LUCAS ROWAN

Tourism, Cultural Heritage and Urban Regeneration
 Routledge

This volume provides an accessible overview of cultural tourism in southern Africa. It examines the utilisation of culture in southern African tourism and the related impacts, possibilities and challenges from deep and wide-ranging perspectives. The chapters use case studies to showcase some of the cultural tourism which occurs in the region and link to concepts such as

authenticity, commodification, the tourist gaze and 'Otherness', heritage, sustainability and sustainable livelihoods. The authors scrutinise both positive and negative impacts of cultural tourism throughout the book and explore issues including the definition of community, ethical considerations, empowerment, gender, participation and inequality. The book will be a useful resource for students and researchers of tourism, geography, anthropology and cultural studies.

The Economics and Finance of Cultural Heritage Springer Nature

Heritage tourism has become an increasingly significant component of the global tourism industry, particularly in countries striving to diversify away from sea, sand and sun. This growth has had profound influences on the presentation and representation of both tangible and intangible heritage within tourism context. The concept of heritage continues to evolve with its fast-changing political, economic and socio-cultural surroundings. Therefore it is essential that heritage tourism engages with the new form of globalised communities and societies, which have

become more assimilated to each other but yet strive to sustain their own distinctive locality. This book aims to offer a thorough critical examination and systematic evaluation of the unique dynamics of heritage and tourism development from both social sciences and management perspectives. It incorporates both global and local perspectives in theorising and managing heritage tourism. While focusing on reviewing and analysing key academic concepts and debates including authenticity, commodification, globalisation and heritage interpretation, this book also discusses and evaluates topical issues such as sustainable development, marketing strategies and digital technologies including social media. It theoretically locates heritage discourses in the analysis of heritage tourism development and management drawing on various perspectives, from tourism, heritage studies, sociology, anthropology, politics and geography to management and marketing studies. Including case studies of topical concerns, controversies and

challenges it will encourage readers to develop a new and insightful understanding of the dialectical relationship between heritage and tourism development. This book is essential reading for students studying tourism, heritage studies, cultural studies as well as related disciplines.

Marketing Cultural and Heritage Tourism

Routledge

The perceived quality of a destination's cultural offering has long been a significant factor in determining tourist choices of destination. More recently, the need to present touristic offerings that include cultural experiences and heritage has become widely recognised, that this aspect of the tourism experience is an important differentiator of destinations, as well as being amongst the most manageable. This has also led to an increase in the management of such experiences through special exhibitions, events and festivals, as well as through ensuring more routine and controlled access to heritage sites. Reflecting the increasing application of cultural heritage as a driver for tourism and development,

this book provides for the first time a cohesive volume on the subject that is theoretically rich, practically applied and empirically grounded. Written by expert scholars and practitioners in the field, the book covers a broad range of theoretical perspectives of cultural heritage tourism; regeneration, policy, stakeholders, marketing, socio-economic development, impacts, sustainability, volunteering and ICT. It takes a broad view, integrating international examples of sites, monuments as well as intangible cultural heritage, motor vehicle heritage events and modern art museums. This significant book furthers knowledge of the theory and application of tourism within the context of cultural heritage and will be of interest to students, researchers and practitioners in a range of disciplines.

Complexities, Management and Practices

Rowman & Littlefield

Cultural Tourism remains the only book to bridge the gap between cultural tourism and cultural and heritage management. The first edition illustrated how heritage and tourism

goals can be integrated in a management and marketing framework to produce sustainable cultural tourism. The current edition takes this further to base the discussion of cultural tourism in the theory and practice of cultural and heritage management (CM and CHM), under the understanding that for tourism to thrive, a balanced approach to the resource base it uses must be maintained. An 'umbrella approach' to cultural tourism represents a unique feature of the book, proposing solutions to achieve an optimal outcome for all sectors. Reflecting the many important developments in the field this new edition has been completely revised and updated in the following ways:

- New sections on tangible and intangible cultural heritage and world heritage sites.
- Expanded material on cultural tourism product development, the cultural tourism market and consumer behaviour, planning and delivery of exceptional experiences
- New case studies throughout drawn from cultural attractions in developing countries such as Southeast Asia, China,

