Merchants' shouts, jostling strangers, aromas of fresh fish and flowers, plodding horses, and friendly chatter long filled the narrow, crowded streets of the European city. As they developed over many centuries, these spaces of commerce, communion, and commuting framed daily life. At its heyday in the 1800s, the European street was the place where social worlds connected and collided. Brian Ladd recounts a rich social and cultural history of the European city street, tracing its transformation from a lively scene of trade and crowds into a thoroughfare for high-speed transportation. Looking closely at four major cities—London, Paris, Berlin, and Vienna—Ladd uncovers both the joys and the struggles of a past world. The story takes us up to the twentieth century, when the life of the street was transformed as wealthier citizens withdrew from the crowds to seek refuge in suburbs and automobiles. As demographics and technologies changed, so did the structure of cities and the design of streets, significantly shifting our relationships to them. In today's world of high-speed transportation and impersonal marketplaces, Ladd leads us to consider how we might draw on our history to once again build streets that encourage us to linger. By unearthing the vivid descriptions recorded by amused and outraged contemporaries, Ladd reveals the changing nature of city life, showing why streets matter and how they can contribute to public life.

Great Cities of the World University of Toronto Press

Why have some cities become great global urban centers, and what cities will be future leaders? From Athens and Rome in ancient times to New York and Singapore today, a handful of cities have stood out as centers of global economic, military, or political power. In the twenty-first century, the number of truly global cities is greater than ever before, reflecting the globalization of both economic and political power. In *Global Cities: A Short History*, Greg Clark, an internationally renowned British urbanist, examines the enduring forces—such as trade, migration, war, and technology—that have enabled some cities to emerge from the pack into global leadership. Much more than a historical review, Clark's book looks to the future, examining the trends that are transforming cities around the world as well as the new challenges all global cities, increasingly, will face. Which cities will be the global leaders of tomorrow? What are the common issues and opportunities they will face? What kinds of leadership can make these cities competitive and resilient? Clark offers answers to these and similar questions in a book that will be of interest to anyone who lives in or is affected by the world's

great urban areas.

The Streets of Europe Anchor

This volume presents the original text, accompanied by an English translation and commentary, of a hitherto unpublished Syriac composition, entitled the *Marvels Found in the Great Cities and in the Seas and on the Islands*. Produced by an unknown East Syrian Christian author during the late medieval or early modern period, this work offers a loosely organized catalogue of marvellous events, phenomena, and objects, natural as well as human-made, found throughout the world. The *Marvels* is a unique composition in that it bears witness to the creative adoption by Syriac Christians of the paradoxographical literary mode of 'aġā'ib that enjoyed great popularity among their Arabic- and Persian-speaking Muslim neighbours. In this composition, the East Syrian author blends together a number of different paradoxographical traditions: some inherited from the earlier Christian works in Syriac, such as the *Alexander Romance*, some borrowed directly or indirectly from Muslim geographical and other works, and some, apparently, circulating as a part of local oral lore. Combining entertainment and didacticism, he provides his audience with a fascinating panorama of imaginary geography, which at the same time has unmistakable Christian features. This edition makes a fascinating Syriac work available to a wider audience, and provides detailed insights into the rich assortment of traditions creatively woven together by its author. Thanks to the combination of the original text, English translation and commentary, it will be of interest to scholars and readers alike.

World's Greatest Cities is an illuminating visual guide to 30 incredible cities around the globe—with annotated 3-D reconstructions and cutaway models that allow you to journey right to the soul of each of them. For thousands of years, cities built by humans have reflected their beliefs, their power, their needs, and their desires. Palaces and prisons, churches and mosques, skyscrapers and suspension bridges are the tracks that history, sometimes glorious, often violent, imprints on these cities. But these cities are also the men and women who inhabit them and who stamp a unique character onto each of them. The spirit of each city is also etched in the daily coming and going of the streets, the hustle and bustle of the markets, and in the unhurried discussions of the cafés. Explore the cities of the world today that leave a lasting impression on those who visit them.

These cities offer rich architectural heritage and spectacular natural environments. But above all, they have a vitality that makes them unique. They are cities that know how to grow, transform, and reinvent themselves without losing their essence. Feel the heartbeat of the most vibrant and exciting cities around the globe. Skyscrapers, alongside ancient marvels, are beautifully illustrated and perfectly complement the engaging text that describes the creation and history of these celebrated destinations. Cities dissected are Paris, San Francisco, New York; City, Toronto, Mexico City, Buenos Aires, Rio de Janeiro, London, Barcelona, Rome, Venice, Vienna, Stockholm, Amsterdam, Brussels, Berlin, Prague, Athens, Moscow, Istanbul, Jerusalem, Dubai, Sydney, Auckland, Cairo, Johannesburg, Mumbai, Beijing, Seoul, Tokyo and all of their landmark sites.

The Destruction and Renewal of the Historic Metropolis Thames & Hudson

An exploration of four cities that reflect a blend of Eastern and Western cultures traces the historical threads connecting St. Petersburg, Shanghai, Mumbai, and Dubai while discussing their conflicted embrace of modernity.

