Theory without practice is empty, practice without theory is blind, to adapt a phrase from Immanuel Kant. The sentiment could not be truer of cultural heritage ethics. This intra-disciplinary book bridges the gap between theory and practice by bringing together a stellar cast of academics, activists, consultants, journalists, lawyers, and museum practitioners, each contributing their own expertise to the wider debate of what cultural heritage means in the twenty-first century. Cultural Heritage Ethics provides cutting-edge arguments built on case studies of cultural heritage and its management in a range of geographical and cultural contexts. Moreover, the volume feels the pulse of the debate on heritage ethics by discussing timely issues such as access, acquisition, archaeological practice, curatorship, education, ethnology, historiography, integrity, legislation, memory, museum management, ownership, preservation, protection, public trust, restitution, human rights, stewardship, and tourism. This volume is neither a textbook nor a manifesto for any particular approach to heritage ethics, but a snapshot of different positions and approaches that will inspire both thought and action. Cultural Heritage Ethics provides invaluable reading for students and teachers of philosophy of archaeology, history and moral philosophy – and for anyone interested in the theory and practice of cultural preservation.

The principal audience for this book seems to be deliberately and most certainly an academic one; that said, those practitioners from a business management or central/local government support-agency background might also find the text a useful resource. Intrinsically, those employed teaching and researching within the fields of entrepreneurship or regional economic development will find this publication an invaluable and indispensable reference tool. . . After an excellent, cohesive and informative introductory chapter, which places the book firmly in the field of regional entrepreneurship theory development, the reader is effortlessly prepared for the intellectually challenging read ahead. . . this book is well laid out and it is easy for the reader to pick up the thread of the argument, even after a lay-off. The endnotes after each chapter are useful and comprehensive, adding richness to the text through the additional information. The bibliography is as comprehensive as it is exhaustive. . . Professor Julien has given us a book that presents both an interesting and alternative perspective to the field of entrepreneurial cross-disciplinary research. Paul J. Ferri, *International Journal of Entrepreneurial Behaviour and Research* . . . it is my view that this book gives a very important contribution for the understanding of development of local entrepreneurship, through its cross-disciplinary approach. I see the book is especially interesting from an entrepreneurship and a regional development perspective. . . this book should inspire research that takes a more holistic approach using different levels of analysis and applies it to economic development at a local/territorial level, when studying entrepreneurship. Einar Lier Madsen, *International Small Business Journal* The reader who is interested in entrepreneurship and/or regional development will find this book a welcome contribution to the field. Rainer Harms, *Entrepreneurship and Innovation* For too long, researchers have regarded local dynamism as the result of the actions of certain entrepreneurs. If this were the case, how could we explain the simultaneous presence of winning , stagnating or declining areas with very similar socioeconomic profiles within the same region? Departing from this restrictive and somewhat inadequate approach, Pierre-André Julien considers entrepreneurship as a collective behaviour specifically related to the dynamism of the milieu in which it develops. The author introduces a complex, innovative theory of local entrepreneurship, demonstrating that the emergence of new ventures and the development of existing enterprises cannot be understood without taking into account certain factors: locale, social capital, networking and entrepreneurial culture within a given area are all crucial to entrepreneurial growth. Expanding upon this theory, the book demonstrates how entrepreneurship can be fostered in order to support collective development. Various forms of partnership among socioeconomic actors are then analysed to highlight the social conventions and entrepreneurial culture that connect and intensify the energies at the root of local dynamism. This highly original book represents a departure from entrepreneurship literature that is largely limited to the study of entrepreneurs behaviour. Its dynamic presentation of holistic theory will prove an extremely absorbing read for those with an academic or professional interest in business and management, entrepreneurship and regional development.

Epistemology of Experimental Gravity - Scientific Rationality Emerald Group Publishing

The evolution of gravitational tests from an epistemological perspective framed in the concept of rational reconstruction of Imre Lakatos, based on his methodology of research programmes. Unlike other works on the same subject, the evaluated period is very extensive, starting with Newton's natural philosophy and up to the quantum gravity theories of today. In order to explain in a more rational way the complex evolution of the gravity concept of the last century, I propose a natural extension of the methodology of the research programmes of Lakatos that I then use during the paper. I believe that this approach offers a new perspective on how evolved over time the concept of

gravity and the methods of testing each theory of gravity, through observations and experiments. I argue, based on the methodology of the research programmes and the studies of scientists and philosophers, that the current theories of quantum gravity are degenerative, due to the lack of experimental evidence over a long period of time and of self-immunization against the possibility of falsification. Moreover, a methodological current is being developed that assigns a secondary, unimportant role to verification through observations and/or experiments. For this reason, it will not be possible to have a complete theory of quantum gravity in its current form, which to include to the limit the general relativity, since physical theories have always been adjusted, during their evolution, based on observational or experimental tests, and verified by the predictions made. Also, contrary to a widespread opinion and current active programs regarding the unification of all the fundamental forces of physics in a single final theory, based on string theory, I argue that this unification is generally unlikely, and it is not possible anyway for a unification to be developed based on current theories of quantum gravity, including string theory. In addition, I support the views of some scientists and philosophers that currently too much resources are being consumed on the idea of developing quantum gravity theories, and in particular string theory, to include general relativity and to unify gravity with other forces, as long as science does not impose such research programs. Dynamics of Industrial Revolution 4.0: Digital Technology Transformation and Cultural Evolution Hassell Street Press

Susan Sontag: An Annotated Bibliography catalogues the works of one of America's most prolific and important 20th century authors. Known for her philosophical writings on American culture, topics left untouched by Sontag's writings are few and far between. This volume is an exhaustive collection that includes her novels, essays, reviews, films and interviews. Each entry is accompanied by an annotated bibliography.

