Research in Social Sciences and Humanities, Depok, Indonesia, November 7-9, 2016: Topics in Psychology and Behavioral Sciences Wadsworth Publishing Company "This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer

chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and exercises and critical thinking activities end each section"-BCcampus website.
