General Nursing - Medical and Surgical Textbook Prentice Hall Named a 2013 Doody's Essential Purchase! "This book should be required reading for all educators! It is necessary for educators to keep pace with the changing dynamics of learners and this book provides insights into how to achieve this goal."--Doody's Medical Reviews Praise for the Third Edition: "Without question, this book should be on every nurse educator's bookshelf."--Nursing Education Perspectives The "gold standard" for evaluation and testing in nursing education, this revision helps educators measure and evaluate the level of learning that their students have achieved and presents fundamental concepts of what constitutes reliable tools and rubrics for measuring students' classroom and clinical performance. It describes how to develop a test blueprint and to assemble, administer, write, and score all types of tests and test questions, and analyze tests and test performance for both classroom and clinical evaluation. It includes guidelines for preventing cheating, and for conducting productive posttest discussions. The book offers strategies for evaluating higher cognitive levels of learning and for evaluating written assignments with sample scoring rubrics. The book explores important social, ethical, and legal issues associated with testing and evaluation. The text meets NLN Certification Competency #3: Use Assessment & Evaluation Strategies (15% of CNE Test Blueprint). New to the Fourth edition: Expanded coverage of essential concepts in assessment, evaluation, and testing in nursing classroom and clinical education A new chapter

on online testing, with and without an online teaching platform such as BlackBoard, standardized online testing packages, establishing valid online-based testing, and related issues Current research, references, and new examples Stronger focus on evaluating higher level cognitive functions Additional test preparation for NCLEX and other certification tests Development of test items that prepare students for licensure and certification exams, including discussion of innovative items being piloted for possible use on the NCLEX Expanded coverage on establishing rubrics for assessing written assignments New information on using simulation for "High Stakes Testing" Online teaching guide that includes PowerPoint slides, sample core syllabus, and learner activities

Palliative Care Nursing, Fourth Edition Juta and Company Ltd How do you perceive your cultural identity? All of us are shaped by the cultures we interact with and the cultural backgrounds and ethnicities that are part of our heritage. Take a dynamic approach to the study of culture and health care relationships. Dr. Marilyn A. Ray shows us how cultures influence one another through inter-cultural relationships, technology, globalization, and mass communication, and how these influences directly shape our cultural identities in today's world. She integrates theory, practice, and evidence of transcultural caring to show you how to apply transcultural awareness to your clinical decision making. Go beyond common stereotypes using a framework that can positively impact the nurse-patient relationship and the decision-making process. You'll learn how to deliver culturally competent care through the selection and application of transcultural assessment, planning and negotiation tools for interventions. *Theory, Practice, and Research* Pearson South Africa

Kozier and Erb's Fundamentals of Nursing prepares students for practice in a range of diverse clinical settings and help them understand what it means to be a competent professional nurse in the twenty-first century. This third Australian edition has once again undergone a rigorous review and writing process. Contemporary changes in the regulation of nursing are reflected in the chapters and the third edition continues to focus on the three core philosophies: Person-centred care, critical thinking and clinical reasoning and cultural safety. Students will develop the knowledge, critical thinking and clinical reasoning skills to deliver care for their patients in ways that signify respect, acceptance, empathy, connectedness, cultural sensitivity and genuine concern.

At a Glance sections highlight or summarize essential information for stronger recall and retention. Just the Facts entries distill critical details for faster, more efficient review. Mind Jogger critical thinking questions promote deeper understanding. At-A-Glance Senior Focus helps you confidently prepare for the care of older adults or elderly clients. Updated terminology helps you ensure the most effective clinical communication.

Transcultural Caring Dynamics in Nursing and Health Care
Pearson Higher Education AU

Three-time recipient of the AJN Book of the Year Award! Praise for the third edition: "This is an outstanding edition of this book. It has great relevance for learning about, developing, and using middle range theories. It is very user friendly, yet scholarly." Score: 90, 4 Stars -Doody's Medical Reviews The fourth edition of this invaluable publication on middle range theory in nursing reflects the most current theoretical advances in the field. With two additional chapters, new content incorporates exemplars that bridge middle range theory to advanced nursing practice and research. Additional content for DNP and PhD programs includes two new theories: Bureaucratic Caring and Self-Care of Chronic Illness. This user-friendly text stresses how theory informs practice and research in the everyday world of nursing. Divided into four sections, content sets the stage for understanding middle range theory by elaborating on disciplinary perspectives, an organizing framework, and evaluation of the theory. Middle Range Theory for Nursing, Fourth Edition presents a broad spectrum of 13 middle range theories. Each theory is broken down into its purpose, development, and conceptual underpinnings, and includes a model demonstrating the relationships among the concepts, and the use of the theory in research and practice. In addition, concept building for research through the lens of middle range theory is presented as a rigorous 10-phase process that moves from a practice story to a conceptual foundation. Exemplars are presented clarifying both the concept building process and the use of conceptual structures in research design. This new edition remains an essential text for advanced practice, theory, and research courses. New to the

Fourth Edition: Reflects new theoretical advances Two completely new chapters New content for DNP and PhD programs Two new theories: Bureaucratic Caring and Self-Care of Chronic Illness Two articles from Advances in Nursing Science documenting a historical meta-perspective on middle range theory development Key Features: Provides a strong contextual foundation for understanding middle range theory Introduces the Ladder of Abstraction to clarify the range of nursing's theoretical foundation Presents 13 middle range theories with philosophical, conceptual, and empirical dimensions of each theory Includes Appendix summarizing middle range theories from 1988 to 2016

Developing Online Courses in Nursing Education, Fourth Edition SAGE

Covering the issues, themes and principles that explain what it means to be a nurse today, this book provides the theory students need to know and applies it to the diverse patient groups and settings that students will encounter on their placements. Key features of the book are: · Introduces the core aspects of adult nursing · An evidence-based approach with discussion of literature, policy and research and suggested further reading for every chapter · Over 30 case studies to help students understand the realities of practice across a range of settings including primary care and the community · Stop and think boxes which challenge assumptions and encourage reflection · A companion website with sample questions for lecturers to use in seminars, multiple choice questions for student revision and free SAGE journal articles The book has been closely developed in line with the NMC Standards and Essential Skills Clusters and supports students across their entire degree programme as they develop into nurses of the future ready to deliver and lead care.