History of Urban Form Before the Industrial Revolution Orbit

Three-time Hugo Award-winning and New York Times bestselling author N.K. Jemisin crafts her most incredible novel yet, a "glorious" story of culture, identity, magic, and myths in contemporary New York City. In Manhattan, a young grad student gets off the train and realizes he doesn't remember who he is, where he's from, or even his own name. But he can sense the beating heart of the city, see its history, and feel its power. In the Bronx, a Lenape gallery director discovers strange graffiti scattered throughout the city, so beautiful and powerful it's as if the paint is literally calling to her. In Brooklyn, a politician and mother finds she can hear the songs of her city, pulsing to the beat of her Louboutin heels. And they're not the only ones. Every great city has a soul. Some are ancient as myths, and others are as new and destructive as children. New York? She's got six. For more from N. K. A Representative of 'Aḡā'ib Literature in Syriac W. W. Norton & Company

Named a Best Book of the Year by NPR and Science Friday A quest to explore some of the most spectacular ancient cities in human history—and figure out why people abandoned them. In *Four Lost Cities*, acclaimed science journalist Annalee Newitz takes readers on an entertaining and mind-bending adventure into the deep history of urban life. Investigating across the centuries and around the world, Newitz explores the rise and fall of four ancient cities, each the center of a sophisticated civilization: the Neolithic site of Çatalhöyük in Central Turkey, the Roman vacation town of Pompeii on Italy's southern coast, the medieval megacity of Angkor in Cambodia, and the indigenous metropolis Cahokia, which stood beside the Mississippi River where East St. Louis is today. Newitz travels to all four sites and investigates the cutting-edge research in archaeology, revealing the mix of environmental changes and political turmoil that doomed these ancient settlements. Tracing the early development of urban planning, Newitz also introduces us to the often anonymous workers—slaves, women, immigrants, and manual laborers—who built these cities and created monuments

that lasted millennia. *Four Lost Cities* is a journey into the forgotten past, but, foreseeing a future in which the majority of people on Earth will be living in cities, it may also reveal something of our own fate.

A History of Future Cities Open Book Publishers

Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

*Includes pictures *Includes ancient accounts of the cities

*Includes online resources and bibliographies for further reading Long before Alexandria was a city and even before Memphis and Babylon had attained greatness, the ancient Mesopotamian city of Ur stood foremost among ancient Near Eastern cities. Today, the greatness and cultural influence of Ur has been largely forgotten by most people, partially because its monuments have not stood the test of time the way other ancient culture's monuments have. For instance, the monuments of Egypt were made of stone while those of Ur and most other Mesopotamian cities were made of mud brick and as will be discussed in this report, mud-brick may be an easier material to work with than stone but it also decays much quicker. The same is true to a certain extent for the written documents that were produced at Ur. No site better represents the importance of the Sumerians than the city of Uruk. Between the fourth and the third millennium BCE, Uruk was one of several city-states in the land of Sumer, located in the southern end of the Fertile Crescent,

between the two great rivers of the Tigris and the Euphrates. Discovered in the late 19th century by the British archaeologist William Loftus, it is this site that has revealed much of what is now known of the Sumerian, Akkadian, and Neo-Sumerian people. Hattusa was different from the other major cities of the ancient Near East in one major respect: it was landlocked and not located on a major river. At first glance, such a situation may seem like a liability, which it was in terms of trade, but for the most part its central position meant that the Hittites could move their armies more efficiently from one theater of operations to another (Macqueen 2003, 56). As a landlocked capital, Hattusa was also safe from naval attacks from other kingdoms, so if the Hittites' enemies wanted to invade their capital, they would have to trek through the middle of the kingdom to get there, which was most unlikely. As Hittite power grew during the Old Kingdom, the royal city of Hattusa became more important and even wealthier. From his citadel overlooking Hattusa, Hattusili I launched the first major Hittite attacks into the Near East, first conquering the cities between Hattusa and the Mediterranean (Macqueen 2003, 36). Although the Biblical accounts of the Assyrians are among the most interesting and are often corroborated with other historical sources, the Assyrians were much more than just the enemies of the Israelites and brutal thugs. Among all the cities that thrived in the ancient Near East, few can match the opulence and ostentatiousness of Nineveh, the capital of the Assyrian Empire for much of the seventh century BCE. During that time it became known for its mighty citadels, grand palaces, beautiful gardens, and even its zoos. In fact, the beauty of Nineveh, especially its gardens, impressed later writers so much that they assigned its gardens as one of the original Seven Wonders of the World, except unfortunately for Nineveh's memory, the location was placed in Babylon. The confusion that assigned one of the Wonders of the World to Babylon instead of Nineveh is in fact a large part of Nineveh's history - it was a great city during its time, but incessant warfare brought the metropolis to oblivion and eventually its history was forgotten or distorted. Today, Babylon has become a byword for greed, excess, and licentiousness, mostly due to its mention in the Bible, but a closer examination reveals that Babylon was so much more, and even perhaps the most important city in the ancient world. Ancient Babylon was home to great dynasties that produced some of the world's most influential leaders, most notably Hammurabi and Nebuchadnezzar.

