According to Larry Teal, the best method of learning to play the saxophone is to study with a competent teacher. Teal's studies were mostly of instruments other than the saxophone, but as a student at a Chautauqua summer session, he came under the influence of Georges Barrère, the eminent French flutist. He played bass clarinet with the Detroit Symphony, but he continued to be absorbed by the saxophone. As a result of his acquired expertise and growing reputation, he was appointed to a full-time faculty position as a saxophone teacher by the University of Michigan -- the first ever to receive such an appointment from a major university. During his 21-year tenure, he attracted students from all over, thus exerting an ever widening influence on saxophone teaching and performing.

The primary aim of this book is to help the reader to understand the language of music and how it works in relation to the guitar. It is not intended as a substitute for all other lines of study, but it will provide a basic knowledge that can be expanded and developed. the reader is urged to read as wide a range of books as possible and to examine whatever music he or she possesses to identify further examples of the points discussed. the examples should be played and carefully listened to. the study of music is sterile if confined to making marks on paper, no matter how well understood intellectually; no real value attaches to a theoretical study of music unless it is directly related to aural experience and its value is reduced further if it is not related to the music of one's instrument.Contents include Musical Sounds and Their Origins, the Organization of single notes, Melody, Intervals, the Beginning of Harmony-Triads, Functional Harmony and Cadences, Primary Harmony and Cadences, Primary Triads and Substitution, Modulation and Transition, Secondary Sevenths, Other Diatonic Secondary Sevenths, the Cadential Six-four, the Dominant Ninth, Secondary Ninths, Chords of the Eleventh and Thirteenth, Chromatic Alteration of Diatonic Chords, chromatic Harmony, Remote Modulation, Pedal Points, and Steps Beyond Trinity College London Classical Guitar Exam Pieces 2020-2023: Grade 1 Hal Leonard Corporation

"Renowned luthier John S. Bogdanovich crafted the project shown inside for his own personal use. The design he presents is simple but elegant and is a composite of ideas borrowed from several different guitars admired for their tonal qualities and aesthetic details. In close-up photographs Bogdanovich invites you to stand by his side and follow the entire process from start to finish. He offers guidance through every step, and explains every decision, from the arrangement of his workbench and the selection of the wood, to tuning and setting up the instrument. Bogdanovich also provides a choice of alternative methods and materials -- to help you find your own style of working, and to enable you to add your personal touches to your project. By the time your instrument is finished, you'll have acquired a world of knowledge, from the difference between quartersawn and flat-sawn wood to the pros and cons of lacquer versus French polish. You'll have mastered dozens of skills, including bending and aminating wood and cutting and seating wire frets. Best of all, you'll have a beautiful instrument, designed to your own specifications, that will give pleasure to everyone

who hears it." -- Book jacket.
