 This book is
 dedicated to
 Aristid
 Lindenmayer
 on the
 occasion of his
 60th birthday
 on November
 17, 1985.
 Contributions
 range from
 mathematics
 and
 theoretical
 computer
 science to
 biology.
 Aristid
 Lindenmayer
 introduced
 language-

theoretic
 models for
 developmenta
 l biology in
 1968. Since
 then the
 models have
 been cus
 tomarily
 referred to as
 L systems.
 Lindenmayer's
 invention
 turned out to
 be one of the
 most beautiful
 examples of
 interdisciplinar
 y science:
 work in one
 area
 (development
 al biology)
 induces most
 fruitful ideas
 in other areas
 (theory of
 formal
 languages and
 automata, and
 formal power
 series). As

evident from
 the articles
 and
 references in
 this book, the
 in terest in L
 systems is
 continuously
 growing. For
 newcomers
 the first
 contact with L
 systems
 usually
 happens via
 the most basic
 class of L
 systems,
 namely, DOL
 systems. Here
 "0" stands for
 zero context
 between
 developing
 cells. It has
 been a major
 typographical
 problem that
 printers are
 unable to
 distinguish
 between 0

(zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who

could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

 When one
 thinks of the
 Mille Miglia,
 the most
 celebrated
 race in the
 world that
 took place
 between 1927
 and 1957, the
 mind certainly
 goes back to
 OM, Bugatti,
 Mercedes-
 Benz, Porsche,
 Lancia as well,
 of course, as
 the ultra-
 victorious Alfa
 Romeo and

Ferrari, the greatest car manufacturers that have competed in the Italian marathon. But the memorable history of the great race is made up mainly of men: drivers, co-drivers, mechanics, technical and sports directors, organisers as well as film and show business personalities plus, naturally, an immense public following. All of those faces have names, some well-

known others less so, and stories, some well worth telling others less so. The book brings together a series of portraits in alphabetical order that make up the fragments of this historic sports and cultural mosaic that was the Mille Miglia, once again told by Leonardo Acerbi from his deep knowledge of the Brescia-based race. outskirts of Milan, a new company was established in the still young world of motoring of the period: Alfa Romeo. A name which, in those 100 years, has become synonymous with cars, so important has its presence been both on the industrial and sports fronts as well as culturally. In this long period of time, the celebrated Italian marque brought to life cars that have entered by right into the history of the automobile

and not only that of Italy, like the 1900, the Giulietta and the Giulia. Yet at the same time the company was able to write its own unrepeatable pages in the annals of motor sport, winning all the most important races: from the Mille Miglia to Le Mans, from the Tourist Trophy to the World Sports Car Championship. An epic about which just almost everything has been written; but

this volume by a great authority on the subject in Maurizio Tabucchi aims to be a tribute to this tremendous story, told above all by pictures, many of them previously unpublished, and supported by brief but exhaustive texts. *Pininfarina* Haynes Manuals N. Having left motor racing in the early 1950s - at least officially - Alfa Romeo returned to the sport once again at the start of the following decade due to the commitment and enthusiasm of Autodelta.

This Alfa offshoot distinguished itself by

preparing and racing about 30 of the manufacturer's different cars that really did make history. Among them, the Giulia TZ holds a place at the head of the crowd. It had a 1.5-litre, 113 hp engine from the Giulia SS, front and rear suspension of modern conception, disc brakes and an especially bold body shaped by Zagato on a modern tubular chassis. Those were the strong points

of this car, which scored results of absolute prestige in its brief career at Sebring, in the Targa Florio, the 24 Hours of Le Mans and the Tour de France. Vito Witting da Prato, already the author of a meticulously written book on the Alfa Romeo SZ, covers the

winning, human, technical and sporting factors of this unforgettable car in a monumental work. A book which, to the precise text and painstaking historical reconstruction, has been added illustrations of previously unpublished pictures and

technical designs by Autodelta. *Souls Belated* Dutton Adult Products with integrity perform superbly, provide good value, and satisfy customer's expectations in every respect, including such intangibles as their look and feel.
