The New York Times-bestselling guide to botany and booze celebrates its 10th anniversary with an updated edition—now including a guide to planting your very own cocktail garden to go with more than fifty drink recipes. This fascinating, go-to text about the plants that make our drinks is the ideal gift book for every cocktail aficionado, the perfect drinks book for every plant-lover. Sake began with a grain of rice. Scotch emerged from barley, tequila from agave, rum from sugarcane, bourbon from corn. Thirsty yet? In *The Drunken Botanist*, Amy Stewart explores the dizzying array of herbs, flowers, trees, fruits, and fungi that humans have, through ingenuity, inspiration, and sheer desperation, contrived to transform into alcohol over the centuries. Of all the extraordinary and obscure plants that have been fermented and distilled, a few are dangerous, some are downright bizarre, and one is as ancient as dinosaurs—but each represents a unique cultural contribution to our global drinking traditions and our history. This charming concoction of biology, chemistry, history, etymology, and mixology—with delightful drawings, tasty cocktail recipes, and fun factoids throughout—will make you the most popular guest at any cocktail party. “A book that makes familiar drinks seem new again . . . Through this horticultural lens, a mixed drink becomes a cornucopia of plants.”—NPR’s Morning Edition “Amy Stewart has a way of making gardening seem exciting, even a little dangerous.” —The New York Times

Digitaal lezen is sterk in opkomst. Maar hoe gaat het maken en verkopen van een ebook in zijn werk? Het creëren van een ebook in het ePub formaat, de standaard voor ebooks in Nederland, is niet zo eenvoudig als het lijkt; even een manuscript omzetten is er helaas niet bij. Wiebe de Jager beschrijft

in deze praktijkgids hoe je een ebook maakt met het open source programma Sigil en hoe je het ebook vervolgens op de markt brengt. Deze gids is interessant voor zowel auteurs die hun ebook in eigen beheer willen uitgeven als uitgevers die aan de slag willen met digitale boeken. Behandeld wordt onder andere het importeren van een manuscript, het indelen in hoofdstukken, het toevoegen van structuur en opmaak, het invoegen van afbeeldingen en een omslag, het bewerken van metadata en het genereren en valideren van een ePub bestand dat gelezen kan worden op uiteenlopende apparaten, zoals ereaders, pcs, smartphones en tablets. Tot slot wordt ingegaan op de mogelijkheden om ebooks te promoten, distribueren, beveiligen en verkopen. Wiebe de Jager is directeur van uitgeverij Eburon en medeoprichter van eReaders.nl. Hij schrijft veel over ebooks op zijn weblog en in vakbladen. Hij is daarnaast een veelgevraagd spreker op het gebied van digitaal uitgeven en de toekomst van het boek. *The Storm Sister* Barkhuis

In this first installment of the Renée Ballard series, #1 bestselling author Michael Connelly introduces a "complicated and driven" young detective fighting to prove herself on the LAPD's toughest beat (The New York Times). Renee Ballard works the midnight shift in Hollywood, beginning many investigations but finishing few, as each morning she turns everything over to the daytime units. It's a frustrating job for a once up-and-coming detective, but it's no accident. She's been given this beat as punishment after filing a sexual harassment complaint against a supervisor. But one night Ballard catches two assignments she doesn't want to part with. First, a prostitute is brutally beaten and left for dead in a parking lot. All signs point to a crime of premeditation, not passion, by someone with big evil on his mind. Then she sees a young waitress breathe her last after being caught up in a nightclub shooting. Though dubbed a peripheral victim, the waitress buys Ballard a way in, and this time she is determined not to give up at dawn. Against orders and her partner's wishes, she works both cases by day while maintaining her shift by night. As the investigations intertwine, Ballard is forced to face her own demons and confront a danger she could never have imagined. To find justice for these victims who can't speak for themselves, she must put not only her career but her life on the line. Propulsive as a jolt of adrenaline and featuring a bold and defiant new heroine, *The Late Show* is yet more proof that Michael Connelly is "a master of the genre" (Washington Post).

Here is a highly motivating book for grade-school students that will introduce them to many of the world's most popular (and historically significant) scientific experiments. They'll learn about gravity simply by following the acrobatic antics of an ordinary coin. By trying to blow an egg out of a cup, they'll discover the principles of air pressure. Dancing soap bubbles will help them understand the effects of static electricity, and by dropping quarters into a full glass of water without causing it to overflow, they'll study the effects of surface tension. These and over 40 other experiments have been carefully selected by noted educators Eugene and Asterie Baker Provenzo to familiarize children with classic science experiments involving optics, inertia, air pressure, magnetism, sound, topology, light, density, vibration, prisms, elasticity, gases, vacuum, perspective, geometry, centrifugal force, buoyancy, color, and much more. Some experiments, such as the optical "Newton's Rings" are hundreds of years old. Still others, like the straw lever test, are based on Greek experiments with leverage and the center of gravity — first carried out thousands of years ago. Easy-to-follow instructions and illustrations show youngsters how to perform each experiment, most of which are prefaced with historical background, a list of necessary materials and an explanation of key terms. Almost all experiments can be carried out with common household items (tissue paper, scissors, tapes, rubber balloons, pens, pencils, etc.) and can be worked at home or in the classroom to demonstrate specific scientific principles or to supplement a science-curriculum unit. Sources for all historical illustrations given in the text are listed at the end of the book.
