forced: debate on Chinese education China's Higher Education Reform

The past decade has seen radical reform of all levels of China's education system as it attempts to meet changing economic and social needs and aspirations: this has included transformation of university curricula, pedagogy and evaluation measures, rapidly increasing joint research and degree programmes between Chinese universities and universities abroad, and very large numbers of Chinese students studying at universities outside China.

China's Higher Education Reform and Internationalisation ... China's higher education sector is expected to benefit as the government rolls out its 14th Five-Year Plan (FYP) during a Communist Party plenum this week. The policy, which will determine the direction the country takes post-pandemic, from 2021 to 2025, is likely to include greater investments in science, technology, innovation and research-industry ties.

China's five-year plan to step up HE modernisation impetus ... The defined missions of the Development Plan for higher education are to greatly improve the overall quality of education; to advance science, technologies and culture; to accelerate China's modernization process; and to make China a great nation with strong higher education. The goals of the reform are to advance teaching and scientific research; promote collaboration between universities and research institutions so as to speed discovery and innovation; enhance the ability to serve ...
