 When models of a system
 change, analyses based
 on them have to be
 reevaluated in order for
 the results to stay
 meaningful. In many
 cases, the time to get
 updated analysis results is
 critical. This thesis
 proposes multiple,
 combinable approaches

and a new formalism
 based on category theory
 for implicitly incremental
 model analyses and
 transformations. The
 advantages of the
 implementation are

Based on policy analysis
and empirical data, this
book examines the
problematic
consequences of colonial
legacies of language
policies and English
language education in the
multilingual contexts of
the Global South. Using a
postcolonial lens, the
volume explores the
raciolinguistics of
language hierarchies that
results in students from
low-income backgrounds

losing their mother
tongues without acquiring
academic fluency in
English. Using findings
from five major research
projects, the book
analyzes the specific
context of India, where
ambiguous language
policies have led to
uneasy tensions between
the colonial language of
English, national and state
languages, and students'
linguistic diversity is
mistaken for cognitive
deficits when English is
the medium of instruction
in schools. The authors
situate their own

professional and personal
experiences in their
efforts at dismantling
postcolonial structures
through reflective practice
as teacher educators, and
present solutions of
decolonial resistance to
linguistic hierarchies that
include critical
pedagogical alternatives
to bilingual education and
opportunities for
increased teacher agency.
Ultimately, this timely
volume will appeal to
researchers, scholars,
academics, and students
in the fields of
international and

comparative education, English and literacy studies, and language arts more broadly. Those interested in English language learning in low-income countries specifically will also find this book to be of benefit to their research.
