A compelling and innovative reflection on the way photography captures and condenses time Two photographs, connected by a ladder, separated by a century. First, William Henry Fox Talbot photographed a faithfully realistic image of a ladder against a haystack in the English countryside. One hundred years later, an anonymous photographer captured another ladder, "photographed" alongside an incinerated man by the blinding light of the atomic bomb. These two images underpin a poetic and theoretical reflection on the origins of photographic technique, the imaginative power of montage, and the relation of photography to time itself in Jean-Christophe Bailly's *The Instant and Its Shadow*, translated into English for the very first time. A rare find of intellectual caliber and theoretical rigor, *The Instant and Its Shadow* pursues a unique and powerful reflection on the first hundred years of photography's history and on the essence of the photographic art in general. Inspired by the unexpected coming together of these two iconic images, the book begins by retracing Talbot's invention of the photographic calotype in the early nineteenth century, highlighting the paradox that saw Talbot wishing to imitate the representative arts of painting and drawing while simultaneously liberating the image from any imitative paradigm. This analysis leads Bailly to elucidate photography's relation to material and visual reality. A meditation on photography's seeming ability to stop time follows, concluding with the photographs of Hiroshima and the photographic nature of the atomic bomb. Building on an inspired juxtaposition of *The Haystack with the Hiroshima* photographs, the book becomes a testament to the potency of photomontage, arguing that "the more singular an image, the greater its connective power." Bailly's book is at once a lyrical homage to some of the founding texts of photographic theory and a startling reminder of the uncanny power of photography itself. Part theoretical reflection, part lyrical reverie, *The Instant and Its Shadow* is packed with profound and stellar insights about the medium.

"Behind Photographs began as the personal quest of photographer Tim Mantoani to document and preserve noted photographers together with their images. "We have come to a point in history where we are losing both photographic recording mediums photographic recording mediums and iconic photographers," Mantoani comments. "While many people are familiar with iconic photographs, the general public has no idea of who created them. This book became a means to do that, the photographer and their photograph in one image."--Publisher's website, <https://www.channelphotographics.com/behindphotographs.php>, viewed February 6, 2012.

Peace Pirates encourages and equips moms to stay ahead of what steals their peace and joy, so they can fully experience the blessings of motherhood, that parenting isn't just a title; it is a treasure. Why do moms find themselves settling for a depleted and frustrated existence when motherhood is truly one of the greatest gifts from God? Being a mom is one of the most important-yet-difficult roles a woman will ever fill. Deep in their hearts, many women believe they are failing

their families, are emotionally anemic, and are utterly helpless to maintain their peace while raising kids. As a result, hearts and homes are constantly defeated by the "peace pirates" that are allowed to take away the security God paid for His children to have. As a wife, mother of four boys, and blogger to hundreds of thousands of mothers, Ashley Willis experienced the stress of trying to be the best mom God wants her to be, while constantly fearing that she's missing out on the real treasure. With God's help, mothers can find the treasure in the midst of the struggle and remain faithful through all seasons of motherhood--especially the difficult ones--and claim their peace. Peace pirates will teach readers how to stay "treasured up" by first helping them identify the four stressors, or, peace pirates, that challenge their zest and contentment. With powerful personal and biblical insights, peace pirates will encourage and equip moms to stay ahead of what steals their joy so they can fully experience the blessings of motherhood.

Born in 1908 in France, Henri Cartier-Bresson is considered to be the father of modern photojournalism. Early on he adopted the versatile 35mm format and helped develop the popular "street photography" style, influencing generations of photographers that followed. In his own words, he expressed that "the camera is a sketch book, an instrument of intuition and spontaneity, the master of the instant which, in visual terms, questions and decides simultaneously. . . . It is by economy of means that one arrives at simplicity of expression." In 1947 Cartier-Bresson founded

Magnum Photos with four other photographers. August 22 will be the 100th anniversary of his birth.
