A Manual for Writers of Dissertations Longman Publishing Group Provides guidelines and examples for handling research, outlining, spelling, punctuation, formatting, and documentation. *The Pleasures of Reading in an Age of Distraction* Boynton/Cook The first modern work to give a comprehensive picture of the RMS Titanic and the people intertwined with her fate, from disaster to recovery. Drawn from primary sources and contemporary accounts and updated to coincide with the April 2012 anniversary, this new heart-rending narrative allows readers to come to their own conclusions about this legendary vessel. Daniel Allen Butler spend more than 30 years researching the work, delving into the lives of every principal participant. In addition to examining the roles played by individual, he also looks into the problems of equipment and errors in technical data that resulted in the deaths of 1502 people. Rather than focussing on the night of the tragedy alone, he also investigates the events leading up to and following the fateful night.

Michael Pollan, the bestselling author of *The Omnivore's Dilemma*, *Food Rules*, and *How to Change Your Mind*, explores the previously uncharted territory of his own kitchen in *Cooked*. "Having described what's wrong with American food in his best-selling *The Omnivore's Dilemma* (2006), *New York Times* contributor Pollan delivers a more optimistic but equally fascinating account of how to do it right. . . . A delightful chronicle of the education of a cook who steps back frequently to extol the scientific and philosophical basis of this deeply satisfying human activity." —Kirkus (starred review) *Cooked* is now a Netflix

docuseries based on the book that focuses on the four kinds of "transformations" that occur in cooking. Directed by Oscar-winning filmmaker Alex Gibney and starring Michael Pollan, *Cooked* teases out the links between science, culture and the flavors we love. In *Cooked*, Pollan discovers the enduring power of the four classical elements—fire, water, air, and earth—to transform the stuff of nature into delicious things to eat and drink. Apprenticing himself to a succession of culinary masters, Pollan learns how to grill with fire, cook with liquid, bake bread, and ferment everything from cheese to beer. Each section of *Cooked* tracks Pollan's effort to master a single classic recipe using one of the four elements. A North Carolina barbecue pit master tutors him in the primal magic of fire; a Chez Panisse-trained cook schools him in the art of braising; a celebrated baker teaches him how air transforms grain and water into a fragrant loaf of bread; and finally, several mad-genius "fermentos" (a tribe that includes brewers, cheese makers, and all kinds of picklers) reveal how fungi and bacteria can perform the most amazing alchemies of all. The reader learns alongside Pollan, but the lessons move beyond the practical to become an investigation of how cooking involves us in a web of social and ecological relationships. Cooking, above all, connects us. The effects of not cooking are similarly far reaching. Relying upon corporations to process our food means we consume large quantities of fat, sugar, and salt; disrupt an essential link to the natural world; and weaken our relationships with family and friends. In fact, *Cooked* argues, taking back control of cooking may be the single most important step anyone can take to help make the American food system healthier and more sustainable. Reclaiming cooking as an act of enjoyment and self-reliance, learning to perform the magic of these everyday transformations, opens the door to a more nourishing life.

As new media mature, the changes they bring to writing in college are many and suggest implications not only for the tools of writing, but also for the contexts, personae, and conventions of writing. An especially visible change has been the increase of visual elements—from typographic flexibility to the easy use and manipulation of color and images. Another would be in the scenes of writing—web sites, presentation "slides," email, online conferencing and coursework, even help files, all reflect non-traditional venues that new media have brought to writing. By one logic, we must reconsider traditional views even of what counts as writing; a database, for example, could be a new form of written work. The authors of *Writing New Media* bring these ideas and the changes they imply for writing instruction to the audience of rhetoric/composition scholars. Their aim is to expand the college writing teacher's understanding of new media and to help teachers prepare students to write effectively with new media beyond the classroom. Each chapter in the volume includes a lengthy discussion of rhetorical and technological background, and then follows with classroom-tested assignments from the authors' own teaching.

