MADALYNN KENDRA

Mediated Messages Grand Central Publishing

A groundbreaking guide to forging trusting, mutually beneficial B2B relationships. Companies that have entered into B2B alliances may simultaneously be one and another's customers, suppliers, allies, and competitors. But in today's turbo-charged e-environment, how do companies take full advantage of the many benefits of B2B alliances while avoiding the obvious dangers of allowing potential competitors intimate access to their value chains? In this groundbreaking book Harry DeMaio, Director of Deloitte & Touche's renowned Enterprise Risk Service Practice, answers that question with the revolutionary concept of E-Trust, a proven strategy based on fostering business relationships based on mutual self-interest and trust. Writing for managers and corporate decision-makers, DeMaio explains the current state of B2B in an approachable, entertaining fashion, making difficult concepts easy to grasp. He demonstrates the critical role that trust, privacy, and security issues play in the B2B environment and provides guidance on how companies in various industries engaged in B2B relationships must address their varying security and privacy needs. Harry DeMaio (Cincinnati, OH) is Director of Deloitte & Touche's Enterprise Risk Service Practice.

A Psalm for the Wild-Built Grand Central Publishing

Typical development in the American Southwest often resulted in scraping the desert lands of the ancient living landscape, to be replaced with one that is human-made and dependent on a large consumption of energy and natural resources. This

transdisciplinary book explores the natural and built environment of this desert region and introduces development tools for shaping its future in a more sustainable way. It offers valuable insights to help promote ecological balance between nature and the built environment in the American Southwest and in other ecologically fragile regions around the world.

Beyond Built PublicAffairs

Mediated Messages presents a collection of original writing exploring the role played by the media in the development of postmodern architecture in the 1970s and 80s. The book's twelve chapters and case-studies examine a range of contemporary periodicals and exhibitions to explore their role in the postmodern. This focus on mediation as a key feature of architectural post-modernism, and the recognition that post-modernism grew out of developments in the media, opens up the possibility of an important new account of post-modernism distinct from existing narratives. Accompanied by a contextualizing introduction, the essays are arranged across four thematic sections (covering: images; international postmodernisms; high and low culture; and postmodern architects as theorists) and present a range of case-studies with a genuinely international scope. Altogether, this work makes a substantial contribution to the historical account of architectural postmodernism, and will be of great interest to researchers in postmodernism as well as those examining the role of the media in architectural history.

Corporate Social Responsibility Island Press

"Beyond Mobility" also seeks to rethink how projects are planned and designed in cities and suburbs at multiple geographic scales, from micro-designs such as parklets to corridors and city-regions.

The book closes with a reflection on the opportunities and challenges in moving beyond mobility, with attention to emerging technologies such as self-driving cars and ride-hailing services and social equity topics such as accessibility, livability, and affordability.

Beyond Great MIT Press

Using Technology to Enhance Special Education, Volume 37 of Advances in Special Education, focuses on how general and special educators can use technology to work with children and youth with disabilities.

Beyond the Mountain L'ERMA di BRETSCHNEIDER

A Mexican-American lawyer exposes corruption in the US asylum procedure and despotism in the Mexican government. From a storefront law office in the US border city of El Paso, Texas, one man set out to tear down the great wall of indifference raised between the US and Mexico. Carlos Spector has filed hundreds of political asylum cases on behalf of human rights defenders, journalists, and political dissidents. Though his legal activism has only inched the process forward—98 percent of refugees from Mexico are still denied asylum—his myriad legal cases and the resultant media fallout has increasingly put US immigration policy, the corrupt state of Mexico, and the political basis of immigration, asylum, and deportation decisions on the spot. *We Built the Wall* is an immersive, engrossing look at the new front in the immigration wars. It follows the gripping stories of people like Saúl Reyes, forced to flee his home after a drug cartel murdered several members of his family, and Delmy Calderón, a forty-two-year-old woman leading an eight-woman hunger strike in an El Paso detention center. Truax tracks the heart-wrenching trials of refugees like Yamil, the husband and father who chose a prison

cell over deportation to Mexico, and Rocío Hernández, a nineteen-year-old who spent nearly her entire life in Texas and is now forced to live in a city where narco-traffickers operate with absolute impunity.

