based financial transactions, such as securitisations, are cross-border transactions. It is therefore often crucial to determine which law governs the proprietary aspects of assignment. The European Commission has, in its "proposal for a regulation on the law applicable to contractual obligations," formulated a new conflict rule referring the enforceability of an assignment against third parties to the law of the assignor's residence. This book demonstrates how the solution which has been adopted by the Commission is inadequate for receivables-based cross-border transactions. The authors argue that a cross-border assignment should, instead, be governed by the law chosen by the assignor and the assignee and, in the absence of a choice, by the law applicable to the assigned claim. The most important policy behind the Commission's conflict rule, i.e. that the assignor's creditors should be able to look to the assignor's law for registration requirements, can be realized in subtler ways, in particular by means of a special conflict rule for public filing systems. The Annexes contain the full texts of the Commission's Proposal, the UN Convention on the Assignment of Receivables, and Chapter 11 of the Principles of European Contract Law (Assignment of Claims).

This book brings together archeologists, historians, psychologists, and educators from different countries and academic traditions to address the many ways that we tell children about the (distant) past. Knowing the past is fundamentally important for human societies, as well as for individual development. The authors expose many unquestioned assumptions and preformed images in narratives of the past that are routinely presented to children. The contributors both examine the ways in which children come to grips with the past and critically assess the many ways in which contemporary societies and an increasing number of commercial agents construct

and use the past.

Inspired by a real-life incident, this riveting novel explores the dangerous impact discrimination and antisemitism have on one community when a school assignment goes terribly wrong. Would you defend the indefensible? That's what seniors Logan March and Cade Crawford are asked to do when a favorite teacher instructs a group of students to argue for the Final Solution--the Nazi plan for the genocide of the Jewish people. Logan and Cade decide they must take a stand, and soon their actions draw the attention of the student body, the administration, and the community at large. But not everyone feels as Logan and Cade do--after all, isn't a school debate just a school debate? It's not long before the situation explodes, and acrimony and anger result. Based on true events, *The Assignment* asks: What does it take for tolerance, justice, and love to prevail? "An important look at a critical moment in history through a modern lens showcasing the power of student activism." --SLJ

VLSI Design Environments investigates design alternatives such as object oriented data modelling. The difficulty of automating chip architecture designs is caused by the complexity of the problem. The explosion of design decisions make a heuristic approach necessary. PLAYOUT aims at the solution of system problems based on hierarchy, top-down planning, silicon compiler

presentations, advances in encoding logic synthesis and a microarchitectre and logic optimization system. PLAYOUT supports the physical design from entering the structure of digital systems to the generation of the mask. The concept for autonomous tools with a clear interface to the network description and the simple interface to the graphics is presented. This enables the designer to have a great influence on the configuration of the placement of the schematic diagram.

Substantial progress is being made in behavioural and logic synthesis, both of which depend upon specifications.
