SCUBA is a fun, relaxing,
educational, interesting,

and -- if approached properly -- safe activity, it is nonetheless a sport that has risks. SCUBA diving is in fact an extreme sport that can injure or even kill very quickly, and in some very nasty ways. What we are doing is entering an

alien environment that is normally hostile to human life. We cannot breathe in water without some kind of mechanical assistance. These are facts and the details should be covered in every Open Water (OW) class. All too often in

today's society, however, people do not want to take the time to properly prepare and get the education to safely take on new tasks. Some agencies appear to have responded to this by developing training programs that turn out high numbers of certified divers in shorter time frames, necessitating the reduction of time spent on what I consider to be some necessary basic skills. While this has resulted in great numbers of new divers entering the water, it has not resulted

in many of those divers staying in the water. New divers are often given just enough training to enable them to dive in the most benign conditions under close supervision. Even then, there are still those who find out their initial training was just not adequate. It is at this point that they either make the decision to get more training or they leave the sport. The latter happens all too often. The former, when it does happen, does not always occur for the right reasons. Students should

return to training to expand their diving and learn new skills; they should not have to return for new training just to be able to enjoy the sport safely. To require students to come back for basic information is something I find very troubling, and in some cases, has actually cost divers their lives. A lack of rescue instruction has resulted in a number of diver deaths when buddies did not know how to drop weights, support a diver at the surface, or even stay in contact with

their buddy. This is another area frequently talked about, but all too often not actually put into practice. The concept of always diving with a buddy and just what that means in the "real world" is often given too little attention. Unfortunately, it is impossible to foresee every conceivable situation that can arise, but there are many basic issues that can be covered. The following chapters will hopefully address much of what is being overlooked or delayed in many

programs as they exist today. It is my hope that this information also finds its way into the hands of those who have not yet begun the training process. I have included a chapter on how to select an instructor based on the quality of instruction and the content of the course. In some cases, these classes may cost more than the less comprehensive courses also available, but usually they do not. In fact, when you consider the additional skills and education gained from a

more comprehensive course, you will find that you have received much more value for each dollar spent. In addition, you gain priceless benefits in the form of greater confidence, enjoyment, skills, and -- most importantly -- safety. Enjoy and dive safe

Elsewhere are numerous little-visited mountains, forests, game reserves and rock art sites. changes. Important developments include the conversion of Majete Game Reserve to a fenced 'Big Five' reserve with a world class safari camp. A Practical Guide for the New Diver Fodor's Travel This is the first book to span the depth between traditional sport diving editions and the complex medical/commercial texts. It provides a balanced view of the fascinations and hazards of deep diving through extensive factual development of its technical chapters. The Rough Guide to Fiji

Bradt Travel Guides Discusses accommodations, dining, transportation, and historic sights in the Caribbean region, along with information on trip planning, nightlife, and shopping. *Advanced Open Water Diver Manual* Rough Guides UK Both evocative and magical, Zanzibar offers travellers the quintessential Indian Ocean experience; palm fringed coastlines, powder- white sand, and colourful aquatic

life. Passionate about detail, Chris and Susan McIntyre have carried out extensive on-the-ground research in producing this updated edition. There has been significant growth in the number of hotels, lodges and guesthouses on all three main islands since the last edition and, consequently, the accommodation listings have increased significantly: notably in Zanzibar Town (Stone Town), Matemwe, Michamvi Peninsula, and Mafia island. They visited all the accommodation

listed. With almost 300 properties featured, many are newly built and the vast majority (spanning all budget levels) do not feature in any other guide on the market. Each entry has a detailed description with a strong emphasis on guiding readers to the most ethical options. Zanzibar goes into far greater depth than its competitors on the natural environment, history, culture, and sights. Few other guide books cover the islands of Pemba and Mafia in any detail and yet they are

easily combined in a trip. With a focus on the environment, visitors are directed towards fair-trade shopping opportunities and sustainable marine parks. This new edition also includes a dedicated section on southern Tanzanian safaris, making this guide excellent for readers looking for a bush and beach combination. Advice is given on how to be sensitive to the local Muslim culture. Bradt's guide is the most frequently and scrupulously updated

guide available, vital for a destination with tourism growing and changing so rapidly.

Sri Lanka Bradt Travel Guides
Building on his first book, "SCUBA: A Practical Guide

for the New Diver", James Lapenta addresses what is most often the next step in diver training. Advanced Level or Advanced Open Water training is often taken by divers to gain additional skills and knowledge. It is also taken to allow them to gain access to more challenging dives and dive sites. These also pose a greater degree of risk to the individual. Unfortunately some advanced classes are no more than a "taste" or "tour" of advanced level dives. The divers do not

get the new knowledge and skills required to safely embark on these dives. In order to safely pursue these dives James has outlined the steps to take to reduce the risk of injury and worse. From describing the dives to offering advice on the content one should expect, as well as selecting an instructor, he offers new and not so new divers guidance. Additional sections on equipment options, air supply management, dive planning, and dive selection for maximum

learning potential are looked at. Also included is a section on a subject often overlooked in recreational SCUBA diving - the after-effects of a diving accident and rescue/recovery on the rescuer and witnesses to the event. Post Traumatic Stress in Recreational Dive Rescues is a real possibility and one that must be looked at when executing dives with greater risk. Safety in training and after training is the heart of this work and the driving force behind its publication.

James has experienced the best in training and that which left something to be desired. He gives examples of both throughout the work. If you do not have his first book, it is highly recommended that you also acquire it as a companion to this one. While they do contain some sections of the same information, there are sections in the first book that are not included in this that are highly beneficial.
