*The Bass Handbook* CRC Press

The #1 New York Times bestselling and Newbery Award-winning novel *The One and Only Ivan* is now a major motion picture streaming on Disney+ This unforgettable novel from renowned author Katherine Applegate celebrates the transformative power of unexpected friendship. Inspired by the true story of a captive gorilla known as Ivan, this illustrated book is told from the point of view of Ivan himself. Having spent twenty-seven years behind the glass walls of his enclosure in a shopping mall, Ivan has grown accustomed to humans watching him. He hardly ever thinks about his life in the jungle. Instead, Ivan occupies himself with television, his friends Stella and Bob, and painting. But when he meets Ruby, a baby elephant taken from the wild, he is forced to see their home, and his art, through new eyes. In the tradition

of timeless stories like *Charlotte's Web* and *Stuart Little*, Katherine Applegate blends humor and poignancy to create an unforgettable story of friendship, art, and hope. *The One and Only Ivan* features first-person narrative; author's use of literary devices (personification, imagery); and story elements (plot, character development, perspective). This acclaimed middle grade novel is an excellent choice for tween readers in grades 5 to 8, for independent reading, homeschooling, and sharing in the classroom. Plus don't miss *The One and Only Bob*, Katherine Applegate's return to the world of Ivan, Bob, and Ruby! [The Kalam Cosmological Argument, Volume 2](#) Lulu.com This double volume constitutes the thoroughly refereed post-conference proceedings of the 25th International Conference on Financial Cryptography and Data Security, FC 2021, held online due to COVID-19, in March 2021. The 47 revised full papers and 4 short papers together with 3 as Systematization of Knowledge (SoK) papers were carefully selected and reviewed from 223 submissions. The accepted papers were organized according to

their topics in 12 sessions: Smart Contracts, Anonymity and Privacy in Cryptocurrencies, Secure Multi-Party Computation, System and Application Security, Zero-Knowledge Proofs, Blockchain Protocols, Payment Channels, Mining, Scaling Blockchains, Authentication and Usability, Measurement, and Cryptography.

11th International Joint Conference, IJCCI 2019, Vienna, Austria, September 17-19, 2019, Revised Selected Papers Ladylit Publishing

Designed to coordinate page-by-page with the Lesson Books, each Theory Book contains enjoyable games and quizzes that reinforce the principles presented in the Lesson Books. Students can increase their musical understanding while they are away from the keyboard.

**The Cornell Alumni News** Springer Nature  
Children's Creative Music-Making with Reflexive Interactive Technology discusses pioneering experiments conducted with young children using a new generation of music software for improvising and composing. Using artificial intelligence techniques, this software captures the children's musical style and interactively reflects it in its responses. The book describes the potential of these applications to enhance children's agency and musical identity by reflecting players' musical inputs, storing and creating variations on them. Set in the broader context of current music education research, it addresses the benefits and challenges of incorporating music technologies in primary and pre-school education. It is comprised of six main chapters, which cover the creation of children's own music and their musical selves, critical thinking skills and learner agency, musical

language development, and emotional intent during creative music-making. The authors provide a range of straight-forward techniques and strategies, which challenge conceptions of 'difficult-to-use music technologies' in formal music education. These are supported by an informative collection of practitioner vignettes written by teachers who have used the software in their classrooms. Not only are the teachers' voices heard here, but also those of children as they discover some of the creative possibilities of music making. The book also provides free access to a companion website with teacher forums and a large bank of activities to explore. A toolkit serves as a database of the teaching activities in which MIROR applications have been used and provides a set of useful ideas regarding its future use in a variety of settings. This book demonstrates that music applications based on artificial intelligence techniques can make an important contribution to music education within primary and pre-school education. It will be of key interest to academics, researchers and postgraduate students in the fields of music education, music technology, early years and primary education, teaching and learning, and teacher educators. It will also serve as an important point of reference for Early Years and Primary practitioners.