South Africa and the Pacific as well as from the developed world, particularly the United States, Britain, Japan, Singapore, Australia and Canada. Written by experts in both tourism and cultural heritage management, this book will enable professionals and students to gain a better understanding of their own and each other's roles in achieving sustainable cultural tourism. It provides a blueprint for producing top-quality, long-term cultural tourism products. *How to Make Tourist Attractions a Regional Economic Resource* Univ of California Press

The complex relationship between heritage places and people, in the broadest sense, can be considered dialogic, a communicative act that has implications for both sides of the 'conversation'. This is the starting point for *Heritage and Tourism*. However, the 'dialogue' between visitors and heritage sites is complex. 'Visitors' have, for many decades, become synonymous with 'tourists' and the tourism industry and so the dialogic relationship between heritage place and tourists has produced a powerful critique of this

often contested relationship. Further, at the heart of the dialogic relationship between heritage places and people is the individual experience of heritage where generalities give way to particularities of geography, place and culture, where anxieties about the past and the future mark heritage places as sites of contestation, sites of silences, sites rendered political and ideological, sites powerfully intertwined with representation, sites of the imaginary and the imagined. Under the aegis of the term 'dialogues' the heritage/tourism interaction is reconsidered in ways that encourage reflection about the various communicative acts between heritage places and their visitors and the ways these are currently theorized, so as to either step beyond - where possible - the ontological distinctions between heritage places and tourists or to re-imagine the dialogue or both. *Heritage and Tourism* is thus an important contribution to understanding the complex relationship between heritage and tourism.

Cultural Heritage and Tourism Scientific e-Resources
 "One of the most salient forms of modern-day tourism is based on the heritage of humankind. The majority of all global travel entails some element of the cultural past, as hundreds of millions of people visit cultural attractions, heritage festivals, and historic places each year. The book delves into this vast form of tourism by providing a comprehensive examination of its issues, current debates, concepts and practices. It looks at the social, physical and economic impacts, which cause destinations, site managers and interpreters to consider not only how to plan and manage resources but also how to portray the past in ways that are acceptable, accurate, accessible and politically relevant. In the process, however, the depth of heritage politics, the authenticity and inauthenticity of place and experience, and the urgent need to protect

living and built cultures are exposed. The book explores these and many other current issues surrounding the management of cultural resources for tourism. In order to help students relate concepts to real-world situations it combines theory and practice, is student learning oriented, is written accessibly for all readers and is empirically rich."--Pub. website.
The Political Nature of Cultural Heritage and Tourism Routledge
 This volume provides a comprehensive account of the valuable tangible and intangible benefits of the development of heritage tourism. Tourism development is widely acknowledged as a crucial tool to foster the development of rural and urban areas. To this end, this book presents nine case studies from international authors that reflect how tourism development is helpful—economically, socially, and otherwise—for community capacity building. The case studies from the countries of Spain, Portugal, Australia, Dubai, Bangladesh, Nigeria, and India demonstrate the uses of various management strategies

and methods for rural and urban areas, and cover some of the major topics related to community-based tourism, community capacity building, and community participation in developing heritage tourism. Chapters consider the conservation of heritage resources and tourism promotion of destinations that provide opportunities to local communities to strengthen their economies and social standards. Key features: water conservation in urban landscape as natural, cultural, and historic tourism resources spiritual and religious heritage tourism cultural tourism and the support of public and private funds economic development and its effect on cultural and natural resources public-private-partnerships to ensure sustainable development talent management challenges tribal tourism and tribal festivals, which are the mirror of their culture and could be major tourist attractions The methodologies and proposed management strategies discussed by the book's researchers and professors will be valuable for policymakers,

administrators, tourism promoters, researchers, and academicians who are involved with the tourism industry.

Mining Heritage and Tourism Channel View Publications

Every place has a story to tell, often found in historic sites or cultural traditions of the people who settled or currently live in a community, city, region or state. When these stories and places are shared with visitors, this activity becomes what is known as cultural heritage tourism. Success and sustainability in this growing industry segment requires careful planning and adequate resources.

Cultural Heritage Tourism: Five Steps for Success and Sustainability provides detailed instruction through a proven five-step process to help planners, managers and community leaders attract visitors and their spending to your cultural heritage site, attraction, event or destination. Learn how to assess, plan for, develop, market, fund, manage, and measure cultural heritage for growth and sustainability. Refer to the best practices and case studies from across the country as examples for replication and reference.

