## MOODY DELGADO

The Classical Sicilian Everyman Chess

Opening expert Tony Rotella presents a Sicilian repertoire for Black, the backbone of which consists of the Kalashnikov Variation.

*Starting Out* CarstenChess

Former US Open Champion Timothy Taylor presents a repertoire for White against the most popular opening in chess - the Sicilian Defence. Taylor's repertoire is based first and foremost on the Open Sicilian, which is regarded as White's most ambitious and challenging response to the Sicilian. He focuses on the classical Be2 lines, which were popularized by the success of former World Champion and chess legend Anatoly Karpov. These lines are easy to learn and generally lead to solid positional play, but with a drop of poison. Taylor covers what to do against all the Sicilian variations. He examines the most important games, studies in depth the main plans and tactics for both sides, and highlights the key practical issues. Read this book and you will be ready to slay the Sicilian!

The Sicilian Defense The Sicilian Dragon: Move by Move

In the Closed Sicilian an awareness of the strategies and plans is far more important than the simple memorising of variations. White's play is logical and the basic ideas are simple to master.

*Opening Repertoire: The Sveshnikov Gambit*

Most books on the Sicilian Defense give thousands of moves and variations the reader is expected to memorize. Here instead Professor Danny Kopec teaches the principles of Structure.

Club players love to study openings as so much material is available. However, it has often been shown that results do not match the amount of study invested, as in practice it is much harder to navigate your way around an opening when the opponent deviates from theory. That is why Herman treats the study of openings in a completely different way. He focuses on increasing insight. In this book he discusses the backgrounds of openings, provides guidelines and explains in an instructive and accessible way the basic principles of a position. This book, the third in its series, provides an overview of the positions and corresponding plans arising from our beloved Sicilian Defense, being in this case 'Part 1', The Najdorf and Scheveningen Structures. Three more parts are being written as we speak.

The C3 Sicilian New In Chess

Chess strategies for playing the White or Black side of the Sicilian Defense

Chess Explained Gambit

The Sicilian Defence is Black's most popular reply to 1.e4. Most black players hope to get an Open

Sicilian because of its unbalanced play and interesting opportunities to play for a win. But what if White avoids the Open Sicilian and does not play 2.Nf3? This happens more often than you would think, as in roughly one third of the cases White players opt for one of the numerous 'Anti-Sicilian' lines at their disposal. These Anti-Sicilians vary from primitive and obscure to wild and aggressive to respected but tedious. But they have one thing in common: they are all dragging Black into territory where he doesn't want to be, and where it is easy to get ambushed. Evgeny Sveshnikov offers help. The Russian grandmaster, who is one of the most respected chess opening experts in the world, presents practical and effective recipes against a broad range of annoying variations: 2.a3?, 2.Na3?!, 2.b4?!, 2.b3, 2.Nc3, 2.d3 and many others. Black players will learn how to fight back and throw a spanner in the works when White tries to spoil their game.

**The Sicilian Dragon: Move by Move** Understanding Before Moving

In this book Richard Palliser decides it's time for Black players to finally fight back against the Anti-Sicilians! Drawing upon his vast experience and understanding of Anti-Sicilians, Palliser devises a compact and practical repertoire for Sicilian players against each of White's many alternatives. Using examples from modern play, he examines tactical and positional ideas for both White and Black, and pays special attention to tricky move orders which are very much in the armoury of contemporary Grandmasters."

**Taimanov System** Quality Chess

The Sicilian Defence is by far the most popular chess opening. If you play 1 e4 as White, on average you are likely to meet the Sicilian in virtually every other game! You need to be prepared to face the Sicilian at all times, and a ready-to-use repertoire against it is an indispensable weapon. In this book, Gawain Jones confronts the challenge of meeting the Sicilian head on. He has constructed a comprehensive Anti-Sicilian repertoire for White, which is based on lines he has successfully employed at grandmaster level. These are sound, reliable options for White, but don't be fooled – they also contain more than a drop of poison. Variations covered include the popular King's Indian Attack, various Bb5 systems and weapons against Black's offbeat tries. The King's Indian is a hugely popular opening at all levels of chess. Rather than attempting to secure early equality, Black is fighting for the initiative from the very first moves. White is allowed to build up an early central advantage but Black relies on the middlegame, hoping that the central installations that White has constructed will become unwieldy and vulnerable to a devastating counterattack. In many variations, White pursues material or strategic gains but in return Black has tactical and attacking opportunities. The King's Indian Defence appeals to players who arrive at the board prepared for a fight. The Move by Move series provides an ideal format for the keen chessplayer to improve their game. While reading you are continually challenged to answer probing questions – a method that greatly encourages the learning and practising of vital skills just as much as the traditional assimilation of chess knowledge. Carefully selected questions and answers are designed to keep you actively involved and allow you to monitor your progress as you learn. The Sicilian is far and away the most popular chess opening, and many players prefer to side-step the Open Sicilian with one of the Anti-Sicilian systems at White's disposal. This book equips Black to fight against all these lines. The Anti-Sicilian systems include: positionally motivated lines such as the 2 c3 Sicilian and the 3 Bb5 systems; slow but tricky attacking lines including the Closed Sicilian and the King's Indian Attack; aggressive but loosening ideas like the Grand Prix Attack and a variety of gambits. In the most critical variations, Rogozenko provides a choice between a solid and an aggressive option. He caters for those who meet 2 Nf3 with the three main moves, 2...d6, 2...e6 and 2...Nc6.