Berkshire Beyond Buffett Morgan James Publishing

The secret of achieving and sustaining organizational excellence revealed In an ever-changing world where only a third of excellent organizations stay that way over the long term, and where even fewer are able to implement successful change programs, leaders are in need of big ideas and new tools to thrive. In *Beyond Performance*, McKinsey & Company's Scott Keller and Colin Price give you everything you need to build an organization that can execute in the short run and has the vitality to prosper over the long term. Drawing on the most exhaustive research effort of its kind on organizational effectiveness and change management, Keller and Price put hard science behind their big idea: that the health of an organization is equally as important as its performance. In the book's foreword, management guru Gary Hamel refers to this notion as "a new manifesto for thinking about organizations." The authors illustrate why copying management best practices from other companies is more dangerous than helpful. Clearly explains how to determine the mutually reinforcing combination of management practices that best fits your organization's context. Provides practical tools to achieve superior levels of performance and health through a staged change process: aspire, assess, architect, act, and advance. Among these are new techniques for dealing with those aspects of human behavior that are seemingly irrational (and therefore confound even the smartest leaders), yet entirely predictable. Ultimately, building a healthy organization is an intangible asset that competitors copy at their peril and that enables you to skillfully adapt to and shape your environment faster than others—giving you the ultimate competitive advantage.

Beyond the Barrier Springer Nature

Double your odds of leading successful, sustainable change. Leaders aren't short on access to change management advice, but the jury has long been out as to which approach is the best one to follow. With the publication of *Beyond Performance 2.0*, the verdict is well and truly in. By applying the approach detailed by authors, Scott Keller and Bill Schaninger, the evidence shows that leaders can more than double their odds of success—from

thirty percent to almost eighty. Whereas the first edition of *Beyond Performance* introduced the authors' "Five Frames of Performance and Health" approach to change management, the fully revised and updated *Beyond Performance 2.0* has been transformed into a truly practical "how to" guide for leaders. Every aspect of how to lead change at scale is covered in a step-by-step manner, always accompanied by practical tools and real-life examples. Keller and Schaninger's work is distinguished in many ways, one of which is the rigor behind the recommendations. The underpinning research is the most comprehensive of its kind—based on over 5 million data points drawn from 2,000 companies globally over a 15-year period. This data is overlaid with the authors' combined more than 40 years of experience in helping companies successfully achieve large-scale change. As senior partners in McKinsey & Company, consistently named the world's most prestigious management consulting firm, Keller and Schaninger also draw on the shared experience of their colleagues from offices in over 60 countries with unrivaled access to CEOs and senior teams. *Beyond Performance 2.0* also dares to go against the grain—eschewing the notion of copying best practices and instead guiding leaders to make choices specific to their unique context and organization. It does this with meticulously balance of focus on short- and long-term considerations, and on fully addressing the hard technical and oft cultural elements of making change happen. Further, the approach doesn't just focus on delivering change; it builds an organization's muscle to continuously change, making it healthier so that it can act with increased speed and agility to stay perpetually ahead of its competition. Leaders looking for a proven approach to leading large-scale change from a trusted source have found what they are looking for in *Beyond Performance 2.0*.

Flawless CRC Press

Beyond BIM explores the vast and under-explored design potential undertaken by information modeling. Through a series of investigations grounded in the analysis of built work, interviews with leading practitioners, and speculative projects, the author catalogs the practical advantages and theoretical implications of exploiting BIM as a primary tool for design innovation. Organized by information type, such as geographic data, local code, or materials, each chapter suggests a realm of knowledge that can be harvested and imported into BIM to give meaningful specificity

to architectural form and space. While highly sustainable, the work documented and envisioned in this book moves well beyond 'normalization,' to reveal inventive takes on contemporary practice. *Beyond BIM* serves as a primary resource for professional architects from practice, researchers and designers engaged in information related spatial design processes, as well as students and faculties of architecture schools in search of BIM design inspiration. Likewise, those highly attuned to computation and unconventional ways of creating form and space, particularly built outcomes that utilize BIM, will find this book meaningful and essential.