Use the sample documents and resource lists to jumpstart your cultural heritage tourism program, and monitor and measure the efforts. This book walks you through every step, from inception to evaluation.

The Partnership Between Tourism and Cultural Heritage Management Routledge

Cultural Heritage and Tourism in the Developing World is the first book of its kind to synthesize global and regional issues, challenges, and practices related to cultural heritage and tourism, specifically in less-developed nations. The importance of preservation and management of cultural heritage has been realized as an increasing number of tourists are visiting heritage attractions. Although many of the issues and challenges developing countries face in terms of heritage management are quite different from those in the developed world, there is a lack of consolidated research on this important subject. This seminal book tackles the issues through theoretical discourse, ideas and problems that underlay heritage tourism in terms of conservation,

management, economics and underdevelopment, politics and power, resource utilization, colonialism, and various other antecedent notions that have shaped the development of heritage tourism in the less-developed regions of the world. The book is comprised of two sections. The first section highlights the broader conceptual underpinnings, debates, and paradigms in the realm of heritage tourism in developing regions. The chapters of this section examine heritage resources and the tourism product; protecting heritage relics, places and traditions; politics of heritage; and the impacts of heritage tourism. The second section examines heritage tourism issues in specific regions, including the Pacific Islands, South Asia, the Caribbean, China and Northeast Asia, South-East Asia, Sub-Saharan Africa, Central and Eastern Europe, the Middle East and North Africa, and Latin America. Each region has unique histories, cultures, political traditions, heritages, issues and problems, and the way these issues are tackled vary from place to place. This volume develops

frameworks that are useful tools for heritage managers, planners and policy-makers, researchers, and students in understanding the complexity of cultural heritage and tourism in the developing world. Unlike many other books written about developing regions, this book provides insiders' perspectives, as most of the empirical chapters are authored by the individuals who live or have lived in the various regions and have a greater understanding of the region's culture, history, and operational frameworks in the realm of cultural heritage. The richness of this 'indigenous' or expert knowledge comes through as each regional overview elucidates the primary challenges and opportunities facing heritage and tourism managers in the less affluent areas of the world.

Global and Local

Perspectives Routledge

The Asia Pacific region's enormous diversity of living cultures and preserved heritage sites has significant appeal to many tourists. However tourism has grown so rapidly that many issues associated with the

incorporation of cultural and heritage experiences in tourist itineraries (such as authenticity verses commodification, exploitation of national cultures, impacts on local communities, and the management of heritage resources) have not been adequately addressed and must be debated. This revealing book reviews recent developments in cultural and heritage tourism in the Asia Pacific region and provides a discussion on how communities have faced and overcome significant challenges to develop and market their culture and heritage resources. A range of models and case studies are used to deepen the reader's understanding of heritage and cultural issues, to illustrate many of the more controversial issues, and to examine new evaluative, and planning tools. This book is a special issue of the Asia Pacific Journal of Tourism Research.

UNESCO, World Heritage, and Tourism Routledge

Not all World Heritage Sites have people living within or close by their boundaries, but many do. The designation of World Heritage status brings a new dimension to the

functioning of local communities and particularly through tourism. Too many tourists accentuated by the World Heritage label, or in some cases not enough tourists, despite anticipation of increased numbers, can act to disrupt and disturb relations within a community and between communities. Either way, tourism can be seen as a form of activity that can generate interest and concern as it is played out within World Heritage Sites. But the relationships that World Heritage Sites and their consequent tourism share with communities are not just a function of the number of tourists. The relationships are complex and ever changing as the communities themselves change and are built upon long-standing and wider contextual factors that stretch beyond tourism. This volume, drawing upon a wide range of international cases relating to some 33 World Heritage Sites, reveals the multiple dimensions of the relations that exist between the sites and local communities. The designation of the sites can create, obscure and heighten the power relations between

different parts of a community, between different communities and between the tourism and the heritage sector. Increasingly, the management of World Heritage is not only about the management of buildings and landscapes but about managing the communities that live and work in or near them.

Cultural Heritage and Tourism in the Developing World Kanishka Publishers

The tourism industry continues to evolve as people's interests have changed. There has been a shift in the type of experiences sought when people travel. One of the reasons behind this is the desire for travelers to be more engaged as they travel and get to know a community through their culture and heritage. Tourists are craving authenticity. In an environment of chain restaurants, hotels, and stores people are seeking the differences of what communities offer. This book will be a guide to how a community can sustainably develop their cultural and tourism resources in order to attract and retain the sought-after cultural and heritage tourist.

