The new edition of this bestselling textbook brings criminological research alive for students. It introduces the processes and practicalities of preparing, doing, experiencing and reflecting upon criminological research. The success of the First Edition has been its ability to contextualize research accessibly within real-life examples of crime, criminology and criminal justice- doing interviews with offenders in prison, undertaking evaluation on crime related projects, using questionnaires to measure fear. Its strength continues to lie in its ability to span the process of doing criminological research, helping students to understand the journey of the researcher.

Handbook of Policing Routledge

Bringing together a range of leading social scientists and criminologists, this volume explores a number of key themes raised by the work of Robert Reiner. Arguably the leading policing scholar of his generation, Reiner's work over some 40 years has ranged broadly in this field, taking in the study of police history, culture, organisation, elites and relationships with the media. Always carefully situated within an analysis of the changing socio-political circumstances of policing and crime control, Robert Reiner's scholarship has been path-breaking in its impact. The 13 original essays in this volume are testament to Reiner's influence. Although reflecting the primarily British bent within his work, the essays also draw on contributors from Australia, Europe, South Africa and the United States to explore some of the leading debates of the moment. These include, but are not limited to, the impact of neo-liberalism on crime control and the challenges for modern social democracy; police culture, equality and political economy; new media and the future of policing; youth, policing and democracy, and the challenges and possibilities posed by globalisation in the fields of policing and security.

Policing, Surveillance and Social Control Cambridge University Press

This new edition of the Handbook of Policing updates and expands the highly successful first edition, and now includes a completely new chapter on policing and forensics. It provides a comprehensive, but highly readable overview of policing in the UK, and is an essential reference point, combining the expertise of leading academic experts on policing and policing practitioners themselves.

The Future of Policing Routledge

This collection contains key readings constituting a core or canon of policing studies, setting them in historical, theoretical, social and political context, and providing an explanatory commentary.

Handbook of Criminal Investigation Routledge

As crime increasingly crosses national boundaries, and international co-operation takes firmer shape, so the development of ideas and policy on the control of crime has become an increasingly international and transnational affair. These developments call attention not just to the many points of convergence in the languages and practices of crime control but also to their persistent differences. This book is concerned both with the very specific issue of 'policy transfer' within the crime control arena, and with the issues raised by a more broadly conceptualized idea of comparative policy analysis. The contributions in the book examine the different ways in which ostensibly similar vocabularies, policies and practices are taken up and applied in the distinct settings they encounter.

Men, Masculinities and Crime Routledge

There are enormous challenges in establishing policing systems in young democracies. Such societies typically have a host of unresolved pressing social, economic and political questions that impinge on policing and the prospects for reform. There are a series of hugely important questions arising in this context, to do with the emergence of the new security agenda, the problems of transnational crime and international terrorism, the rule of law and the role of the police, security services and the military. This is a field that is not only of growing academic interest but is now the focus of a very significant police reform 'industry'. Development agencies and entrepreneurs are involved around the globe in attempts to establish democratic police reforms in countries with little or no history of such activity. Consequently, there is a growing literature in this field, but as yet no single volume that brings together the central developments. This book gathers together scholars from political science, international relations and criminology to focus on the issues raised by policing within developing democracies examining countries in Eastern Europe, Asia, South America and Africa.

The Making of Criminal Justice Policy SAGE Publications

Fifty years on from its original publication, HLA Hart's *The Concept of Law* is widely recognized as the most important work of legal philosophy published in the twentieth century, and remains the starting point for most students coming to the subject for the first time. In this third edition, Leslie Green provides a new introduction that sets the book in the context of subsequent developments in social and political philosophy, clarifying misunderstandings of Hart's project and highlighting central tensions and problems in the work.

Criminology Oxford University Press

The criminal justice system is wide ranging: it covers crimes, policing, the sentencing of offenders, and prisons. This title draws upon the latest research and current practices from around the world. Focusing on the adversarial model of justice found in common law countries such as the US, UK, Canada, and Australia, it discusses topics such as the uses of imprisonment, the effects of capital punishment, and the purposes of sentencing. Considering the role of the victim, as well as public knowledge and attitudes towards criminal justice, it assesses the way in which the system functions.

Just Boys Doing Business? Oxford University Press

This book provides an empirically grounded, theoretically informed account of recent changes to the youth justice system in England and Wales, focusing on the introduction of elements of restorative justice into the heart of the criminal justice system, and the implementation of referral orders and youth offender panels. Taken together, this amounts to the most radical overhaul of the youth justice system in the last half century, fundamentally changing the underlying values of the system away from an 'exclusionary punitive justice' and towards an 'inclusionary restorative justice'. The book explores the implications of these changes by using the lens of a detailed study of the implementation of referral orders and youth offender panels to explore wider issues about youth justice policy and the integration of restorative justice principles. It draws upon the findings of an in-depth study of the pilots established prior to the national rollout of referral orders in April 2002. The book will be essential reading not only for those involved in the task of implementing the new youth justice, but others with an interest in the criminal justice system and in restorative justice who need to know about the far reaching reforms to the youth justice system and their impact.