This book has one central theme: how, in the United Kingdom, can we create better cities and towns in which to live and work and play? What can we learn from other countries, especially our near neighbours in Europe? And, in turn, can we provide lessons for other countries facing similar dilemmas? Urban Britain is not functioning as it should. Social inequalities and regional disparities show little sign of going away. Efforts to generate growth, and spread it to the poorer areas of cities, have failed dismally. Much new urban development and redevelopment is not up to standard. Yet there are cities in mainland Europe, which have set new standards of high-quality sustainable urban development. This book looks at these best-practice examples - in Germany, the Netherlands, France and Scandinavia, - and suggests ways in which the UK and other countries could do the

same. The book is in three parts. Part 1 analyses the main issues for urban planning and development - in economic development and job generation, sustainable development, housing policy, transport and development mechanisms - and probes how practice in the UK has fallen short. Part Two embarks on a tour of best-practice cities in Europe, starting in Germany with the country's boosting of its cities' economies, moving to the spectacularly successful new housing developments in the Netherlands, from there to France's integrated city transport, then to Scandinavia's pursuit of sustainability for its cities, and finally back to Germany, to Freiburg - the city that 'did it all'. Part Three sums up the lessons of Part Two and sets out the key steps needed to launch a new wave of urban development and regeneration on a radically different basis.

The world's most famous cities through the ages! Walk around any famous city and layers of history start to emerge. In London, Roman walls are dwarfed by office blocks. In Rome, ancient treasures like the Colosseum stand shoulder to shoulder with buildings from the Renaissance. In New York, skyscrapers from the 1920s and 1930s predate enormous glass towers. In *Cities in Layers: Six Famous Cities Through Time*, six major world cities are shown at different stages throughout history. A clever die-cut element allows readers to really peel back layers of time. *The Age of Great Cities; Or, Modern Civilization Viewed in Its Relation to Intelligence, Morals, and Religion* Speedy Publishing LLC

A portrait of world civilization told through the stories of the world's greatest cities from ancient times to the present. Today, for the first time in history, the majority of people in the world live in cities. The implications and challenges associated with this fact are enormous. But how did we get here? From the origins of urbanization in Mesopotamia to the global metropolises of today, great cities have marked the development of human civilization. *The Great Cities in History* tells their stories, starting with the earliest, from Uruk and Memphis to Jerusalem and Alexandria. Next come the fabulous cities of the first millennium: Damascus and Baghdad, Teotihuacan and Tikal, and Chang'an, capital of Tang Dynasty China. The medieval world saw the rise of powerful cities such as Palermo and Paris in Europe, Benin in Africa, and Angkor in southeast Asia. The last two sections bring us from the early modern world, with Isfahan, Agra, and Amsterdam, to the contemporary city: London and New York, Tokyo and Barcelona, Los Angeles and Sao Paulo. The distinguished contributors, including Jan Morris, Michael D. Coe, Simon Schama, Orlando Figes, Felipe Fernandez-Armesto, Misha Glenny, Susan Toby Evans, and A. N. Wilson, evoke the character of each place—people, art and architecture, government—and explain the reasons for its success.

How Europe Discovered the Lost Art of Urbanism University of Chicago Press

Based on the author's long experience in academic life and the public realm, especially in foreign policy, this book argues that a single categoric classification of cities is inadequate, and that cities have had different and varied impacts and positions throughout the history of civilization. The author examines how the formation, transformation, destruction or reestablishment of many civilizational cities reveals a clearer picture of the cornerstones of the course of human history. These cities, which play a decisive and pivotal role in the direction of the flow of history as well as providing us with a compass to guide our efforts to understand and interpret this flow, are conceptualized by the author as civilizations' "pivot cities". This innovative book explores the role of great cities in political historical change, presenting an alternative view of these pivot cities from a

culturalist perspective. Within this framework, the role played by pivot cities in the history of civilization may be considered under seven distinct headings: pioneering cities which founded civilizations; cities which were founded by civilizations; cities which were transplanted during the formation of civilizations; "ghost cities" which lost their importance through shifts in political power and civilizational transformation; "lost cities" which were destroyed by civilizations; cities on lines of geocultural/geoeconomic interaction; and cities which combine, transform or are transformed by different civilizations. The author's concept of pivot cities explores the interplay between vital cities and civilizations, which bears on the future of globalization at a time of instability, as projected continuing de-Westernization becomes a theme in studies of global history. This

book provides highly productive discussions relevant to the literature on city-civilization relationships and the historicity of pivot cities. Its clear language, rich content, deep and original perspective, interdisciplinary approach and rich bibliography will ensure that it appeals to students and scholars in a variety of disciplines, including cultural studies, political science, comparative urban studies, anthropology, history and civilizational studies.