In their only fully collaborative literary work, Michael Dorris and Louise Erdrich have written a gripping novel of history, suspense, recovery, and new beginnings. *The Crown of Columbus* chronicles the adventures of a pair of mismatched lovers--Vivian Twostar, a divorced, pregnant anthropologist, and Roger Williams, a consummate academic, epic poet, and bewildered father of Vivian's baby--on their quest for the truth about Christopher Columbus and themselves. When Vivian uncovers what is presumed to be the most diary of Christopher Columbus, she and Roger are drawn into a journey from icy New Hampshire to the idyllic Caribbean in search of "the greatest treasure of Europe." Lured by the wild promise of redeeming the past, they are plunged into a harrowing race against time and death that threatens--and finally changes--their lives. A rollicking tale of adventure, *The Crown of Columbus* is also contemporary love story and a tender examination of parenthood and passion.

Essays for Leicester Bradner Cengage Learning

The death of the book has been duly announced, and with it the end of brick-and-mortar libraries, traditional publishers, linear narrative, authorship, and disciplinarity, along with the emergence of a more equitable discursive order. These essays suggest that it won't be that simple. While the contributors to this volume are enthusiastic about the possibilities created by digital technologies, they also see the new media raising serious critical issues that force us to reexamine basic notions about rhetoric, reading, and the nature of discourse itself.

Mexico has a rich literary heritage that extends back over centuries to the Aztec and Mayan civilizations. This major reference work surveys more than five hundred years of Mexican literature from a sociocultural perspective. More than merely a catalog of names and titles, it examines in detail the literary phenomena that constitute Mexico's most significant and original contributions to literature. Recognizing that no one scholar can authoritatively cover so much territory, David William Foster has assembled a group of specialists, some of them younger scholars who write from emerging trends in Latin American and Mexican literary scholarship. The topics they discuss include pre-Columbian indigenous writing (Joanna O'Connell), Colonial literature (Lee H. Dowling), Romanticism (Margarita Vargas), nineteenth-century prose fiction (Mario Martín Flores), Modernism (Bart L. Lewis), major twentieth-century genres (narrative, Lanin A. Gyurko; poetry, Adriana García; theater, Kirsten F. Nigro), the essay (Martin S. Stabb), literary criticism (Daniel Altamiranda), and literary journals (Luis Peña). Each essay offers detailed analysis of significant issues and major texts and includes an annotated bibliography of important critical sources and reference works.

Suggestions to Medical Authors and A.M.A. Style Book Univ of California Press

In recent years, cultural commentators have sounded the alarm about the dire state of reading in America. Americans are not reading enough, they say, or reading the right books, in the right way. In this book, Alan Jacobs argues that, contrary to the doomsayers, reading is alive and well in America. There are millions of devoted readers supporting hundreds of enormous bookstores and online booksellers. Oprah's Book Club is hugely influential, and a recent NEA survey reveals an actual uptick in the reading of literary fiction. Jacobs's interactions with his students and the readers of his own books, however, suggest that many readers lack confidence; they wonder whether they are reading well, with proper focus and attentiveness, with due

discretion and discernment. Many have absorbed the puritanical message that reading is, first and foremost, good for you--the intellectual equivalent of eating your Brussels sprouts. For such people, indeed for all readers, Jacobs offers some simple, powerful, and much needed advice: read at whim, read what gives you delight, and do so without shame, whether it be Stephen King or the King James Version of the Bible. In contrast to the more methodical approach of Mortimer Adler's classic *How to Read a Book* (1940), Jacobs offers an insightful, accessible, and

playfully irreverent guide for aspiring readers. Each chapter focuses on one aspect of approaching literary fiction, poetry, or nonfiction, and the book explores everything from the invention of silent reading, reading responsively, rereading, and reading on electronic devices. Invitingly written, with equal measures of wit and erudition, *The Pleasures of Reading in an Age of Distraction* will appeal to all readers, whether they be novices looking for direction or old hands seeking to recapture the pleasures of reading they first experienced as children.
