The aim of this book is to explain in clear terms some of the main methodological approaches in legal research. This is an edited collection, with each chapter written by specialists in their field, researching in a variety of jurisdictions. Each contributor addresses the topic of "lay decision makers in the legal system" from one particular methodological perspective, explaining how they would approach the issue and discussing why their particular method might, or might not, be suited to this topic. In asking all contributors to focus on the same topic, the editors have sought to provide a common link throughout the text, thereby providing the reader with an opportunity

to draw comparisons between methods with relative ease. In light of the broad geographical range of its contributors, the book is aimed at an international readership. This book will be of particular interest to PhD students in law, but it will also be of use to undergraduate dissertation students in law, LL.M Research students as well as prospective PhD students and early year researchers. Transnational commercial law represents the outcome of work undertaken to harmonize national laws affecting domestic and cross-border transactions and is upheld by a diverse spectrum of instruments. Now in its second edition, this authoritative work brings together the major instruments in this field, dividing them into thirteen groups: Treaty Law, Contracts, Electronic Commerce, International Sales, Agency and

Distribution, International Credit Transfers and Bank Payment Undertakings, International Secured Transactions, Cross-Border Insolvency, Securities Custody, Clearing and Settlement and Securities Collateral, Conflict of Laws, Civil Procedure, Commercial Arbitration, and a new section on Carriage of Goods. Each group of instruments is preceded by linking text which provides important context by identifying the key instruments in each group, discussing their purposes and relationships, and explaining the major provisions of each instrument, thus setting them in their commercial context. This volume is unique in providing the full text of international conventions, including the preamble - which is important for interpretation - and the final clauses and any annexes. In addition, each instrument is accompanied by a complete list of dates of signature and ratification by all contracting states, all easily navigated through the detailed tables of contents which precedes it. Reforming Bribery OUP Oxford

In the 2010 green paper, *Breaking the cycle* (Cm. 7972, ISBN 9780101797221), the Government set out plans for overhauling the way sentences served in the community are used, to increase the public's confidence in them and to tackle the continuing problem of reoffending.

This consultation explores in more detail how that can be achieved and sets out proposals for radical reforms to the way in which sentences served in the community operate. Victims and society have a right to expect that wrongdoing results in punishment, and that they will be protected from further reoffending. Ultimately the goal must be to reduce crime and see fewer victims. Community orders need to be demanding and rigorously enforced so that they are as punitive and effective as a custodial sentence. The Government is clear that short prison sentences have their place, and this consultation does not seek to replace them with community sentences. But where an offender is on the cusp of custody, sentencers should have a genuine choice. Views are sought here on how that can be done through a tough package of requirements. A Consultation on effective probation services is publishing simultaneously (Cm. 8333, ISBN 9780101833325)

 The 7th Edition of the CIPA Guide is a fully

updated version of this established work, acknowledged since 1980 as a must-have for any practitioner advising on patents. Its purpose has remained unchanged since first publication: "The broad aim has been to provide a manual for reference, if not daily, at least whenever any doubt arises on the provisions of the Act or Rules and above all on the practice under them". Since publication of the 6th Ed in 2009 the flow of significant new material has been relentless, including revisions to the Patents Rules, the Civil Procedure Rules and EU Regulations and landmark decisions of the UK Courts, the EPO Appeal Boards and (of increasing significance to UK and European practitioners) the US courts. A new edition was considered of more use to practitioners than a second supplement since these changes could be evaluated fully and incorporated into the main text. Compiled by a team of 34 professionals including patent attorneys, solicitors and members of the Bar individually selected for knowledge of and insight into the subjects to which they contribute, this essential guide gives you all the tools you need to protect the rights of your clients. * Features a unique

section-by-section guide to the Patents Act, 1977 and relevant provisions of the Copyright, Designs and Patents Act, 1988 * Includes the complete text of each section and of any relevant Patents Rules, Civil Procedure Rules and practice directions * Provides extensive commentary on the interpretation of each section by the UK-IPO and courts and on relevant case law of the EPO Appeal Boards * Refers to over 3300 decisions of the UK IP Office and courts and of the EPO Appeal Boards * Includes in-depth of analysis of both reported and significant unreported decisions * Acts as a practical guide to the current requirements of and procedures before the UK-IPO and the UK courts * A trusted and authoritative text with an easy to follow layout making your research quicker and easier * The first port of call for both patent prosecutors and litigators needing access to current law and practice "I shall continue to keep the book within easy reach. So should anyone else concerned with European or British patents." The Right Hon. Professor Sir Robin Jacob "The legal scholarship found in this book has an important role to play." The Hon. Randall Rader, Chief Judge, U.S.
