Narrative of the Life of Frederick Douglass First published in 1845, Narrative of the Life of Frederick Douglass is an eye-opening depiction of American slavery. Part autobiography, part human-rights treatise, it describes the everyday horrors inflicted on captive laborers, as well as the strength and courage needed to survive. Narrative of the Life of Frederick Douglass Born into slavery on a Maryland plantation in 1818, Frederick Douglass spent years secretly teaching himself to read and write—a crime for which he risked life and limb. After two failed escapes, Douglass finally, blessedly boarded a train in 1838 that would eventually lead him to New York City and freedom. Narrative of the Life of Frederick Douglass Few books have done more to change America’s notion of African Americans than this seminal work. Beyond its historical and social relevancy, it is admired today for its gripping stories, the intensity of spirit, and heartfelt humanity. Narrative of the Life of Frederick Douglass This ebook has been professionally proofread to ensure accuracy and readability on all devices. Narrative of the Life of Frederick Douglass Born into a life of bondage, Frederick Douglass secretly taught himself to read and write. It was a crime punishable by death, but it resulted in one of the most eloquent indictments of slavery ever recorded. His gripping narrative takes us into the fields, cabins, and manors of pre-Civil War plantations in the South and reveals the daily terrors he suffered. Narrative of the Life of Frederick Douglass Written more than a century and a half ago by a Black man who went on to become a famous orator, U.S.

minister to Haiti, and leader of his people, this timeless classic still speaks directly to our age. It is a record of savagery and inhumanity that goes far to explain why America still suffers from the great injustices of the past. *Narrative of the Life of Frederick Douglass*

Narrative Inquiry provides both a new theoretical orientation and a set of practical techniques that students and experienced researchers can use to conduct narrative research. Explaining the principles of what she terms “dynamic narrating,” author Colette Daiute provides an approach to narrative inquiry that builds on practices of daily life where we use storytelling to connect with other people, deal with social structures, make sense of surrounding events, and craft our own way of fitting in with various contexts. Throughout the book, Daiute illustrates and applies narrative inquiry with a wide variety of examples, practical activities, charts, suggestions for interpreting analyses, and tips on writing up results. *Narrative Inquiry* integrates cultural-historical activity, discourse theories (including critical discourse theory and conversation analysis), and interdisciplinary research on narrative as applied to a range of research projects in different cultural settings.

Books for Young People Carson-Dellosa Publishing

Human beings rely equally on narrative (or storytelling) and

metaphor (or analogy) for making sense of the world. *Narrative and Metaphor in Education* integrates the two perspectives of narrative and metaphor in educational theory and practice at every level from pre-school to lifelong civic education. Bringing together outstanding educational researchers, the book interweaves for the first time the rich strand of current research about how narrative may be used productively in education with more fragmentary research on the role of metaphor in education and invites readers to ‘look both ways.’ The book consists of research by 40 academics from many countries and disciplines, describing and analysing the intricate connections between narrative and metaphor as they manifest themselves in many fields of education, including: concepts of education, teacher identity and reflective practice, teaching across cultures, teaching science and history, using digital and visual media in teaching, fostering reconciliation in a postcolonial context, special needs education, civic and social education and educational policy-making. It is unique in combining study of the narrative perspective and the metaphor perspective, and in exploring such a comprehensive range of topics in education. *Narrative and Metaphor in Education* will be of great interest to academics and researchers in the fields of education and educational policy, as well as teacher educators, practising and future teachers. It will also appeal to psychologists, sociologists, applied linguists and communications specialists.

Drama for Life Mark Twain Media

In recent years, narrative skills have been receiving increasing attention from researchers for their relevance in the development of language, literacy and socio-cognitive abilities. This volume brings together studies focusing on two key issues in the development of children's narrative skills. The first part of the Volume addresses the issue of the interrelatedness between narrative skills and literacy, language and socio-cognitive development, as well as of the impact of narrative practices on the promotion of these different skills. The second part of the Volume addresses the issue of how early interactional experiences, particular contextual settings and specific intervention procedures, can help children promote their narrative skills. The studies span a wide age range, from toddlers to late elementary school children, concern different languages (Dutch, English, French, German, Hebrew and Italian), and consider narrative skills and practices from a rich variety of theoretical and methodological approaches.

A Journal for Readers, Students and Teachers of History

Emerald Group Publishing

This book culminates five years of extensive field-based inquiry with teachers and principals in four reforming school contexts. It arises from living alongside teachers and principals, entering into their realities, engaging them in conversations, seeing school life through their eyes, and employing the words and images they use to wrap around their experiences. It involved thinking narratively about schools as sites of high drama within which

teachers and principals negotiate meaning as knowledgeable and knowing human beings. It gave primacy to everyday events taking shape on school landscapes. It meant creating spaces and devoting enormous amounts of time to observing and listening hard to what teachers and principals say and do when reform initiatives become personally lived in context--from their points of view.