Build Beyond Zero Springer

Champion bodybuilder Paris follows his *Beyond Built* with this unique program for "accelerated gains" that will give the reader the body he wants in only ten weeks. Included are step-by-step methods to accelerate the bodyshaping process, attain a total image, motivate the mind, customize one's diet, feel great, and keep the results. 150 photos.

Design with the Desert Routledge

"Net Zero" has been an effective rallying cry for the green building movement, signaling a goal of having every building generate at least as much energy as it uses. Enormous strides have been made in improving the performance of every type of new building, and even more importantly, renovating the vast and energy-inefficient collection of existing buildings in every country. If we can get every building to net-zero energy use in the next few decades, it will be a huge success, but it will not be enough. In *Build Beyond Zero*, carbon pioneers Bruce King and Chris Magwood re-envision buildings as one of our most practical and affordable climate solutions instead of leading drivers of climate change. They provide a snapshot of a beginning and map towards a carbon-smart built environment that acts as a CO2 filter. Professional engineers, designers, and developers are invited to imagine the very real potential for our built environment to be a site of net carbon storage, a massive drawdown pool that could help to heal our climate. The authors, with the help of other industry experts, show the importance of examining what components of an efficient building (from windows to solar photovoltaics) are made with, and how the supply chains deliver all those products and materials to a jobsite. *Build Beyond Zero* looks at the good and the bad of how we track carbon (Life Cycle

Assessment), then takes a deep dive into materials (with a focus on steel and concrete) and biological architecture, and wraps up with education, policy and governance, circular economy, and where we go in the next three decades. In *Build Beyond Zero*, King and Magwood show how buildings are culprits but stand poised to act as climate healers. They offer an exciting vision of climate-friendly architecture, along with practical advice for professionals working to address the carbon footprint of our built environment.

Beyond Product Grand Central Pub

Volume Two of *Business and Society 360* focuses on research drawn from work grounded in "corporate social responsibility" and "corporate citizenship."

Regenerative Ecosystems in the Anthropocene Island Press

What does it take to be one of the world's best high-altitude mountain climbers? A lot of fundraising; traveling in some of the world's most dangerous countries; enduring cold bivouacs, searing lungs, and a cloudy mind when you can least afford one. It means learning the hard lessons the mountains teach. Steve House built his reputation on ascents throughout the Alps, Canada, Alaska, the Karakoram and the Himalaya that have expanded possibilities of style, speed, and difficulty. In 2005 Steve and alpinist Vince Anderson pioneered a direct new route on the Rupal Face of 26,600-foot Nanga Parbat, which had never before been climbed in alpine style. It was the third ascent of the face and the achievement earned Steve and Vince the first Piolet d'or (Golden Ice Axe) awarded to North Americans. Steve is an accomplished and spellbinding storyteller in the tradition of Maurice Herzog and Lionel Terray. *Beyond the Mountain* is a gripping read destined to be a mountain classic. And it

Justice of the Peace and County, Borough, Poor Law Union and Parish Law Recorder Edition Donau-Universität Krems

A comprehensive exploration of how national and state security policy is effected by the production, storage, transportation, safeguarding, export and use of enriched uranium - and, by extension, plutonium. A wide range of geopolitical, security and technical issues are examined, as are the challenges presented to national and global governance. This book contributes to a new understanding of one of the most serious security implications inherent in the current rapid growth in nuclear power generation. It assesses attempts made to deal with the latent dangers to

Homeland Security posed by potential misuse of enriched uranium and plutonium, considering both the chances for success, and the costs of failure.

Build Beyond Zero John Wiley & Sons

The authors have conducted extensive research into the role of business in public life. This book takes a practice-oriented look at corporate citizenship, and uses real, behind the scenes examples from well-known companies to show that for many firms social responsibility is becoming more integrated into corporate strategy.

