*Public Relations* Routledge

This book represents a practical guide to ethical decision-making tailored specifically to the needs of those who practice and study public relations. It traces the development of ethical theory from ancient Greece through the works of Socrates, Plato, and Aristotle to modern day public relations executives including Harold Burson, Robert Dilenschneider, and Richard Edelman. This book helps readers build personal frameworks for ethical reasoning that will enable them not only to recognize the ethical issues at play in public relations practice but also to analyze the conflicting duties and loyalties in these situations. This volume fills a gap in the currently available books on the subject, most of which either lack theoretical grounding or practical application. Illustrative cases used in this book span a wide range of public relations functions. To update readers on issues discussed in this book, the authors have started an online conversation. Please

Paradox in Public Relations: A Contrarian Critique of Theory and Practice is a thought-provoking exploration of public relations, aiming to promote changes in meaning and perception by creating new meta-realities for public relations. The term "Public Relations" was embraced by early practitioners primarily because it sounded more professional than the often-pejorative alternatives. This book argues for a reframing of some of the popular realities associated with modern-day public relations and uses psychological and organizational change theory to critique paradoxes in public relations theory and practice. By examining public relations through the lens of paradox, we can begin to identify the logical fallacies that have inhibited progress and innovation in public relations practice and theory. The book explores the paradoxical nature of key concepts, including public interest, relationship management, accountability, stewardship, loyalty, community, and ethics. It also recommends new conceptualizations for understanding the field. This book will be of interest to media, communication, public relations, and advertising faculty and graduate students, particularly those interested in public relations theory and ethics. Scholars from other disciplines can also use this exploration of paradox in PR as a learning tool for identifying logical fallacies and inconsistencies.

*Public Relations: The Profession and the Practice* Kogan Page Publishers

The emergence of relationship management as a paradigm for public relations scholarship and practice requires a close examination of just what is achieved by public relations--its definition, function and value, and the benefits it generates. Initiated by the

editors' interest in cross-disciplinary exploration, this volume evolved to its current form as a result of the need for a framework for understanding public relations and the potential impact of organization-public relationships on the study, practice, and teaching of public relations. Ledingham and Bruning include contributions that present state-of-the-art research in relationship management, applications of the relational perspective to various components of public relations, and the implications of the approach to influence further research and practice. The discussion conducted here is certain to influence and promote future theory and practice on the concept of relationship management.

*Gaining Influence in Public Relations* explores how professionals can increase their influence in practice to help their organizations achieve success. This provocative book explores the largely uncharted territories of power, resistance, dissent, and activism in public relations, arguing that practitioners can increase their power and social legitimacy by developing and using a wider range of influence resources, strategies, and tactics.

Authors Bruce K. Berger and Bryan H. Reber talked with hundreds of practitioners, analyzed original survey data, and examined a detailed case study to develop a theory of power relations. Ultimately, the book seeks to advance the ethical and effective practice of public relations. Intended for scholars and graduate students in public relations, it also has much to offer practitioners, as well as scholars and students in organizational communication, organizational theory, human resources, and leadership.
