MAXWELL BRIGGS

Biographical, Historical, and Descriptive Taylor & Francis US Illustrations: Numerous B/w Illustrations Description: P.K. Acharya's An Encyclopaedia of Hindu Architecture is a comprehensive work on the technical terminology, now obsolete but then in vogue, of the creators of such epics in stone as those of Sanchi and Konark during the ancient and medieval periods of Indian history. It contains about three thousand terms culled, with indefatigable industry spread over a long span of years, from ancient architectural treatises--Manasara, and Vastu-Sastras : Agamas, Puranas, Brahmanas, Sutras, epics, literary works, epigraphical records and manuscripts in obscure scripts. The terms are arranged in the order of Sanskrit alphabet. A brief rendering in English followed by extensive quotations from various sources and supplemented by line drawings and photographs elucidate every aspect of the term, leaving no room for ambiguity. Two appendices, one giving a sketch of Sanskrit treatises on architecture and the other furnishing a list of historical architects with short notes on their works, are added. This monumental work has remained a standard treatise of reference since its publication in 1946 for all connected with architecture.

An Encyclopædia of Architecture John Wiley & Sons For more information including the introduction, a full list of entries and contributors, a generous selection of sample pages and more, visit the Encyclopaedia of 20th Century Architecture website. Focusing on architecture from all regions of the world, this three-volume set profiles the twentieth century's vast

chronicle of architectural achievements, both within and well beyond the theoretical confines of modernism. Unlike existing works, this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types, movements, styles, and building practices across traditional geographic and cultural boundaries.

Encyclopedia of Architecture, Aalto, Alvar to Concrete-General Principles Routledge

Excellent guides to hundreds of terms used in Greek, Roman, Medieval, and Renaissance architecture, with index to illustrations identifying cathedrals, castles, parish churches. "Relevant and practical." — Clem Labine's *Traditional Building*.

Encyclopedia of Architecture, 5 Volume Set I. B. Tauris

The Routledge Companion to Women in Architecture illuminates the names of pioneering women who over time continue to foster, shape, and build cultural, spiritual, and physical environments in diverse regions around the globe. It uncovers the remarkable evolution of women's leadership, professional perspectives, craftsmanship, and scholarship in architecture from the preindustrial age to the present. The book is organized chronologically in five parts, outlining the stages of women's expanding engagement, leadership, and contributions to architecture through the centuries. It contains twenty-nine chapters written by thirty-three recognized scholars committed to probing broader topographies across time and place and presenting portraits of practicing architects, leaders, teachers, writers, critics, and other kinds of professionals in the built environment. The intertwined research sets out debates, questions, and projects around women in architecture, stimulates broader studies and discussions in emerging areas, and becomes a catalyst for academic programs and future publications on the subject. The novelty of this volume is in presenting not only a collection of case studies but in broadening the discipline by advancing an incisive overview of the topic as a whole. It is an invaluable resource for architectural historians, academics, students, and professionals.

A Dictionary of Architecture and Building Wiley-Interscience

A Visual Dictionary of Architecture Courier Corporation

Covers all periods of western architectural history including biographies of architects and others who have made significant contributions to the field of architecture.

Introduction to Architecture John Wiley & Sons

The classic, bestselling reference on architecture now revised and expanded! An essential one-volume reference of architectural topics using Francis D.K. Ching's signature presentation. It is the only dictionary that provides concise, accurate definitions illustrated with finely detailed, hand-rendered drawings. From Arch to Wood, every concept, technology, material and detail important to architects and designers are presented in Ching's unique style. Combining text and drawing, each term is given a minimum double-page spread on large format trim size, so that the term can be comprehensively explored, graphically showing relations between concepts and sub-terms A comprehensive

index permits the reader to locate any important word in the text. This long-awaited revision brings the latest concepts and technology of 21st century architecture, design and construction to this classic reference work. It is sure to be by the side of and used by any serious architect or designer, students of architecture, interior designers, and those in construction.

Illustrated Dictionary of Architecture, Third Edition

Routledge

Constant technological advancements are opening up dramatic new possibilities for the built form; at the same time architects are developing innovative designs which require new techniques

to make these ideas reality. The Encyclopedia of Architectural Technology is the first book to specifically address these two issues by providing a comprehensive reference to modern architectural technologies, encompassing all key aspects of construction, structures, environmental design and servicing. The Encyclopaedia features over 180 entries ranging from materials and techniques to notable innovators in architecture and engineering. Each entry includes a brief quick-reference summary followed by a more detailed text and suggestions for further reading. Besides technological terms, entries are included on

related topics such as sick building syndrome and sustainability. Key engineers Ove Arup and Ted Happold have dedicated entries, as do a range of ground-breaking architects such as Le Corbusier, Norman Foster, Walter Gropius, Herzog & de Meuron, Oscar Niemeyer, Richard Rogers, Carlo Scarpa, Frank Lloyd Wright, Ken Yeang and many others.

An Illustrated Encyclopedia Courier Corporation

With more than 600 entries and 350 plans, diagrams and photographs and maps, this guide provides a comprehensive introduction to ancient Egyptian monuments that is an essential companion for every visitor to the ancient sites along the Nile.