Urban Remote Sensing Lulu.com

2021 Christian Book Award Finalist "Jackson's visionary account is a beautiful model of sacrificial love." -- Publishers Weekly Starred Review The House That Love Built is the quintessential story of one woman's questioning what it means to be an American--and a Christian--in light of a broken immigration system. Through tender stories of opening her heart and home to immigrants, Sarah Jackson shines a holy light on loving our neighbor. Sarah Jackson once thought immigration justice was administered through higher walls and longer fences. Then she met an immigrant--a deported young father separated from his US-citizen family--and everything changed. As Sarah began to know fractured families ravaged by threats in their homeland and further traumatized in US detention, biblical justice took on a new meaning. As Sarah opened her heart--and her home--to immigrants, she experienced a surprising transformation and the gift of extraordinary community. The work she began through the ministry of Casa de Paz joined the centuries-old Christian tradition of hospitality, shining a holy light on what it means to love our neighbor. The dilemma of undocumented people continues to hover over America, and it raises urgent questions for every Christian: What is our responsibility to the "stranger" in our midst? What does God's kingdom look like in the global-political reality of immigration? What difference can one person make? Sarah engages these questions through profound and tender stories, placing readers in the shoes of individuals on every side of the issue--asylum seekers torn from their families, the guards who oversee them, ordinary people with lapsed visas, the families left to survive on their own, the unheralded advocates for immigrants' rights, and the government officials who decide the fates of others. Ultimately, Sarah's journey illuminates how hope can be

restored through simple yet radical acts of love.

Historic Mackinac CRC Press

Berkshire Hathaway, the \$300 billion conglomerate that Warren Buffett built, is among the world's largest and most famous corporations. Yet, for all its power and celebrity, few people understand Berkshire, and many assume it cannot survive without Buffett. This book proves that assumption wrong. In a comprehensive portrait of the distinct corporate culture that unites and sustains Berkshire's fifty direct subsidiaries, Lawrence A. Cunningham unearths the traits that assure the conglomerate's perpetual prosperity. Riveting stories recount each subsidiary's origins, triumphs, and journey to Berkshire and reveal the strategies managers use to generate economic value from intangible values, such as thrift, integrity, entrepreneurship, autonomy, and a sense of permanence. Rich with lessons for those wishing to profit from the Berkshire model, this engaging book is a valuable read for entrepreneurs, business owners, managers, and investors, and it makes an important resource for scholars of corporate stewardship. General readers will enjoy learning how an iconoclastic businessman transformed a struggling shirt company into a corporate fortress destined to be his lasting legacy.

Beyond Brawn Simon and Schuster

In recent years, digital technologies have become pervasive in academic and everyday life. This comprehensive volume covers a wide range of concepts for studying the new cultural dynamics that are evident as a result of digitisation. It considers how the cultural changes triggered by digitisation processes can be approached empirically. The chapters include carefully chosen examples and help readers from disciplines such as Anthropology, Sociology, Media Studies, and Science & Technology Studies to grasp digitisation theoretically as well as methodologically.

Beyond Product serves as a roadmap for dreamers, big idea people, founders, entrepreneurs, and trailblazers to transport their ideas from concept to successful business. Is this the Golden Age of the Founder? With only an idea and some change from the couch, a whole new generation of entrepreneurs are building apps, launching businesses, and developing creative new solutions for long-existing problems. People laud the successes,

but the truth is Most of these new businesses fail. The world expects the creators of these brilliant ideas to be great at everything, but most struggle along the way. The best product doesn't always win. Even good products need a good strategy for bringing them to market. Beyond Product provides the missing link for entrepreneurs and founders to turn their ideas into successful businesses. More than 50 business leaders have lent

their perspectives and joined with marketers Todd Wilms and Jill Soley to help the big-idea crowd bring their passion to the marketplace and find their customer. Beyond Product shows founders how to take their organization through various stages of growth, overcome obstacles, and learn from common mistakes. For every founder who ever found it lonely at the top, this roadmap serves as a coveted best friend as they launch their great idea into the market.
