*Classic Set Theory* W. W. Norton & Company

Life-expectancy worldwide is twice what it was a hundred years ago. And because of modern medicine, many of us don't often see death up close. That makes it easy to live as if death is someone else's problem. It isn't. Ignoring the certainty of death doesn't protect us from feeling its effects throughout the lives we're living now. But this avoidance can hold us back from experiencing the powerful, everyday relevance of Jesus's promises to us. So long as death remains remote and unreal, Jesus's promises will too. But honesty about death brings hope to life. That's the ironic claim at the heart of this book. Cultivating "death-awareness" helps us bring the promises of Jesus from the hazy clouds of some other world into the everyday problems of our world—where they belong.

*Ali the Magnificent* Nordic Africa Institute

One of the world's foremost exponents of the "pluralist" position as the most adequate Christian theological account of religious diversity turns to a new and urgent issue facing the community of world religions. For Paul Knitter, the spectre of environmental and social injustice looms over any serious discussion of humankind's future. As urgent as it is to have peace among the world's believers to achieve peace among nations, it is urgent that these communities unite in understanding and defending of the earth. In *One Earth Many Religions* Knitter looks back at his own "dialogical odyssey" and forward to the way that interfaith encounters and dialogue must focus attention on new challenges. Nothing less than enlisting the commitment of the world's religions on the task of saving our common home will do. In making that case, Knitter makes clear the complex structures—political, economic, and social as well as religious—that face those who approach this task. While articulating a "this-worldly soteriology" necessary to overcome our eco-human plight, Knitter offers practical considerations on actions and projects that have and should have been undertaken to stem the tide of environmental and human suffering. The global crisis is both at the center of *One Earth Many Religions* and a test case for Knitter and others engaged in the dialogue of religions. Can religious differences concerning the nature of the transcendent themselves be transcended in order to promote eco-human well-being? The issue seems basic and clear if interreligious dialogue cannot effect such a change, then one must question whether religion is of any use whatsoever.

Designed for undergraduate students of set theory, *Classic Set Theory* presents a modern perspective of the classic work of Georg Cantor and Richard Dedekind and their immediate successors. This includes: The definition of the real numbers in terms of rational numbers and ultimately in terms of natural numbers; Defining natural numbers in terms of sets; The potential paradoxes in set theory; The Zermelo-Fraenkel axioms for set theory; The axiom of choice; The arithmetic of ordered sets; Cantor's two sorts of transfinite number - cardinals and ordinals - and the arithmetic of these. The book is designed for students studying on their own, without access to lecturers and other reading, along the lines of the internationally renowned courses produced by the Open University. There are thus a large number of exercises within the main body of the text designed to help students engage with the subject, many of which have full teaching solutions. In addition, there are a number of exercises without answers so students studying under the guidance of a tutor may be assessed. *Classic Set Theory* gives students sufficient grounding in a rigorous approach to the revolutionary results of set theory as well as pleasure in being able to tackle significant problems that arise from the theory.

*The History of al-Tabari Vol. 1* Createspace Independent Publishing Platform

The sixth volume of the translation of al-Tabari's History deals with the ancestors of Muhammad, with his own early life, and then with his prophetic mission up to the time of his Hijrah or emigration to Medina. The topics covered mean that this volume is of great importance both for the career of Muhammad himself and for the early history of Islam. Al-Tabari was familiar with, and made use of, the main early source of these matters, the Sirah or life of Muhammad by Ibn Ishaq, a work which is still extant. Although his own treatment is briefer than that of Ibn Ishaq, it complements the latter in important ways by making use of other sources. Where Ibn Ishaq gave only the version of an event which he preferred, al-Tabari includes any variants which he considered of value. Thus he mentions the dispute about the first male to become a muslim—'Ali or Abu Bakr or Zayd—and has also several variant accounts of the call to hostility toward Muhammad from many of the leading Meccans and their attempts to put pressure on his family to stop his preaching. The negotiations with the men of Medina which eventually led to the Hijrah are fully described, and there is then an account of how Muhammad escaped an assassination attempt and arrived safely in Medina. A concluding section discusses some chronological questions. This volume does not merely give a straightforward account of the earlier career of Muhammad and the beginnings of Islam, but also contains valuable source-material not easily accessible otherwise, or not accessible at all.

The Islamic Turks were poised to overrun Europe at The Battle of Vienna on September 11/12 of 1683, but were defeated. The Islamic Invasion As Mosques appear across the country people are asking—"What do I need to know about Islam?" Islam—once an obscure Middle Eastern religion—has rapidly grown into the second largest religion in the world. There are now more Muslims than Episcopalians in the United States! What attraction does Islam hold for its followers? What part does it play in shaping the outlook and attitudes of nearly one billion people? Noted author Dr. Robert A. Morey, internationally recognized authority on the origins of the teachings and rituals of Islam—explores the pre-Islamic history of Allah, and the doctrines and customs of Islam reveals Islam's teaching about current issues such as religious freedom and the role of women. The Islamic Invasion will give you the insight you need to understand Islam and the challenge it poses today. Dr. Morey warned the United States and Europe about Islam during the early 1980's long before 9/11. Most books on Islam since 9/11 have used his analysis of the Qur'an or Hadith. Special thanks to Professor Colin Akridge—who is a Vietnam Veteran and black scholar in the field of comparative religions—for his valuable and insightful contributions and working with him for researching and writing the section entitled *The Black Muslim Movement in America*. Volume I of the thirty-eight volume translation of Tabari's great History begins with the creation of the world and ends with the time of Noah and the Flood. It not only brings a vast amount of

speculation about the early history of mankind into sharp Muslim focus, but it also synchronizes ancient Iranian ideas about the prehistory of mankind with those inspired by the Qur'an and the Bible. The volume is thus an excellent guide to the cosmological views of many of Tabari's contemporaries. The translator, Franz Rosenthal, one of the world's foremost scholars of Arabic, has also written an extensive introduction to the volume that presents all the facts known about Tabari's personal and professional life. Professor Rosenthal's meticulous and original scholarship has yielded a valuable bibliography and chronology of Tabari's writings, both those preserved in manuscript and those alluded to by other authors. The introduction and first volume of the translation of the History form a ground-breaking contribution to Islamic historiography in English and will prove to be an invaluable source of information for those who are interested in Middle Eastern history but are unable to read the basic works in Arabic.