Criminology Routledge

Most incidents of urban unrest in recent decades - including the riots in France, Britain and other Western countries - have followed lethal interactions between the youth and the police. Usually these take place in disadvantaged neighborhoods composed of working-class families of immigrant origin or belonging to ethnic minorities. These tragic events have received a great deal of media coverage, but we know very little about the everyday activities of urban policing that lie behind them. Over the course of 15 months, at the time of the 2005 riots, Didier Fassin carried out an ethnographic study in one of the largest precincts in the Paris region, sharing the life of a police station and cruising with the patrols, in particular the dreaded anti-crime squads. Far from the imaginary worlds created by television series and action movies, he uncovers the ordinary aspects of law enforcement, characterized by inactivity and boredom, by eventless days and nights where minor infractions give rise to spectacular displays of force and where officers express doubts about the significance and value of their own jobs. Describing the invisible manifestations of violence and unrecognized forms of discrimination against minority youngsters, undocumented immigrants and Roma people, he analyses the conditions that make them possible and tolerable, including entrenched policies of segregation and stigmatization, economic marginalization and racial discrimination. Richly documented and compellingly told, this unique account of contemporary urban policing shows that, instead of enforcing the law, the police are engaged in the task of enforcing an unequal social order in the name of public security.

On the Run Routledge

This new textbook will provide students of criminology with a better understanding of criminal justice policy and, in doing so, offers a framework for analysing the social, economic and political processes that shape its creation. The book adopts a policy-oriented approach to criminal justice, connecting the study of criminology to the wider study of British government, public administration and politics. Throughout the book the focus is on key debates and competing perspectives on how

policy decisions are made. Recognising that contemporary criminal justice policymakers operate in a highly politicised, public arena under the gaze of an ever-increasing variety of groups, organisations and individuals who have a stake in a particular policy issue, the book explores how and why these people seek to influence policymaking. It also recognises that criminal policy differs from other areas of public policy, as policy decisions affect the liberty and freedoms of citizens. Throughout, key ideas and debates are linked to wider sociology, criminology and social policy theory. Key features include: a foreword by Tim Newburn, leading criminologist and author of *Criminology* (2nd Edition, 2013), a critical and informed analysis of the concepts, ideas and institutional practices that shape criminal justice policy making, an exploration of the relationship between criminal justice and wider social policy, a critical analysis of the debate about how and why behaviour becomes defined as requiring a criminal justice solution, a range of case studies, tasks, seminar questions and suggested further readings to keep the student engaged. This text is perfect for students taking modules in criminology; criminal justice; and social and public policy, as well as those taking courses on criminal and administrative law.

Policing Routledge

This succinct, tightly-written book offers a critical examination of the key issues facing policing in modern Britain. Those issues can be summarised in the following way: how is the apparently insatiable demand by the public for more policing and better protection to be satisfied, given the continued limits on public spending; that there is concern that what the public demands may not have a significant effect on crime levels; and that further extension of police powers and the reach of the law could themselves have unwanted consequences. All these questions are posed and answered on the basis of the wealth of research and operational evidence gathered by the police service itself, the Home Office, and independent researchers.

A Reader OUP Oxford

Policing is changing rapidly and radically. An increasingly complex array of public, private and municipal bodies - as well as public police forces - are engaged in the provision of regulation and security. Consequently, it is difficult to think of security provision primarily in terms of what the

public police do, and so the terminology of 'fragmented' or 'plural' policing systems has become well-established within criminology and police science. 'Plural policing' is now a central issue within criminology and police studies throughout the world, and there is now a large and growing body of research and theory concerned with its extent, nature and governance. To date, however, this work has been dominated by Anglo-American perspectives. This volume takes a detailed comparative look at the development of plural policing, and provides the most up-to-date work of reference for scholars in this field. Edited by two of the world's leading authorities on policing, and including individual contributions from internationally recognised experts in criminology and police studies, this is the first ever volume to focus on 'plural policing' internationally, and to draw together empirical evidence on its developments in a formal comparative framework.

The Concept of Law SAGE

The pursuit of security is now central to the development of public policy and a driving force behind the spread of private policing. Just as new theoretical frameworks are needed to deal with the increasing tendency of crime control policies to focus on risk reduction, new forms of governance are also required to deal with the rapid growth of the private security industry. This volume brings together a wide range of contributions from leading scholars in the field and includes international and comparative perspectives on the challenges posed by the rise of the 'security society'.

Criminology and Social Policy McGraw-Hill Education (UK)

"What do we mean by the term "crime"? Who commits crime and why do they do it? And what can we do about it? This [book] considers what we know about crime and criminality, and about historical trends and competing explanations for patterns of crime in the developed world."--Book flap.
