Excerpt from Some Questions on Banking: With Answers Thereto Q. 1. - Give some account of the various classes of Banks existing in the United Kingdom, stating the difference between their constitutions. A. - The various classes of banks existing in the United Kingdom may be grouped under three heads. (1) Banks incorporated by Act of Parliament or by Royal Charter. The chief of these banks is the Bank of England, which was established by an Act passed in 1694. The benefits enjoyed by such banks as compared with private partnerships are that they have the privileges of a corporation, the power to make bye-laws, to enjoy in their several partners freedom from any responsibility beyond the stock held, with the power of selling their shares; their debts affect only their stocks, and individual members cannot be called on to make up any deficiency to the creditors. Under an Act passed in 1825, it is open to the Crown, when granting charters, to make the individual members liable for the debts of such corporations to any extent, and subject to such regulations as may be deemed proper. It is by virtue of this Act that the shareholders of most of the chartered Colonial and Indian banks in London are liable for double the amount of their shares. "Money is a terrible master but an excellent servant." -P.T. Barnum "...Whoever controls the volume of money in any country is absolute master of all industry and commerce." -President James Garfield
 "Money never made a man happy yet, nor will it. The more a man has, the more he wants. Instead of filling a vacuum, it makes one." -Benjamin Franklin
 The above quotes about money are just a few examples of the many statements made by politicians, businessmen, philosophers, and ordinary people throughout the ages, showing that money has always attracted a lot of attention and controversy. The meaning of money, how it was created, and how it influenced everyday life for Americans inspired Wright Patman throughout his professional life as a Congressman from 1928 to 1975, as chairman of the powerful United States House Committee on Banking and Currency from 1963 to 1975 and a life-long populist in the good sense of the word. He defended the little guy, farmers, veterans and small businessmen against big business, big chain stores, big banks and especially the Federal Reserve system. Together with his Subcommittee on Domestic Finance, Patman released in 1964 *A Primer on Money* explaining how the US monetary system works and indicated where it needed reform. As a supplement to that report, he released *Money Facts--169 Questions and Answers on Money*, which is designed to highlight in question and answer form the basic points brought out in *A Primer on Money*. It answers, for example, what money is: "Money is anything that people will accept in exchange for goods or services, in the belief that they may, in turn, exchange it, now or later, for other goods or services," but it also raises many other questions such as: - Who issues currency? - What is a central bank? - What is active monetary policy? - What is the main problem of the Federal Reserve System? Although this publication is over fifty years old, and some changes have been made to the Federal Reserve System since then, this booklet is still relevant and important to understand more about the history and meaning of money and how the Federal Reserve System plays a crucial role in the US economy. This report is interesting reading for students of monetary policy, academics, policymakers, journalists, and anyone interested to learn about the basics of money and the monetary system.
