Miles Davis's seminal recording, known as 'Birth of the Cool', is the starting point for this colorful, multi-disciplinary journey through 1950s West Coast America. 1950s West Coast style exuded "cool"; from the smooth, hypnotic strains of a Miles Davis riff through Richard Neutra's elegant, modernist residences to the hard-edged paintings of Helen Lundeberg and Karl Benjamin. This illustrated volume casts a fresh eye on Fifties West Coast style with illuminating commentary from a variety of perspectives. Designed to echo the period it celebrates, this catalog explores modernist innovations in art, architecture, design, film and music. Prominent cultural critics write on an array of topics - Thomas Hine about the culture of cool; Elizabeth Smith on domestic aspects of the period's architecture; Francis Colpitt on hard-edged abstract painting; Dave Hickey on jazz, and Bruce Jenkins on the crossover between animation and experimental film. The result is a multi-faceted exploration of the 1950s West Coast.

Through her journey from having it all to dealing with financial setbacks, Wood provides tools to help you organize your finances and understand which spending patterns are knocking you off-track. Ten years ago, Alice Wood was living a normal life, balancing her career, family, and

finances with confidence. She knew instinctively how to handle money, until a brain injury sustained on a commercial airplane changed her life. After the injury, Alice encountered many new challenges; for the first time in her life she was overweight and in serious debt. Weight Watchers® allowed Alice to lose the weight and keep it off. Inspired by Weight Watchers'® daily discipline of journaling and the principle of group accountability, she decided to create a new and radically simple program to reclaim her financial stability. She called it Wealth Watchers. This simple program enabled her to meet her own financial goals and soon was helping thousands of others to do the same. Today, the Wealth Watchers program is an important part of the rapidly growing movement for financial literacy and empowerment sponsored by school, state, and federal government programs; corporations such as McDonald's and Visa; and several large financial institutions.

Can modern science tell us what happened to Amelia Earhart? The International Group for Historic Aircraft Recovery (TIGHAR) has spent fifteen years searching for the famous lost pilot using everything from archival research and archaeological survey to side-scan sonar and the analysis of radio wave propagation. In this spellbinding book, four of TIGHAR's scholars offer tantalizing evidence that the First Lady of the Air and her navigator Fred Noonan landed on an uninhabited tropical island but perished before they could be rescued. Do they have Amelia's shoe? Parts of her airplane? Are her bones tucked away in a hospital in Fiji? Come join their fascinating expedition and examine the evidence for yourself! The new paperback edition brings the search up to the present, including tantalizing evidence of campfires and charred bones found on remote Nikumaroro. Whether a Part 121 airline or a Part 135 charter operator, a company lives or dies by its compliance with the applicable Federal Aviation Regulations, or FARs (14 CFR). Air Carrier Operations introduces students of aviation to the significant Federal Aviation Regulations affecting airline operations. Students and professionals gain an appreciation of the variety of regulatory issues involved in air carrier operations and gather the background information they need to identify and apply the relevant regulations. This book examines the many regulations governing an air carrier and focuses primarily on Part 121 air carriers; in addition, coverage includes Part 119 and relevant portions of Parts 135, 91, 61 and 25 of the Federal Aviation Regulations. The text emphasizes Instrument Flight Rules (IFR) flight operations, particularly useful to instrument-rated pilots and aircraft dispatchers. For this third edition, the authors collaborated with two seasoned FAA Licensed Flight Dispatchers, enhancing the content relevant to students preparing for the FAA Flight Dispatcher Certificate. In addition, updates and revisions throughout reflect new FAA regulatory changes to provide students, pilots, flight crews, dispatchers, and management professionals with the essential information pertinent to today's air carrier operations. Air Carrier Operations is a college-level text ideal for Air Carrier Flight Operations and Airline Operations courses, is used extensively in Airline Dispatcher Training courses, and is an excellent preparation

for airline interviews and initial airline pilot training.

