What is a human being? What does it mean to be human? How can you lead your life in ways that best fulfil your own nature? In *The Human Paradox*, Ralph Heintzman explores these vital questions and offers an exciting new vision of the nature of the human. *The Human Paradox* aims to counter or correct several contemporary assumptions about the nature of the human, especially the tendency of Western culture, since the seventeenth century, to identify the human with rationality and the rational mind. Using the lens of the virtues, *The Human Paradox* shows how rediscovering the nature of the human can help not just to understand one's own paradoxical nature but to act in ways that are more consistent with its full reality. Offering accessible insight from both traditional and contemporary thought, *The Human Paradox* shows how a fuller, richer vision of the human can help address urgent contemporary problems, including the challenges of cultural and religious diversity, human

migration and human rights, the role of the market, artificial intelligence, the future of democracy, and global climate change. This fresh perspective on the Western past will guide readers into what it means to be human and open new possibilities for the future.

A powerful portrait of the greatest humanitarian emergency of our time, from the director of *Human Flow* In the course of making *Human Flow*, his epic feature documentary about the global refugee crisis, the artist Ai Weiwei and his collaborators interviewed more than 600 refugees and aid workers in twenty-three countries around the world. A

handful of those interviews were included in the film. This book presents one hundred of these conversations in their entirety, providing compelling first-person stories of the lives of refugees. Speaking in their own words, refugees give voice to their experiences of migrating across borders, living in refugee camps for months or years, and struggling to rebuild their lives in unfamiliar and uncertain surroundings. They talk about the dire circumstances that drove them to migrate, whether war, famine, or persecution; the hardships they face; and their hopes and fears for the future. In the words of Atiq, an Afghan in his early twenties staying at a refugee camp in Greece, "Nobody in the world wants to leave his country. But there's no way for people to live in that place." Complete with photographs taken by Ai Weiwei while filming *Human Flow*, this book provides a powerful and moving account of the most urgent humanitarian crisis of our time.

Profound analysis of French comics through a postcolonial lens Postcolonialism and migration are major themes in contemporary French comics and have roots in the Algerian War (1954–62), antiracist struggle, and mass migration to France. This volume studies comics from the end of the formal dismantling of French colonial empire in 1962 up to the present. French cartoonists of ethnic-minority and immigrant heritage are a major focus, including Zeina Abirached (Lebanon), Yvan Alagbé (Benin), Baru (Italy), Enki Bilal (former Yugoslavia), Farid Boudjellal (Algeria and Armenia), José Jover (Spain), Larbi Mechkour (Algeria), and Roland Monpierre (Guadeloupe). The author analyzes comics representing a gamut of

perspectives on immigration and postcolonial ethnic minorities, ranging from staunch defense to violent rejection. Individual chapters are dedicated to specific artists, artistic collectives, comics, or themes, including avant-gardism, undocumented migrants in comics, and racism in far-right comics. Applications Seven Stories Press The brilliant, controversial, bestselling critique of American culture that "hits with the approximate force and effect of electroshock therapy" (The New York Times)—now featuring a new afterword by Andrew Ferguson in a twenty-fifth anniversary edition. In 1987, eminent political philosopher Allan Bloom published The Closing of the American Mind, an appraisal of contemporary America that "hits with the approximate force and effect of electroshock therapy" (The New York Times) and has not only been vindicated, but has also become more urgent today. In clear, spirited prose, Bloom argues that the social and political crises of contemporary America are part of a larger intellectual crisis: the result of a dangerous narrowing of curiosity and exploration by the university elites. Now, in this twenty-fifth

anniversary edition, acclaimed author and journalist Andrew Ferguson contributes a new essay that describes why Bloom's argument caused such a furor at publication and why our culture so deeply resists its truths today.
