The Sardonyx Net Kodawari Press
A nomadic starship, the Sardonyx (a.k.a. Yago) Net is manned by the Yago family, with Zed Yago as its captain. The Sardonyx Net is responsible for picking up space trash (i.e., convicts) in the Sardonyx sector. Zed gets great pleasure from torturing the convicts before selling them as slaves. The authorities of the planets in the Sector turn a blind eye as the Yagos drug and

torture the criminals. But the Yagos' entire operation is at risk when there is a shortage of the drug they use to control the criminals and when Dana Ikoro arrives. In this story of forbidden love, crime, corrupt justice, and lucrative business, the Yago family must fight to keep their business stable.

Discover the essential thinking tools you've been missing with The Great Mental Models series by Shane Parrish, New York Times bestselling author and the mind behind the acclaimed Farnam Street blog and "The Knowledge Project" podcast. This first book in the series is your guide to learning the crucial thinking tools nobody ever taught you. Time and time again, great thinkers such as Charlie Munger and Warren Buffett have credited their success to mental models—representations of how something works that can scale onto other fields. Mastering a small number of mental models enables you to rapidly grasp new information, identify patterns others miss, and avoid the common

mistakes that hold people back. The *Great Mental Models: Volume 1, General Thinking Concepts* shows you how making a few tiny changes in the way you think can deliver big results. Drawing on examples from history, business, art, and science, this book details nine of the most versatile, all-purpose mental models you can use right away to improve your decision making and productivity. This book will teach you how to: Avoid blind spots when looking at problems. Find non-obvious solutions. Anticipate and achieve desired outcomes. Play to your strengths, avoid your weaknesses, ... and more. The *Great Mental Models* series demystifies once elusive concepts and illuminates rich knowledge that traditional education overlooks. This series is the most comprehensive and accessible guide on using mental models to better understand our world, solve problems, and gain an advantage.

The Science of Self-Learning Henry Holt
 #1 NATIONAL BESTSELLER • Two starcrossed magicians engage in a deadly game of cunning in the spellbinding novel that captured the world's imagination. • "Part love story, part fable ... defies both genres and expectations." —The Boston Globe
 The circus arrives without warning. No announcements precede it. It is simply there, when yesterday it was not. Within the black-and-white striped canvas tents is an utterly unique experience full of breathtaking amazements. It is called *Le Cirque des Rêves*, and it is only open at night. But behind the scenes, a fierce competition is underway: a duel between two young magicians, Celia and Marco, who have been trained since childhood expressly for this purpose by their mercurial instructors. Unbeknownst to them both, this is a game in which only

one can be left standing. Despite the high stakes, Celia and Marco soon tumble headfirst into love, setting off a domino effect of dangerous consequences, and leaving the lives of everyone, from the performers to the patrons, hanging in the balance.

Building a Second Brain Simon & Schuster

Look for O'Brien's new book, *American Fantastica*, on sale October 24th A classic work of American literature that has not stopped changing minds and lives since it burst onto the literary scene, *The Things They Carried* is a ground-breaking meditation on war, memory, imagination, and the redemptive power of storytelling. *The Things They Carried* depicts the men of Alpha Company: Jimmy Cross, Henry Dobbins, Rat Kiley, Mitchell Sanders, Norman Bowker, Kiowa, and the character Tim O'Brien, who has survived his tour in Vietnam to become a father and writer at the age of forty-three. Taught everywhere—from high school classrooms to graduate seminars in creative writing—it has become required reading for any American and continues to challenge readers in their perceptions of fact and fiction, war and peace, courage and fear and longing. *The Things They Carried* won France's prestigious Prix du Meilleur Livre Etranger and the Chicago Tribune Heartland Prize; it was also a finalist for the Pulitzer Prize and the National Book Critics Circle Award.

College Success Anchor

In this delightfully witty, provocative book, literature professor and psychoanalyst Pierre Bayard argues that not having read a book need not be an impediment to having an interesting conversation about it. (In fact, he says, in certain situations reading the book is

the worst thing you could do.) Using examples from such writers as Graham Greene, Oscar Wilde, Montaigne, and Umberto Eco, he describes the varieties of "non-reading"-from books that you've never heard of to books that you've read and forgotten-and offers advice on how to turn a sticky social situation into an occasion for creative brilliance. Practical, funny, and thought-provoking, *How to Talk About Books You Haven't Read*-which became a favorite of readers everywhere in the hardcover edition-is in the end a love letter to books, offering a whole new perspective on how we read and absorb them.

