A Precise Pocket Atlas Based on the Works of Nogier/Bahr Elsevier Health Sciences
Anatomical Atlas of Chinese Acupuncture Points: The Cooperative Group of Shandong Medical College and Shandong College of Traditional Chinese Medicine covers the common points with their relations to human anatomical structures and the locations of points and indications. The book provides illustrative 100 plates and pictures that fall into three categories: the first part deals with the courses of 12 channels and 8 extra channels (Mai), points on such channels, locations, and indications. The second part describes the relationships between familiar points and their relative anatomical structures (head and neck, trunk, upper, and lower extremities). Points of auricular acupuncture and their indications are included in the third part. The book further presents an index of the ear acupuncture points. The book will be invaluable to people working in the fields of combining Chinese traditional medicine with Western medicine, research work as well as clinical therapeutics.

Have you ever wondered about the anatomic structures that are affected locally when you insert a needle in a specific acupuncture point? Have you ever worried, for example, how close you get to the radial artery when needling LU-9 tai yuan? This lavishly illustrated anatomic atlas of 414 pages by the Italian doctors Quirico and Pedrali provides the reader with concrete answers and reassurance on a wide range of questions pertaining to anatomy in acupuncture practice. The first section offers a concise review of all major acupuncture points, presenting their clinical applications in table format. This is followed by a second section of more than 200 full-color illustrations. Cross-sections depict concrete anatomic structures in the vicinity of each acupuncture point, illustrating skin, muscles, nerves, blood vessels, and bones. Lastly, additional information on auricular and scalp acupuncture points, Chinese therapeutic techniques other than acupuncture, and reflexology plates round out the information provided in the two main sections of the book. Deepen your understanding of acupuncture and increase the efficacy of your practice by perfecting your understanding of the location, needling methods, attaining de qi, anatomic relations, and key clinical indications for each acupuncture point, all in one conveniently referenced location! For detailed clinical information and comparisons between Western and TCM indications of specific acupuncture points, this atlas can be paired with Volume 2, which provides in-depth descriptions of over 400 acupuncture points.

Channels and Points Butterworth-Heinemann

This practical, full-color photographic atlas is an indispensable aid to rapid, accurate location of acupuncture points. It's the first book to combine illustrated acupuncture points with full-color photos indicating the body anatomy in the vicinity of commonly used and potentially dangerous points. The book's first section provides photos of human models with the 14 acupuncture channels and 409 acupuncture points clearly indicated; the photos first depict the whole body, then provide greater detail on specific body regions. The second section contains color photos of large cross-sections of the trunk, indicating relevant acupuncture points by channel. The third

section presents color photos, each accompanied by one or more color drawings, illustrating cross-sections of body parts in the vicinity of individual commonly used or higher-risk acupuncture points; these photos and drawings illustrate the depth of needle insertion and label the anatomical structures traversed by the needle. They are accompanied by brief notes on location, depth of insertion and clinical indications. Features photos and diagrams that aid the reader in locating points and gaining needling confidence as they learn to visualize the "real life" body structures involved in the needle passage. Presents full-color photos of acupuncture channels and points on human models, aa well as full-color photos and drawings of anatomical cross-sections at commonly used and higher-risk points. Facilitates rapid location of acupuncture points.

- Explores in precise detail the acupuncture points of the 12 main channels/meridians, plus the conception and governor vessels
- Explains the theory of acupuncture from both traditional Chinese and Western medical perspectives with maps of the body
- Full-color throughout and abundantly illustrated

A complete reference atlas of acupuncture and acupressure points, this newly updated guide by renowned shiatsu, qigong, and bodywork teacher Chris Jarney with experienced acupuncture clinician Lynn Pearce illustrates how to best locate and treat nearly 400 acupoints throughout the body. Full-color throughout and abundantly illustrated, this fourth edition is updated to offer comparisons of Eastern and Western teaching models as well as new theoretical material to help instill intuitive understanding for students and early practitioners of acupuncture. The first part of the book, "Theory," describes the essence of acupuncture from both traditional Chinese and Western medical perspectives with chapters on needling considerations, the principles of locating acupoints, and myotome, dermatome, viscerotome, and sclerotome maps of the body. The second part, "Practice," then guides the reader methodically through acupuncture points of the 12 main channels/meridians, plus the conception and governor vessels and additional non-channel points. The locations of nearly 400 points are described in precise detail and clearly illustrated through color diagrams, along with explanations of each point's actions, indications, and contraindications. Honoring the traditional Eastern roots of acupuncture in parallel with modern approaches of Western medicine, this book is an essential resource for practitioners of all levels seeking to deepen their understanding of working with acupoints.

A novelty to the international market both in concept and realization, this pocket atlas allows the reader to both effectively learn and quickly reference ear acupuncture points. Clear, simple images accompany concise and "to-the-point" texts creating an educational tool for the localization of ear acupuncture points. The resourcefulness of the book is increased by the inclusion of the projection of the body meridians onto the auricle according to Bahr. Besides, "prescriptions" of point combinations according to some indications are included. The reader will profit from the extensive international teaching experience of Beate Strittmatter. Through her former teacher, Frank Bahr, who cooperated directly with Dr. Paul Nogier, she stands in the direct tradition of the founder of Western auriculotherapy.

This book differs from other texts on acupuncture points in that it is not concerned with the basic theories of TCM. Rather, it is a formulary and clinical reference developed from the clinical tradition of Ching Tan An, Tsang Tien Chi, and Tin Yau So. Dr So related the practicality of point use and emphasises the selection of points for the treatment of particular symptoms and conditions. For each point he lists: clinical effects, disease, symptoms and energetic conditions. The book has a superb index to aid access to information.
