### DICKSON HEATH

**Savage Pistols** Springer Science & Business Media

The previously untold story of the Zenith Trans-Oceanic, the world's most romantic and expensive series of portable radios. Long a companion of kings, presidents, transoceanic yachtsmen and world explorers, the Trans-Oceanic was also carried into battle by American troops in three wars. Its great popularity in spite of a very high price can be laid at the feet of several generations of armchair travelers who used the shortwave capabilities of the Trans-Oceanic as a window on the world. With access to the Zenith corporate archives and their long experience as radio enthusiasts and writers for both the popular and scholarly press, Professors Bryant and Cones present the engrossing stories of the development and use of the Trans-Oceanic throughout its forty year life. They present a wealth of never-before published photographs, documents and information concerning these fascinating radios, their collection, preservation and restoration.

*Snack Food* Schiffer Pub Limited

Contains the definitive history of the extensive but little known U.S. Army amphibious operations during the Korean War, 1950-1953. Provides insights to modern planners crafting future joint or combined operations in that part of the world.Originally published in 2008. Illustrated.

*Insects As Food and Feed* National Geographic Books

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

*Report of Trustees* Springer Science & Business Media

Cachexia may well represent the flip side of the tremendous achievements of modern medicine. The aim of this volume, written by world-renowned scientists, is to provide the best available evidence on the pathogenesis, clinical features and therapeutic approach of cachexia, and to facilitate the understanding of the complex yet unequivocal clinical role of this syndrome, that truly represents a disease, or, more likely, a disease within other different diseases.

*Weird But True 1: Expanded Edition* Prabhat Prakashan

This booklet contains the stories of six teachers who discuss, step by step, how they each handled a specific restructuring challenge in their schools. They describe what strategies worked and what did not, and provide diagrams and checklists to help other teachers. Chapter 1 describes the implementation of a collaborative school-based decision-making project, the Effective Schools Project, at Centreville Elementary School in Fairfax County, Virginia. Chapter 2, "Matters of Time" (Margaret Almony) discusses how time-management techniques were utilized at Ahuimanu Elementary School in Kanehoe, Hawaii, to make time for a Mastery-in-Learning Project and teacher participation in a site-based-management council. Chapter 3, "Seasons of Change" (Laura P. Krich) describes the implementation of a Mastery-in-Learning Project at Diamond Middle School in Lexington, Massachusetts. Chapter 4, "Bringing a New Order to Things" (Jonathan C. Kieffer) describes how Jackson Road Elementary School (in the Montgomery County, Maryland, Public School System) restructured school time to provide for school-based research and faculty collaboration. The fifth chapter, "Pushing Learning beyond the Classroom Walls" (Jeanne Lokar) examines the development of an outcomes-based education (OBE) program at the Richard Mann Building of the Gananda Community School District, in Macedon, New York. The final chapter, "Rising from the Ashes" (Mike Marriam) discusses how failure to initiate a school change facilitated a growth process for Seneca Middle School in Seneca Falls, New York. A glossary and an appendix containing a diagram of systemic school restructuring are included. (LMI)

*A Year Book and Almanac of Newfoundland* McGraw Hill Professional

In July 1863 New York City experienced widespread rioting unparalleled in the history of the nation. Here for the first time is a scholarly analysis of the Draft Riots, dealing with motives and with the reasons for the recurring civil disorders in nineteenth-century New York: the appalling living conditions, the corruption of the civic government, and the geographical and economic factors that led up to the social upheaval.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

**Standard Catalog of Ruger Firearms** National Education Assn

Tuberculosis (TB) remains the largest cause of adult deaths from any single infectious disease, and ranks among the top 10 causes of death worldwide. When TB and war occur simultaneously, the inevitable consequences are disease, human misery, suffering, and heightened mortality. TB is, therefore, one of the most frequent and deadly diseases to complicate the special circumstances of warfare. Written by internationally acclaimed experts, this book provides a comprehensive analysis of the status of TB before, during and after WWII in the 25 belligerent countries that were chiefly involved. It summarizes the history of TB up to the present day. A special chapter on "Nazi Medicine, Tuberculosis and Genocide" examines the horrendous, inhuman Nazi ideology, which during WWII used TB as a justification for murder, and targeted the disease by eradicating millions who were afflicted by it. The final chapter summarizes the lessons learned from WWII and more recent wars and recommends anti-TB measures for future conflicts. This publication is not only of interest to TB specialists and pulmonologists but also to those interested in public health, infectious diseases, war-related issues and the history of medicine. It should also appeal to nonmedical readers like journalists and politicians.