Subject Guide to Children's Books in Print ePublishing Works!  
The ancient kalam cosmological argument maintains that the series of past events is finite and that therefore the universe began to exist. Two recent scientific discoveries have yielded plausible prima facie physical evidence for the beginning of the universe. The expansion of the universe points to its beginning-to a Big Bang-as one retraces the universe's expansion in time. And

the second law of thermodynamics, which implies that the universe's energy is progressively degrading, suggests that the universe began with an initial low entropy condition. The kalam cosmological argument-perhaps the most discussed philosophical argument for God's existence in recent decades-maintains that whatever begins to exist must have a cause. And since the universe began to exist, there must be a transcendent cause of its beginning, a conclusion which is confirmatory of theism. So this medieval argument for the finitude of the past has received fresh wind in its sails from recent scientific discoveries. This collection reviews and assesses the merits of the latest scientific evidences for the universe's beginning. It ends with the kalam argument's conclusion that the universe has a cause-a personal cause with properties of theological significance.

### **Scientific Approaches to the Philosophy of Religion**

Routledge

First published in 1999, this volume is the first full-length study to deal with the life and music of Orlando Gibbons since E.H. Fellowes's short book, originally published in 1923. John Harley investigates in detail the family and musical background from which Orlando Gibbons emerged, and gives a fascinating account of the activities of his father, William Gibbons, as a wait in Oxford and Cambridge. He traces, too, the activities of Orlando's brothers - Edward, who was the master of the choristers at King's College, Cambridge and later at Exeter Cathedral; Ferdinando, who may have taken over from his father as head of the Cambridge waits, and who became a wait in Lincoln; and Ellis, who contributed two madrigals to Thomas Morley's collection of 1601, *The Triumphs of Oriana*. Attention naturally focuses

principally on Orlando Gibbons. A full record is given of his remarkably youthful appointment as an organist of the Chapel Royal (he was probably less than twenty at the time) and of his life at court. His additional appointments as one of Prince Charles's musicians and as organist of Westminster Abbey are also described, as is his sudden and premature death in his early forties. Gibbons's music is carefully examined in a series of chapters dealing with his pieces for keyboard and for viols, his songs, his full and verse anthems, and his works for the Anglican liturgy. His development as a composer within these genres is followed, and the character of particular pieces is considered. John Harley concludes that whereas, at one time, Gibbons 'tended to be admired as a successor to Tallis and Byrd, working in a style not essentially different from theirs', it is now 'easier to view him as a pioneer, whose work was cut short by his untimely death'. Orlando Gibbons's son Christopher was only a child when his father died, but he became one of the foremost composers and keyboard players of his generation, writing and performing chamber works and music for the stage during the Commonwealth. Following the Restoration of King Charles II, Christopher Gibbons gained his father's former posts at the Chapel Royal and Westminster Abbey, for which establishments he wrote a number of anthems. His importance is recognized by the inclusion of a long chapter on his life and works.

Three Full-Length Murder Mystery Thrillers Featuring Female Sleuth Thea Kozak from Author, Kate Flora —Maine, U.S.A.— Book 1: Chosen for Death When Thea Kozak's little sister is murdered in a picturesque Maine town, the police have no leads, and her grieving parents are eager to put everything behind them. Thea—"little mother" to her adopted sister, Carrie, refuses to back down. Not when she can do one more thing for Carrie: find the killer and get justice for her little sister. Book 2: Death in a Funhouse Mirror Thea Kozak thought her amateur detective days were over until she met a woman who had it all, and then some. Helene Streeter, the perfect wife, mother, and consummate professional is brutally murdered, leaving friends and family with more questions than answers. Helene's daughter—Thea's old college roommate—begs for her help, plunging Thea into a web of deceit and madness. Book 3: Death at the Wheel Thea's mother introduces her to Julie Bass, a young widow whose husband died in a horrific accident at the local auto racetrack.