Learning to co-parent requires practice and patience. Going through a divorce is difficult enough, but having to stay in a co-parenting relationship to raise your child provides multiple and unique challenges. You simply can't walk away from your ex when you have a child to raise. Co-parenting-working cooperatively to raise your child with your ex-is a learned process with many pitfalls (and tribulations) along the way. Learning to communicate effectively is essential to the most important job you will ever have: raising your child together when you are no longer a family. With helpful examples and practical methods about fixing-and avoiding-conflicts, this book is a guide to help you to effectively co-parent with your ex after your relationship is over. Chapters in the book: Always. Business. Compassion. Discretion. Energy. Forgiveness. Golden. Honor. Important. Judgment. Kindness. Learn. Mistakes. Normalcy. Others. Professionalism. Question. Respond. Silence. Time. Unintentional. Vortex. Work. eXpectations. Yes. Zealous. Excerpt: J. Judgment. It's easy to judge someone from afar, especially an ex. When they leave, you feel betrayed. When you leave, you feel resentful. When you look at the other person's new life, your view is distorted by

the lens of the old relationship. In fact, however, no one can ever know what's going on in someone else's mind or house without talking to them. A great deal of co-parenting miscommunication comes from making assumptions and then judging the other person based on how you feel. But often those judgments and assumptions turn out to be untrue. Ask questions and really listen to the answers before you make up your mind about a situation. These difficult yet simple acts can help soften the hard lines we've drawn, leading divorced people to be better co-parents. Examples: Mom wants Jake to attend private school. Dad wants Jake to attend public school. Mom is willing to pay the entire bill for private school, but Dad thinks it's an attempt to show that he isn't paying his part. Mom explains that her father, who is now very ill, has set up a special fund to pay for Jake's education, including private school. Dad replies that while he understands this is a generous gift from a grandparent, he is worried that Jake will know he's not paying toward it, and that makes him feel like an inadequate parent. Dad drops Jake off in a new-to-him car. Mom is fuming because she feels that she doesn't receive enough financial support, but here he is with a new expensive item. The next time they are at one of Jake's soccer games, Mom makes a negative comment to Jake about Dad's new car. In the first scenario, Mom and Dad need to take a step back to discuss that this decision is about the type of education they want to give their son, not where the money will come from. Mom can reduce the sense of judgment by reminding Dad that she's not paying either; the money is from a fund set up for this purpose. If the mutual answer is that private school is the best option, they can both tell Jake that he'll be attending private school without mentioning how it will be paid for. If he asks, they can agree to

tell him that they only have his best education as their concern, and there is the money to pay for this. In the second scenario, Dad reminds Mom that his father recently died, and it was left to him in his will. He had been close with his father, and he tells her the car reminds him each day of his father. He adds that it allows him to share an important part of his dad with Jake. Reducing or removing judgments when discussing a sensitive subject will help both parents come to an understanding of the situation and aid in making a mutually agreeable resolution. Passing judgment without knowing the full story leads to unnecessary and unfounded angst within ourselves and with our co-parents.

The events of 11 September 2001 changed the world, and in particular the aviation community, forever. Since then, the terrorist threat continues to dominate international air travel and pose a real and present danger to airline passengers and aircrew across the globe. In line with this, expectations of renewed commitments to aircrew security training increased, however the

practical reality of the standard of information and effective training often fell short. This book aims to help redress this problem. Intended to help flight crews' deal with the new complexities they face in the skies, it is designed to inform and enlighten crewmembers on the issues posed by air rage and terrorist activities, using techniques for conflict resolution, assessment of threat, mental and physical preparation and post-incident considerations. The culmination of work accomplished from a lifetime of employment in aviation, security and training, the authors use a progressive approach to explain security issues from a flight crewmember's perspective. Using detailed studies of current airline security practice, verified by interviews with crewmembers worldwide, the book uncovers many of the shortcomings of international aviation security and presents plausible and innovative solutions to the problems crewmembers face. Having worked with aviation industry leaders, regulatory authorities, major airlines and flight training organizations, the authors provide a unique blend of guidance, useful to the development of security programs for crewmembers by airlines, corporations and air charter companies. Government agencies commissioned with overseeing and developing aircrew security can also use the book when seeking a better understanding of the needs of crewmembers and airlines. Readership includes: Airline flight crewmembers (pilots, flight engineers and flight attendants); major universities and colleges with aviation programs; members of organizations such as the Airline Transport Association, International Airline Transport Association, World Airline Transport Association, Flight Safety Foundation, Pilot and Flight Attendant labor unions as well as government agencies.
