As cars became more sophisticated, the cost of supporting a team had skyrocketed, making things difficult for team owners. In an effort to increase purses paid by racing promoters and win lucrative television contracts, a group of owners formed Championship Auto Racing Teams (CART) in

1978. Soon after, CART split from its sanctioning body, the United States Auto Club (USAC). Though Champ Cars ran on numerous tracks, the Indianapolis 500 was the payday that supported most teams through the season. From the beginning, CART had most of the successful teams and popular drivers, and they focused on driving a wedge between the track owners and the USAC. Over the next 30 years, the tension between CART and USAC ebbed and flowed until all parties

realized that reunification was needed for the sake of the sport. This book details the fight over control of Champ Car racing before reunification in 2008.

Celebrating a quarter century of the car that

redefined its genre. [apply edits made above] The Mazda MX-5, (known as Miata in North America and Eunos Roadster in Japan), revolutionized the lightweight two-seater roadster market. By taking the front-engine, rear-wheel-drive layout of traditional British and Italian roadsters and combining it with the modern function and reliability for which Japanese cars were justly famous, Mazda created what many consider the perfect sports car. The MX-5 became the best-

selling sports car of all time, selling over a million units worldwide. Customers proved that they hadn't lost their desire for simple, lightweight two-seat convertibles; they had simply lost their desire for unreliable, archaic European anachronisms that caught on fire as part of their charm. In 2009, English automotive critic Jeremy Clarkson wrote: "The fact is that if you want a sports car, the MX-5 is perfect. Nothing on the road will give you better value. Nothing will

give you so much fun. The only reason I'm giving it five stars is because I can't give it 14. Mazda MX-5 Miata: Twenty-Five Years is a handsomely-illustrated coffee-table book celebrating Mazda's ground-breaking MX-5 Miata, the car that revolutionized the lightweight two-seater roadster market.

The 30th edition of the World Investment Report looks at the prospects for

foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and

examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments

worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.
