 A job-search manual that gives career seekers a systematic, tech-savvy formula to efficiently and effectively target potential employers and secure the essential first interview. The 2-Hour Job Search shows job-seekers how to work smarter (and faster) to

secure first interviews. Through a prescriptive approach, Dalton explains how to wade through the Internet's sea of information and create a job-search system that relies on mainstream technology such as Excel, Google, LinkedIn, and alumni databases to create a list of target employers, contact them, and then secure an interview—with only two hours of effort. Avoiding vague tips like “leverage your contacts,” Dalton tells job-hunters exactly what to do and how to do it. This empowering book focuses on the critical middle phase of the job search and helps readers bring organization to what is all too often an ineffectual and frustrating process.

 This is a pivotal period in Sri Lanka's economic development. The end of conflict opens a door for accelerated economic growth and poverty reduction. Reform is needed to regain momentum because fiscal imbalances and rising public debt could jeopardize macroeconomic stability. The economy would benefit from significant trade and commercial policy reform. The labor market suffers from sluggish growth of formal sector employment and from skills mismatches, which can be addressed by changes in education policy and systems. The book analyzes these and

related critical constraints on the Sri Lankan economy, and proposes a set of policy reforms that would lay the foundations for more rapid and inclusive development.

Financial Accounting  
using TallyPrime**

A thorough and incisive  
introduction to  
contemporary India  
The story of the forging  
of India, the world's  
largest democracy, is a  
rich and inspiring one.  
This volume, a sequel  
to the best-selling  
India's Struggle for  
Independence,

analyses the  
challenges India has  
faced and the  
successes it has  
achieved, in the light of  
its colonial legacy and  
century-long struggle  
for freedom. The book  
describes how the  
Constitution was  
framed, as also how  
the Nehruvian political  
and economic agenda  
and basics of foreign  
policy were evolved  
and developed. It  
dwells on the  
consolidation of the  
nation, examining  
contentious issues like  
party politics in the  
Centre and the states,  
the Punjab problem,  
and anti-caste politics  
and untouchability.  
This revised edition  
offers a scathing  
analysis of the growth  
of communalism in  
India and the use of  
state power in  
furthering its cause. It

also documents the fall of the National Democratic Alliance in the 2004 General Elections, the United Progressive Alliance's subsequent rise to power and the Indo-US Nuclear Deal that served to unravel the political consensus at the centre. Apart from detailed analyses of Indian economic reforms since 1991 and wide-ranging land reforms and the Green Revolution, this new edition includes an overview of the Indian

economy in the new millennium. These, along with objective assessments of Jawaharlal Nehru, Indira Gandhi, Jayaprakash Narayan, Lal Bahadur Shastri, Rajiv Gandhi, Vishwanath Pratap Singh, Atal Bihari Vajpayee and Manmohan Singh, constitute a remarkable overview of a nation on the move.
