In these four remarkable lectures, Rudolf Steiner contends that Christ has been working on humanity's behalf since the very beginnings of its existence, long before the inception of the Christian religion. Steiner indicates how - in both the ancient Mystery schools and in the miraculous events depicted in the Old Testament - the guiding hand of Christ shaped and developed peoples' cognition. The ultimate divine intervention took place in the incarnation of Christ in human form - God in man - which

culminated in the Mystery of Golgotha. Through this mighty event, opportunity is given for every soul to develop immortal individuality and consciousness of self. Steiner clarifies the difficult concepts of sin, guilt and karma, and explains the meaning of 'forgiveness of sins' and 'resurrection of the body'. Looking forward to future great periods of evolution, he speaks of the separation of humanity into two races of good and evil, and describes how Christ will continue to work in this critical time of human development./

Scholastic UK

Modern scholarship knows little of the mystery schools of antiquity, offering only hypothetical explanations and external details. In these expansive lectures based on his personal spiritual insights, Rudolf Steiner offers a vivid description of the esoteric

experiences gained by people in the ancient mystery schools, from the mysteries of Artemis in Ephesus, of Hibernia, Eleusis and Samothrace, to the Middle Ages. He also discusses the conditions under which initiation can be achieved today. Following preliminary lectures on the nature and function of the soul, Steiner presents a panoramic view of human and earthly evolution, including the roles of plants and animals. He also discusses the various metals, their curative properties and their connections with the planets.

In the first book-length study of these movements, Michael York describes their rituals and beliefs and examines the similarities, differences and relationships between them. He profiles particular groups, including the Church Universal Triumphant, Nordic pagans, and the Covenant of Unitarian Pagans, and questions the adequacy of existing sociological categories for describing these largely amorphous phenomena.

'The treasure-trove of the real self is within us, but it can be lifted

only when the mind is still.' Paul Brunton was one of the 20th century's greatest explorers of, and writers on, the spiritual traditions of the East. He travelled widely throughout India (in particular) and met gurus and teachers who enriched his life immeasurably. By passing on to us the wisdom he learned directly from these holy men, he is widely credited as having introduced yoga and meditation to the West. In *The Secret Path*, Paul Brunton explains in simple language how to meditate, and how this will transform your everyday existence. He also describes the remarkable experiences and understandings he himself gained from meditation and how, by making this ancient practice a part of your life, you will be able to experience a valuable kind of freedom and a deep inner peace. The classic work - which has been reprinted many times - is a very special pointer towards your inner world, and one written by a most unusual and adventurous man of insight.

Reiki is an emerging adjunctive therapy that claims to provide physical and psychological healing as well as an experience of spiritual connection. It is increasingly employed in counseling centers, hospitals, and even churches. Reiki is believed by many to be a safe, non-invasive healing intervention that draws individuals towards God. Reiki practitioners maintain that they imitate Jesus' laying on of hands and claim that their praxis is essentially the same as the healing used by Jesus as well as by Buddha. An ethnographic multi-case study was performed comparing the experiences of nine individuals, four who received Reiki therapy and five who received Christ-based hands-on healing. The long interview format was employed. The transcribed data were coded and analyzed for similar and distinct themes. In addition, a brief survey was utilized to determine the spiritual interests and involvement of each participant and the spiritual consequences of their healing experiences. The findings indicate that Reiki healing is distinct from that which is depicted in the Bible. Reiki appears to open up individuals to an "energy-based" healing modality that is spiritual in nature but is not specifically Christian. As reported by Reiki practitioners, it is a spirituality which welcomes shamanism, psychic healing, clairvoyance, spirit guides, and a host of other metaphysical practices as individuals become more intimately involved. In addition, the research demonstrates that Reiki therapy, over time, can cause physical, emotional, and spiritual harm. The writer contends that biblical healing, which at its core is soteriological and dependent upon the ministry of the Holy Spirit, heals mind, body, and spirit without harmful consequences.

A groundbreaking study that distinguishes the natural time of the cosmos from artificial mechanistic time. • Reveals September 11 as the signal of the end of artificial time according to the Law of Time. • Long awaited sequel to the author's bestselling book *The Mayan Factor*. • Explains the Great Calendar Change of 2004 and its enormous potential for the future of humanity. In *Time and the Technosphere*, José Argüelles presents a groundbreaking study that distinguishes the natural time of the cosmos from the artificial mechanistic time under which we currently live.

Argüelles defines the actual nature of time as the frequency of synchronization. Applying this Law of Time to an understanding of the entire system of life on Earth, he shows that in order to not destroy Earth's ability to sustain life, we must change our definition of time and adopt a natural harmonic calendar based on the 13-moon 28-day cycle. Until the creation of the Gregorian calendar and the 60-minute hour, most of humanity lived by the 28-day cycle of natural time. The adoption of artificial time has subjected us to a 12:60 time frequency that governs the entire global industrialized civilization--the technosphere. With the collapse of the Twin Towers on September 11, a fissure was created in this artificial technosphere, opening up the noosphere (Earth's mental envelope). Humanity has a golden opportunity to leave the strife of the past and enter a time of peace by adopting a harmonious natural calendar that will repair the damages caused by the irregular tempo of technospheric time. Our last best chance to adopt this natural time and step into the bright new future promised by the galactic shift of 2012 is the Great Calendar Change of 2004, a new discovery based on the author's mathematical research into the Mayan calendar first begun in his landmark work *The Mayan Factor*. In *Time and the Technosphere*, Argüelles reveals the clear distinction between third-dimensional astronomical time and the fourth-dimensional synchronic order of the Law of Time, which holds enormous potential for the future of humanity.