University of Michigan Press

This volume explores communication and its implications on interpretation, vagueness, multilingualism, and multiculturalism. It investigates cross-cultural perspectives with original methods, models, and arguments emphasizing national, EU, and international perspectives. Both traditional fields of investigations along with an emerging new field (Legal Visual Studies) are discussed. Communication addresses the necessity of an ongoing interaction between jurilinguists and legal professionals. This interaction requires persuasive, convincing, and acceptable reasons in justifying transparency, visual analyses, and dialogue with the relevant audience. The book is divided into five complementary sections: Professional Legal Communication; Legal Language in a Multilingual and Multicultural Context; Legal Communication in the Courtroom; Laws on Language and Language Rights; and Visualizing Legal Communication. The book shows the diversity in the understanding and practicing of legal communication and paves the way to an interdisciplinary and cross-cultural operation in our common understanding of legal communication. This book is suitable for advanced students in Linguistics and Law, and for academics and researchers working in the field of Language and Law and jurilinguists.

Practices of Polish Butō Dancers Springer Science & Business Media

The book discusses the practices of Polish butō dancers. The author produces a generalised account of butō training. She explores various body-mind practices and so-called butō techniques used by the dancers. Her argument depicts the sequence of three phases which make up the processual structure of butō training: intro, following and embodiment.

Witnesses to History A Compendium of Documents and Writings on the Return of Cultural Objects

This Compendium gives an outline of the historical, philosophical and ethical aspects of the return of cultural objects (e.g. cultural objects displaced during war or in colonial contexts), cites past and present cases (Maya Temple Facade, Nigerian Bronzes, United States of America v. Schultz, Parthenon Marbles and many more) and analyses legal issues (bona fide, relevant UNESCO and UNIDROIT Conventions, Supreme Court Decisions, procedure for requests etc.). It is a landmark publication that bears testament to the ways in which peoples have lost their entire cultural heritage and analyses the issue of its return and restitution by providing a wide range of perspectives on this subject. Essential reading for students, specialists, scholars and decision-makers as well as those

interested in these topics.

A continuation of 1994's groundbreaking *Cartoons*, Giannalberto Bendazzi's *Animation: A World History* is the largest, deepest, most comprehensive text of its kind, based on the idea that animation is an art form that deserves its own place in scholarship. Bendazzi delves beyond just Disney, offering readers glimpses into the animation of Russia, Africa, Latin America, and other often-neglected areas and introducing over fifty previously undiscovered artists. Full of first-hand, never before investigated, and elsewhere unavailable information, *Animation: A World History* encompasses the history of animation production on every continent over the span of three centuries. Volume III catches you up to speed on the state of animation from 1991 to present.

Although characterized by such trends as economic globalization, the expansion of television series, emerging markets in countries like China and India, and the consolidation of elitist auteur animation, the story of contemporary animation is still open to interpretation. With an abundance of first-hand research and topics ranging from Nickelodeon and Pixar to modern Estonian animation, this book is the most complete record of modern animation on the market and is essential reading for all serious students of animation history. Key Features Over 200 high quality head shots and film stills to add visual reference to your research Detailed information on hundreds of never-before researched animators and films Coverage of animation from more than 90 countries and every major region of the world Chronological and geographical organization for quick access to the information you're looking for

This book highlights the multiple ways that digital technologies are being used in everyday contexts at home and school, in communities, and across diverse activities, from play to web searching, to talking to family members who are far away. The book helps readers understand the diverse practices employed as children make connections with digital technologies in their everyday experiences. In addition, the book employs a framework that helps readers easily access major themes at a glance, and also showcases the diversity of ideas and theorisations that underpin the respective chapters. In this way, each chapter stands alone in making a specific contribution and, at the same time, makes explicit its connections to the broader themes of digital technologies in children's everyday lives. The concept of digital childhood presented here goes beyond a sociological reading of the everyday lives of children and their families, and reflects the various contexts in which children engage, such as preschools and childcare centres.

Decolonizing Colonial Heritage explores how different agents practice the decolonization of European colonial heritage at European and extra-European locations. Assessing the impact of these practices, the book also explores what a new vision of Europe in the postcolonial present could look like. Including contributions from academics, artists and heritage practitioners, the volume explores decolonial heritage practices in politics, contemporary history, diplomacy, museum practice, the visual arts and self-generated memorial expressions in public spaces. The comparative focus of the chapters includes examples of internal colonization in Europe and extends to former European colonies, among them Shanghai, Cape Town, and Rio de Janeiro. Examining practices in a range of different contexts, the book pays particular attention to sub-national actors whose work is opening up new futures through their engagement with decolonial heritage practices in the present. The volume also considers the challenges posed by applying decolonial thinking to existing understandings of colonial heritage. *Decolonizing Colonial Heritage* examines the role of colonial heritage in European memory politics and heritage diplomacy. It will be of interest to academics and students working in the fields of heritage and memory studies, colonial and imperial history, European studies, sociology, cultural studies, development studies, museum studies, and contemporary art.