Learn, Improve, Master Penguin
The inspiration for the HBO documentary from Academy Award-winning producer Alex Gibney. The #1 New York Times bestseller based on years of reporting and interviews with more than 250 people from every corner of Tiger Woods's life—this "comprehensive, propulsive...and unsparing" (The New Yorker) biography is "an ambitious 360-degree portrait of golf's most scrutinized figure...brimming with revealing details" (Golf Digest). In 2009, Tiger Woods was the most famous athlete on the planet, a transcendent star of almost unfathomable fame and fortune living what appeared to be the perfect life. But it turned out he had been living a double life for years—one that exploded in the aftermath of a Thanksgiving night crash that exposed his serial infidelity and sent his personal and professional lives over a cliff. In this "searing biography of golf's most blazing talent" (GOLF magazine), Jeff Benedict and Armen Keteyian dig deep behind the headlines to produce a richly reported answer to the question that has mystified millions of sports fans for nearly a decade: who is Tiger Woods, really? Drawing on more than four

hundred interviews with people from every corner of Woods's life—many of whom have never spoken about him on the record before—Benedict and Keteyian construct a captivating psychological profile of a mixed race child programmed by an attention-grabbing father and the original Tiger Mom to be the "chosen one," to change not just the game of golf, but the world as well. But at what cost? Benedict and Keteyian provide the startling answers in this definitive biography that is destined to linger in the minds of readers for years to come. "Irresistible...Immensely readable...Benedict and Keteyian bring us along for the ride in a whirlwind of a biography that reads honest and true" (The Wall Street Journal). Ultimately, Tiger Woods is "a big American story...exhilarating, depressing, tawdry, and moving in almost equal measure" (The New York Times).

Educational practice does not, for the most part, rely on research findings. Instead, there's a preference for relying on our intuitions about what's best for learning. But relying on intuition may be a bad idea for teachers and learners alike. This accessible guide helps teachers to integrate effective, research-backed strategies for learning into their classroom practice. The book explores exactly what constitutes good evidence for effective learning and teaching strategies, how to make evidence-based judgments instead of relying on intuition, and how to apply findings from cognitive psychology directly to the classroom. Including real-life examples and case studies, FAQs, and a wealth of engaging illustrations to explain complex concepts and emphasize key points, the book is divided into four parts: Evidence-based

education and the science of learning
 Basics of human cognitive processes
 Strategies for effective learning Tips for
 students, teachers, and parents. Written
 by "The Learning Scientists" and fully
 illustrated by Oliver Caviglioli,
 Understanding How We Learn is a
 rejuvenating and fresh examination of
 cognitive psychology's application to
 education. This is an essential read for
 all teachers and educational
 practitioners, designed to convey the
 concepts of research to the reality of a

"Fascinating and useful . . . The
 distinguished memory researcher Scott
 A. Small explains why forgetfulness is
 not only normal but also
 beneficial."—Walter Isaacson, bestselling
 author of *The Code Breaker* and
Leonardo da Vinci Who wouldn't want a
 better memory? Dr. Scott Small has
 dedicated his career to understanding
 why memory forsakes us. As director of
 the Alzheimer's Disease Research Center
 at Columbia University, he focuses
 largely on patients who experience
 pathological forgetting, and it is in
 contrast to their suffering that normal
 forgetting, which we experience every
 day, appears in sharp relief. Until
 recently, most everyone—memory
 scientists included—believed that
 forgetting served no purpose. But new
 research in psychology, neurobiology,
 medicine, and computer science tells a
 different story. Forgetting is not a failure
 of our minds. It's not even a benign
 glitch. It is, in fact, good for us—and,
 alongside memory, it is a required
 function for our minds to work best.
 Forgetting benefits our cognitive and
 creative abilities, emotional well-being,
 and even our personal and societal
 health. As frustrating as a typical lapse

can be, it's precisely what opens up our
 minds to making better decisions,
 experiencing joy and relationships, and
 flourishing artistically. From studies of
 bonobos in the wild to visits with the
 iconic painter Jasper Johns and the
 renowned decision-making expert Daniel
 Kahneman, Small looks across
 disciplines to put new scientific findings
 into illuminating context while also
 revealing groundbreaking developments
 about Alzheimer's disease. The next
 time you forget where you left your
 keys, remember that a little forgetting
 does a lot of good.

NEW YORK TIMES BESTSELLER • Pierce Brown's relentlessly entertaining debut channels the excitement of *The Hunger Games* by Suzanne Collins and *Ender's Game* by Orson Scott Card. "Red Rising ascends above a crowded dystopian field."—USA Today ONE OF THE BEST BOOKS OF THE YEAR—Entertainment Weekly, BuzzFeed, Shelf Awareness "I live for the dream that my children will be born free," she says. "That they will be what they like. That they will own the land their father gave them." "I live for you," I say sadly. Eo kisses my cheek. "Then you must live for more." Darrow is a Red, a member of the lowest caste in the color-coded society of the future. Like his fellow Reds, he works all day, believing that he and his people are making the surface of Mars livable for future generations. Yet he toils willingly, trusting that his blood and sweat will one day result in a better world for his children. But Darrow and his kind have been betrayed. Soon he discovers that humanity reached the surface generations ago. Vast cities and lush wilds spread across the planet. Darrow—and Reds like him—are nothing more than slaves to a decadent ruling class. Inspired by a longing for justice, and driven by the memory of lost love, Darrow sacrifices everything to infiltrate the legendary Institute, a proving ground

for the dominant Gold caste, where the next generation of humanity's overlords struggle for power. He will be forced to compete for his life and the very future of civilization against the best and most brutal of Society's ruling class. There, he will stop at nothing to bring down his enemies . . . even if it means he has to become one of them to do so.