Concepts, Connections & Skills CRC Press

Completely updated to include the latest developments in the field of Nursing Science, this second edition covers the topics required for both Fundamental and General Nursing Science; this makes it suitable for the categories of Nursing Auxiliary, Staff Nurse and for the fundamentals of nursing for Professional Nurses. The manual has a strong community-based focus. It introduces the nurse to the fundamentals of nursing and is extremely practical, encouraging problem solving both in the clinic and in the community. Each chapter has tutorial-type questions to stimulate discussion and personal research. Key

Features: This updated edition includes a chapter on the important topic of Informatics; The text is outcomes-based so that students understand the focus of each chapter; Numerous line drawings expand on difficult concepts; It covers the new curriculum; therefore lecturers can be assured the book will meet their needs; Summaries of key ethical and legal considerations in each chapter highlight these important aspects; The content encourages the development of problem-solving skills so that the nurse can deal with problems as they arise in the community/clinic environment; Self-assessment and discussion topics throughout the text test what has been learnt.

Developing Online Courses in Nursing Education Springer Publishing Company

GERONTOLOGICAL NURSING, 3/e is a comprehensive, research-based, and up-to-date guide to nursing care for older adults in all settings. It brings together essential information about normal and pathological changes associated with aging; healthy aging; common diseases of aging; and key psychosocial, cultural, and public health issues. Reflecting today's emphasis on evidence-based practice and appropriate delivery of scarce healthcare resources, this text presents new best practices and QSEN standards throughout, promoting more effective assessment, diagnosis, planning, and outcome evaluation. The text's multidisciplinary approaches help nurses "add life to years," not just extend life. Its coverage of acute and chronic diseases includes nursing implications, atypical presentation, functional implications, pharmacology, evaluation, etiology, risk factors, and complications; the text also includes a full chapter on multisystem diseases. This book supports safe, effective, and appropriate practice in the home, hospitals, long-term care, and hospice settings.

Foundations of Adult Nursing Springer Publishing Company
Preparing students for successful NCLEX results and strong futures as nurses in today's world. Ethics in Health Care Springer

Take a fresh, new approach to nursing fundamentals that teaches students how to think, learn, and do while they make the 'connections' each step of the way.

Health & Physical Assessment in Nursing [With Access Code] Springer Publishing Company

Dealing primarily with nursing in South Africa and the particular challenges that the country's nurses encounter, this book looks at the ethical questions confronting nurses as well as the moral philosophy behind those considerations. Ubuntu—the African notion that everyone in a community is responsible for the welfare of its members—plays a large part in the moral deliberations of the book, as do problems particular to South Africa. This second edition is updated with new case studies on the AIDS pandemic as well as new ethical questions stemming from the legalization of abortion in South Africa and the rise in the power of health worker unions.

Gerontological Nursing Elsevier Health Sciences

Comprehensive and easy to read, this authoritative resource features the most up-to-date, research-based blend of practice and theory related to the issues that impact nursing management and leadership today. Key topics include the nursing professional's role in law and ethics, staffing and scheduling, delegation, cultural considerations, care management, human resources, outcomes management, safe work environments, preventing employee injury, and time and stress management. Research Notes in each chapter summarize relevant nursing leadership and management studies and show how research findings can be applied in practice. Leadership and Management Behavior boxes in each chapter highlight the performance and conduct expected of nurse leaders, managers, and executives.

Leading and Managing Defined boxes in each chapter list key terminology related to leadership and management, and their definitions. Case Studies at the end of each chapter present real-world leadership and management situations and illustrate how key chapter concepts can be applied to actual practice. Critical Thinking Questions at the end of each chapter present clinical situations followed by critical thinking questions that allow you to reflect on chapter content, critically analyze the information, and apply it to the situation. A new Patient Acuity chapter uses evidence-based tools to discuss how patient acuity measurement can be done in ways that are specific to nursing. A reader-friendly format breaks key content into easy-to-scan bulleted lists. Chapters are divided according to the AONE competencies for nurse leaders, managers, and executives. Practical Tips boxes highlight useful strategies for applying leadership and management skills to practice.

Organizational Behavior in Health Care F.A. Davis

Evaluation and Testing in Nursing Education Juta and Company Ltd

Prepared under the auspices of the International Council of Nurses (ICN), this first volume provides a comprehensive overview of the rapidly emerging field of advanced nursing practice. It addresses central issues in the role and practice development that are fundamental to defining and differentiating the nature of this field. Topics include defining the role, role characteristics, scope of practice, education, regulation and research. Obstacles to and facilitators of that role are addressed and include ethical questions arising in the context of practice development. With an international focus, this volume examines international developments in the field, as reflected in country-specific case studies and examples. It offers a valuable resource for advanced practice nurses, educators and administrators at healthcare institutions.

Clinical Reasoning in the Health Professions Jones & Bartlett Learning
