The advent of color, big musicals, the studio system, and the beginning of institutionalized censorship made the thirties the defining decade for

Hollywood. The year 1939, celebrated as "Hollywood's greatest year," saw the release of such memorable films as *Gone with the Wind*, *The Wizard of Oz*, and *Stagecoach*. It was a time when the studios exercised nearly absolute control over their product as well as over such stars as Bette Davis, Clark Gable, and Humphrey Bogart. In this fifth volume of the award-winning series *History of the American Cinema*, Tino Balio examines every aspect of the filmmaking and film exhibition system as it matured during the Depression era.

In this comprehensive introduction to political parties, two leading scholars examine how the party systems works and why it is important, giving students a richer understanding of the role of parties in the American political system. An emphasis on regional variations in parties shows students how local needs impact party structure, and a systemic

comparison with foreign systems adds a broader perspective on the American party system.

Debian GNU/Linux, a very popular non-commercial Linux distribution, is known for its reliability and richness. Built and maintained by an impressive network of

thousands of developers throughout the world, the Debian project is cemented by its social contract. This foundation text defines the project's objective: fulfilling the needs of users with a 100% free operating system. The success of Debian and of its ecosystem of derivative distributions (with Ubuntu at the forefront) means that an increasing number of administrators are exposed to Debian's technologies. This Debian Administrator's Handbook, which has been entirely updated for Debian 8 "Jessie", builds on the success of its 6 previous editions. Accessible to all, this book teaches the essentials to anyone who wants to become an effective and independent Debian GNU/Linux administrator. It covers all the topics that a competent Linux administrator

should master, from installation to updating the system, creating packages and compiling the kernel, but also monitoring, backup and migration, without forgetting advanced topics such as setting up SELinux or AppArmor to secure services, automated installations, or virtualization with Xen, KVM or LXC. This book is not only designed for professional system administrators. Anyone who uses Debian or Ubuntu on their own computer is de facto an administrator and will find tremendous value in knowing more about how their system works. Being able to understand and resolve problems will save you invaluable time. Learn more about the book on its official website: debian-handbook.info

NCLEX-RN Examination LSU Press Promotes ease of understanding with a unique problem-solving method and new clinical application scenarios! With a focus on chemistry and physics content that is directly relevant to the practice of anesthesia, this text delivers—in an engaging, conversational style--the breadth of scientific information required for the combined chemistry and physics course for nurse anesthesia students. Now in its third edition, the text is updated and reorganized to facilitate a greater ease and depth of understanding. It includes additional clinical application scenarios, detailed, step-by-step solutions to problems, and a Solutions Manual demonstrating a unique method for solving chemistry and physics problems and explaining how to

use a calculator. The addition of a third author--a practicing nurse anesthetist--provides additional clinical relevance to the scientific information. Also included is a comprehensive listing of need-to-know equations. The third edition retains the many outstanding learning features from earlier editions, including a special focus on gases, the use of illustrations to demonstrate how scientific concepts relate directly to their clinical application in anesthesia, and end-of-chapter summaries and review questions to facilitate self-assessment. Ten on-line videos enhance teaching and learning, and abundant clinical application scenarios help reinforce scientific principles and relate them to day-to-day anesthesia procedures. This clear, easy-to-read text will help even the most

chemistry- and physics-phobic students to master the foundations of these sciences and competently apply them in a variety of clinical situations. New to the Third Edition: The addition of a third co-author--a practicing nurse anesthetist—provides additional clinical relevance Revised and updated to foster ease of understanding Detailed, step-by-step solutions to end-of-chapter problems Solutions Manual providing guidance on general problem-solving, calculator use, and a unique step-by-step problem-solving method Additional clinical application scenarios Comprehensive list of all key equations with explanation of symbols New instructor materials include PowerPoint slides. Updated information on the gas laws Key Features: Written in an

engaging, conversational style for ease of understanding Focuses solely on chemistry and physics principles relevant to nurse anesthetists Provides end-of-chapter summaries and review questions Includes abundant illustrations highlighting application of theory to practice

The search for the biblical Philistines, one of ancient Israel's most storied enemies, has long intrigued both scholars and the public. Archaeological and textual evidence examined in its broader eastern Mediterranean context reveals that the Philistines, well-known from biblical and extrabiblical texts, together with other related groups of "Sea Peoples," played a transformative role in the development of new ethnic groups and polities that emerged from

the ruins of the Late Bronze Age empires. The essays in this book, representing recent research in the fields of archaeology, Bible, and history, reassess the origins, identity, material culture, and impact of the Philistines and other Sea Peoples on the Iron Age cultures and peoples of the eastern Mediterranean. The contributors are Matthew J. Adams, Michal Artzy, Tristan J. Barako, David Ben-Shlomo, Mario

Benzi, Margaret E. Cohen, Anat Cohen-Weinberger, Trude Dothan, Elizabeth French, Marie-Henriette Gates, Hermann Genz, Ayelet Gilboa, Maria Iacovou, Ann E.
