Jon pensait avoir largement de répondre au dernier sms de sa femme. Mais alors qu'il prend son petit-déjeuner dans le hall de l'Hotel Sixième en Suisse après une conférence, le monde se rappelle à lui avec d'atroces nouvelles. Washington DC a été effacée par une bombe nucléaire. Plus de nouvelles de New-York. Londres s'est éteinte. Berlin aussi. Voilà ce qu'il a le temps de comprendre avant que les média et les réseaux sociaux ne soient coupés à leur tour. Avant que le ciel ne se couvre de nuages oranges. Deux mois plus tard, ils sont vingt survivants réfugiés dans cet hôtel connu pour son histoire teintée de suicides et de meurtres. Jon et ses compagnons d'infortune essaient de maintenir un semblant de quotidien. Jusqu'au jour où ils découvrent le corps d'une petite fille. Les provisions s'amenuisent, les tensions s'affutent. Et si finalement le danger n'était pas à l'extérieur? Vingt survivants. Un hôtel. Un meurtre.

Can I get a "ramen" from the congregation?! Behold the Church of the Flying Spaghetti Monster (FSM), today's fastest growing carbohydrate-based religion. According to church founder Bobby Henderson, the universe and all life within it were created by a mystical and divine being: the Flying Spaghetti Monster. What drives the FSM's devout followers, a.k.a. Pastafarians? Some say it's the assuring touch from the FSM's "noodly appendage." Then there are those who love the worship service, which is conducted in pirate talk and attended by congregants in dashing buccaneer

garb. Still others are drawn to the Church's flimsy moral standards, religious holidays every Friday, or the fact that Pastafarian heaven is way cooler: Does your heaven have a Stripper Factory and a Beer Volcano? Intelligent Design has finally met its match—and it has nothing to do with apes or the Olive Garden of Eden. Within these pages, Bobby Henderson outlines the true facts—dispelling such malicious myths as evolution ("only a theory"), science ("only a lot of theories"), and whether we're really descended from apes (fact: Humans share 95 percent of their DNA with chimpanzees, but they share 99.9 percent with pirates!) See what impressively credentialed top scientists have to say: "If Intelligent Design is taught in schools, equal time should be given to the FSM theory and the non-FSM theory." —Professor Douglas Shaw, Ph.D. "Do not be hypocritical. Allow equal time for other alternative 'theories' like FSMism, which is by far the tastier choice." —J. Simon, Ph.D. "In my scientific opinion, when comparing the two theories, FSM theory seems to be more valid than classic ID theory." —Afshin Beheshti, Ph.D. Read the book and decide for yourself!

Mister Pip Villard

"Should appeal to all rugged individualists who dream of escape to the forest."—The New York Times Book Review Sam Gibley is terribly unhappy living in New York City with his family, so he runs away to the Catskill Mountains to live in the woods—all by himself. With only a penknife, a ball of cord, forty dollars, and some flint and steel, he intends to survive on his own. Sam learns about courage, danger, and independence during his year in the wilderness, a year that changes his life forever. "An extraordinary book . . . It will be read year after year." —The Horn Book *The Beast in the Jungle* Kendall Hunt

After the trouble starts and the soldiers arrive on Matilda's island, only one white person stays behind. Mr. Watts, whom the kids call Pop Eye, wears a red nose and pulls his wife around on a trolley, and he steps in to teach the children when there is no one else. His only lessons consist of reading from his battered copy of *Great Expectations*, a book by his friend Mr. Dickens. For Matilda, Dickens's hero Pip becomes as real to her as her own mother, and the greatest friendship of her life has begun. Soon Mr. Watts's book begins to inflame the children's imaginations with dreams about Dickens's London and the larger world. But how will they answer when the soldiers demand to know: where is this man named Pip? Set against the stunning beauty of Bougainville in the South Pacific during the civil war in the early 1990s, Lloyd Jones's

breathtaking novel shows what magic a child's imagination makes possible even in the face of terrible violence and what power stories have to fuel the imagination.

In this madcap journey, a bestselling journalist investigates psychopaths and the industry of doctors, scientists, and everyone else who studies them. The Psychopath Test is a fascinating journey through the minds of madness. Jon Ronson's exploration of a potential hoax being played on the world's top neurologists takes him, unexpectedly, into the heart of the madness industry. An influential psychologist who is convinced that many important CEOs and politicians are, in fact, psychopaths teaches Ronson how to spot these high-flying individuals by looking out for little telltale verbal and nonverbal clues. And so Ronson, armed with his new psychopath-spotting abilities, enters the corridors of power. He spends time with a death-squad leader institutionalized for mortgage fraud in Cocksackie, New York; a legendary CEO whose psychopathy has been speculated about in the press; and a patient in an asylum for the criminally insane who insists he's sane and certainly not a psychopath. Ronson not only solves the mystery of the hoax but also discovers, disturbingly, that sometimes the personalities at the helm of the madness industry are, with their drives and obsessions, as mad in their own way as those they study. And that relatively ordinary people are, more and more, defined by their maddest edges.

This remarkable and monumental book at last provides a comprehensive answer to the age-old riddle of whether there are only a small number of 'basic stories' in the world. Using a wealth of examples, from ancient myths and folk tales via the plays and novels of great literature to the popular movies and TV soap

operas of today, it shows that there are seven archetypal themes which recur throughout every kind of storytelling. But this is only the prelude to an investigation into how and why we are 'programmed' to imagine stories in these ways, and how they relate to the inmost patterns of human psychology. Drawing on a vast array of examples, from Proust to detective stories, from the Marquis de Sade to E.T., Christopher Booker then leads us through the extraordinary changes in the nature of storytelling over the past 200 years, and why so many stories have 'lost the plot' by losing touch with their underlying archetypal purpose. Booker analyses why evolution has given us the need to tell stories and illustrates how storytelling has provided a uniquely revealing mirror to mankind's psychological development over the past 5000 years. This seminal book opens up in an entirely new way our understanding of the real purpose storytelling plays in our lives, and will be a talking point for years to come.
