Mathematics for the International Student Mathematics HL (core) for Use with IB Diploma Programme : Exam Preparation & Practice Guide Mathematics for the International Student 9 (MYP 4) : for Use with IB Middle Years Programme Mathematics for the IB MYP 3 Communicating about student achievement requires accurate, consistent and meaningful grades. Educators interested in examining and improving grading practices should ask the following questions: * Am I confident that students in my classroom receive consistent, accurate and meaningful grades that

support learning? * Am I confident that the grades I assign students accurately reflect my school or district's published performance standards and desired learning outcomes? In many schools, the answers to these questions often range from "not very" to "not at all." When that's the case, grades are "broken" and teachers and schools need a "repair kit" to fix them. *A Repair Kit for Grading: 15 Fixes for Broken Grades, 2/e* gives teachers and administrators 15 ways to make the necessary repairs. This book takes a fresh look at programs for advanced studies for high school students in the United States, with a particular focus on the Advanced Placement and the International Baccalaureate programs, and asks how advanced studies can be significantly

improved in general. It also examines two of the core issues surrounding these programs: they can have a profound impact on other components of the education system and participation in the programs has become key to admission at selective institutions of higher education. By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs, this report provides teachers, parents, curriculum developers, administrators, college science and mathematics faculty, and the educational research community with a detailed assessment that can be used to guide change within advanced study programs.