Cultural and Heritage Tourism and

Management Routledge

Today, tourism has become one of the largest and fastest growing industries accounting for nearly 700 million people travelling all over the world and spending more than 7.4 trillion US dollars. Besides promoting people-to-people contacts, ethnic and cultural understanding, mutual appreciation and co-operation and thereby promoting peace, tourism provides unlimited opportunities for employment generation, social and economic upliftment of the people and contributing to the economies of the nations. Cultural heritage tourism has a number of objectives that must be met within the context of sustainable development such as; the conservation of cultural resources, accurate interpretation of resources, authentic visitors experience, and the stimulation of the earned revenues of cultural resources. Tourism is an important issue at world heritage sites. Most managers at natural sites regard it as a key issue. Important features of world heritage tourism are local protection, conservation and restoration. Such a tourism also requires

special training management skills. Different visitor management strategies, interpretation and site promotional activities have to be organised. Culture and heritage have also become major forces in economic and urban revitalisation. As cultural tourism becomes an increasingly important factor for tourist destinations involved in developing their cultural capital in order to attract more international visitors, there is value in assessing how cultural and heritage tourists can be better understood and serviced through marketing, planning and programming with local and regional communities. This book also provides readers with global charters developed for promoting cultural tourism and for preserving heritage sites. Focus lies on ICOSM and WHC. World Heritage Sites, identified and conserved around the world, have been listed and the initiatives to preserve cultural sites and conserve heritage sites.

This three volume

reference series provides an authoritative and comprehensive set of volumes collecting together the most influential articles and papers on tourism, heritage and culture. The papers have been selected and introduced by Dallen Timothy, one of the leading international scholars in tourism research. The first volume 'Managing Heritage and Cultural Tourism Resources' deals primarily with issues of conservation, interpretation, impacts of tourism and the management of those impacts. Sold individually and as a set, this series will prove an essential reference work for scholars and students in geography, tourism and heritage studies, cultural studies and beyond. *Resilience, Authenticity and Digital Heritage Tourism* Routledge

With the question, "What does it mean to show?", the author explores the agency of display in museums and tourist attractions. She looks at how objects are made to perform their meaning by being collected and how techniques of display, not just the things shown, convey a powerful message.

Contemporary Issues in Cultural Heritage

Tourism Routledge

The perceived quality of a destination's cultural offering has long been a significant factor in determining tourist choices of destination. More recently, the need to present touristic offerings that include cultural experiences and heritage has become widely recognised, that this aspect of the tourism experience is an important differentiator of destinations, as well as being amongst the most manageable. This has also led to an increase in the management of such experiences through special exhibitions, events and festivals, as well as through ensuring more routine and controlled access to heritage sites. Reflecting the increasing application of cultural heritage as a driver for tourism and development, this book provides for the first time a cohesive volume on the subject that is theoretically rich, practically applied and empirically grounded. Written by expert scholars and practitioners in the field, the book covers a broad range of theoretical perspectives of cultural heritage tourism; regeneration, policy,

stakeholders, marketing, socio-economic development, impacts, sustainability, volunteering and ICT. It takes a broad view, integrating international examples of sites, monuments as well as intangible cultural heritage, motor vehicle heritage events and modern art museums. This significant book furthers knowledge of the theory and application of tourism within the context of cultural heritage and will be of interest to students, researchers and practitioners in a range of disciplines.

An Introduction

Routledge

Global Tourism: Cultural Heritage and Economic Encounters explores the connections among economy, sustainability, heritage, and identity that tourism and related processes make explicit. It illustrates how emerging theories of the economics of tourism can lead to the rethinking of traditionally non-touristic enterprises. *Cultural and Heritage Tourism* Lexington Books

Cultural heritage attractions are, by their very nature, unique and fragile. It is therefore important that tourism authorities study how best to develop such sites,

whilst at the same time preserving them for the long-term. The aim of this conference was to provide a forum for countries from all over the world to present case studies on successful policies, guidelines and strategies that would help the Asia-Pacific region take advantage of its cultural heritage in developing its tourism industry.

Contemporary Issues in Cultural Heritage Tourism