Julie is the woman Thea's mother wants her to be—married to a suitable man and producing adorable children. Thea brings her amateur detective skills to bear when the racetrack "accident" proves to be murder and Julie is arrested. "Thea Kozak is a terrific, in-your-face, stand-up gal...Stephanie Plum and Thea Kozak would have a lot to say to each other." ~Janet Evanovich, NYT Bestselling Author "A red-hot start to this new series." ~Kirkus Reviews "Complex heroine, simple plot and natural prose..." ~Library Journal "A page-turner!" ~Mystery Scene THE THEA KOZAK MYSTERY SERIES, in order i>Chosen for Death Death in a Funhouse Mirror Death at the Wheel An Educated Death Death in Paradise Liberty or Death Stalking Death Death Warmed Over Schooled in Death Death Comes Knocking Death Sends a Message

This book constitutes the proceedings of the 19th International Conference on Unconventional Computation and Natural Computation, UCNC 2021, held in Espoo, Finland, in October 2021. The 12 full papers presented were carefully reviewed and selected from 19 submissions. The UCNC conference series covers fundamental research into computation that goes beyond the standard Turing model, including both computational models and methods inspired by nature, and the computational characteristics natural processes.

The Computer Science Success series is based on Windows 10 and Office 2016. This series is specially designed for providing a vast theoretical and practical knowledge of computers to the students. It is the most comprehensive series in which activity

and tool-based approach is incorporated. Each chapter in the book begins with an engaging introduction followed by an activity-based approach to learning, which is supported with an ample number of diagrams, pictures, and relevant screenshots. The exercises in each chapter have sufficient practical and activity-based questions. Lots of interesting software like Office 2016 (like Word, Excel, PowerPoint, and Access), Adobe Photoshop CS6, Adobe Flash Professional CS6, QBASIC, Scratch, and HTML have been taught in these books. A lot about the Internet, some knowledge about Cloud Computing, C++ and Python are also covered. Core features of the Computer Science Success series (for Classes 6 to 8) are:

- Learning Objectives: Describes the goals required to be achieved by the end of the chapter.
- Chapter Contents: Concepts are explained to strengthen the knowledge base of the students.
- Know More: Gives extra and useful information on the topic being covered.
- Fact: Includes historical facts about the topic being covered.
- Top Tips: Gives a shortcut method of the topic being covered.
- Activity: Encourages the students to explore some real-life use of the topic being covered.
- Summary: Gives a brief summary of the topics being taught in the chapter.
- Exercises: Includes a variety of questions to evaluate the theoretical knowledge of the students.
- Activity Zone: Includes the following activities:
  - !• Puzzle: Includes crosswords or mazes to focus on some important terms included in the chapter.
  - !• Lab Session: Gives instructions to the students to perform various tasks in the lab.
  - !• Group Discussion: Encourages the students to have discussions on various topics.
  - !• Project Work: Assigns various tasks to the students to apply the concepts already learned

*The Walden School Musicianship Course* CRC Press

This indispensable handbook helps players of all levels produce better, more creative, and more varied bass lines. Divided into two sections - Playing Your Bass and Knowing Your Bass - it covers everything from tuning, reading music, scales and chords, and advanced techniques to tips on buying and upgrading a budget bass and troubleshooting. Along with a list of suggested listening and reference guide, this book provides an unrivalled digest of bass information that might otherwise take an entire career to amass. It begins with a 'Basics' section that assumes nothing about your ability. 'Scales and Chords' shows you how to add other notes to your bass lines and includes exercises to extend musical knowledge and train your ear. It develops your understanding of the links between chords and scales, helping you to play from a chord chart or to improvise when required. Most of the ideas and techniques can be achieved without reading music at all, although the information is there for those who can. The 'Reading music' section develops an intuitive approach using pattern recognition rather than the usual mechanical (counting) method, and introduces a skill that may

eventually become important to your professional career. Advanced techniques includes harmonics and fretless bass.

Orlando Gibbons and the Gibbons Family of Musicians Simon and Schuster

This present book includes a set of selected revised and extended versions of the best papers presented at the 11th International Joint Conference on Computational Intelligence (IJCCI 2019) – held in Vienna, Austria, from 17 to 19 September 2019. The authors focus on three outstanding fields of Computational Intelligence through the selected panel, namely Evolutionary Computation, Fuzzy Computation and Neural Computation. Besides presenting the recent advances of the selected areas, the book aims to aggregate new and innovative solutions for confirmed researchers and, on the other hand, to provide a source of information and/or inspiration for young interested researchers or learners in the ever-expanding and current field of Computational Intelligence. It constitutes a precious provision of knowledge for individual researchers as well as represents a valuable sustenance for collective use in academic libraries (of universities and engineering schools) relating innovative techniques in various fields of applications.