**The Zenith Trans-Oceanic** Gun Digest

Rather than containing for the most part fairly detailed food science and technology intended for daily use and reference by food scientists and technologists, this book is designed for use by a much wider range of readers concerned with a particular and rapidly expanding area of food production, promotion, marketing, and packaging. A certain amount of basic detail is provided to enable relatively rough estimates of the production methods and packaging facilities necessary to enable new or improved items to be made, but the overall emphasis is on the wide range of food products that can now quite legitimately be regarded as coming within the broad definition of foods used as snacks, as contrasted with main meals. Thus, we start with the basic requirements to be met in a snack food whatever its nature, and follow with the great variety of items nowadays used 3..I snacks or as adjuvants to snacks, concluding with an assessment of nutritional consequences of the growth of "snacking" or "browsing," and with the special packaging requirements of snack foods.

*EPA-454/F.* Karger Medical and Scientific Publishers

Alternative protein sources are urgently required as the available land area is not sufficient to satisfy the growing demand for meat. Insects have a high potential of becoming a new sector in the food and feed industry, mainly because of the many environmental benefits when compared to meat production. This will be outlined in the book, as well as the whole process from rearing to marketing. The rearing involves large scale and small scale production, facility design, the management of diseases, and how to assure that the insects will be of high quality (genetics). The nutrient content of insects will be discussed and how this is influenced by life stage, diet, the environment and processing. Technological processing requires decontamination, preservation, and ensuring microbial safety. The prevention of health risks (e.g. allergies) will be discussed as well as labelling, certification and legislative frameworks. Additional issues are: insect welfare, the creation of an enabling environment, how to deal with consumers, gastronomy and marketing strategies. Examples of production systems will be given both from the tropics (palm weevils, grasshoppers, crickets) and from temperate zones (black soldier flies and house flies as feed and mealworms and crickets as food).

**Power Trains**

Standard Catalog of Ruger Firearms is the most complete guide available for buyers, sellers and collectors of these iconic firearms. Ruger enthusiasts of all interests will benefit from the accurate and detailed technical specifications, expertly analyzed preices and superb color photos featured in this comprehensive reference.

*Film Year Book*

Well-organized charts and tables with specific information on each model, make, issue, and modification. Detailed information for collectors on:

Finishes Grips Serial numbers Inspector marks Barrel specifications Savage automatic pistols are the hidden treasures of gun collecting. Informed collectors agree that these well-designed, superbly crafted, high-quality American firearms have been ignored, with little new information available for the last 40 years. In *Savage Pistols*, author Bailey Brower Jr. tells the remarkable story of Savage Arms, from its humble beginnings with Arthur Savage in the late 1880s to the creation of the last pistol in the late 1920s. Bailey explains the evolution of the Savage pistol, the role of Savage pistols in World War I, and the pistol's connection to such historical figures as Buffalo Bill Cody, Bat Masterson, and William Pinkerton. This information-packed book includes hundreds of photographs of Savage pistols and rifles, cartridges, holsters, and other Savage products, as well as fascinating advertisements and illustrations touting the wonders of "the pistol that almost was." *Savage Pistols* is an indispensable resource for any collector, and an intriguing look into the history of American firearms.

**Compilation of Air Pollutant Emission Factors: Mobile sources**

Apr. 1935-Apr. 1939 include sections "Mining review" and "Real estate, building and commercial reviews."

School-based Change

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.
