Práce poskytuje srovnání teoretických přístupů k problematice stylu, a to v rámci českého a anglosaského (především britského) kontextu. Cílem bylo ukázat a srovnat odlišná metodologická pojetí založená na odlišných teoretických východiscích - proto byly zvoleny dva odlišné kulturní okruhy: pozornost je však samozřejmě věnována také vztahů mezi nimi.

Dvacáté století bylo vybráno úmyslně, jako období, v němž se v obou prostředích stylistika konstituovala jako moderní teoretická disciplína opírající se o základnu lingvistiky a literární vědy. Práci mohou využít jak domácí, tak zahraniční studenti a vyučující, především bohemisté a anglisté.

The Knowledge Gap IGI Global

From two leading child and adolescent mental health experts comes a guide for the parents of every college and college-bound student who want to know what's normal mental health and behavior, what's not, and how to intervene before

it's too late. "The title says it all...Chock full of practical tools, resources and the wisdom that comes with years of experience, *The Stressed Years of their Lives* is destined to become a well-thumbed handbook to help families cope with this modern age of anxiety." — Brigid Schulte, Pulitzer Prize-winning journalist, author of *Overwhelmed* and director of the Better Life Lab at New America All parenting is in preparation for letting go. However, the paradox of parenting is that the more we learn about late adolescent development and risk, the more frightened we become for our children, and the more we want to stay involved in their lives. This becomes particularly necessary, and also particularly challenging, in mid- to late adolescence, the years just before and after students head off to college. These years coincide with the emergence of many mood disorders and other mental health issues. When family psychologist Dr. B. Janet Hibbs's own son came home from college mired in a dangerous depressive spiral, she turned to Dr. Anthony Rostain. Dr. Rostain has a secret superpower: he understands the arcane rules governing privacy and parental involvement in students' mental

health care on college campuses, the same rules that sometimes hold parents back from getting good care for their kids. Now, these two doctors have combined their expertise to corral the crucial emotional skills and lessons that every parent and student can learn for a successful launch from home to college. Trends, Challenges and New Directions National Academies Press

This book reviews the extraordinary promise of technological advances over the next twenty years or so, and assesses some of the key issues -- economic, social, environmental, ethical -- that decision-makers in government, business and society will face in the decades ahead.

21st Century Technologies Promises and Perils of a Dynamic Future Penguin

Focusing on events in Rwanda, Armenia, and the former Yugoslavia as well as the Holocaust, *Genocide and Gender in the Twentieth Century* investigates how historically- and culturally-specific ideas led to genocidal sexual violence. Expert contributors also consider how these ideas, in conjunction with issues relating to femininity, masculinity and understandings of gendered identities, contributed to perpetrators' tools and strategies for ethnic cleansing and genocide. The 2nd edition features: * Five brand new chapters which explore: imperialism, race, gender and genocide; the Cambodian genocide; memory and intergenerational transmission of Holocaust trauma; and genocide, gender and memory in the Armenian case. * An extended and enhanced introduction which makes use of recent scholarship on gender and violence. *

Historiographical and bibliographical updates throughout. * Key primary document - excerpt from the 1948 UN Convention on the Prevention and

Punishment of Genocide. Updated and revised in its second edition, *Genocide and Gender in the Twentieth Century* is the authoritative study on the complex gender dimensions of ethnic cleansing and genocide in the 20th century.

Comparative Regionalisms for Development in the 21st Century Routledge

The societies of the twenty-first century are subject to social, cultural, political, and economic changes. In this context, the school is asked to educate the future citizens in the present. To respond to this kaleidoscopic reality, the school is immersed in a pedagogical revolution. In this book, the reader will find a selection of avant-garde research works from different disciplines and contexts, which have their epicenter in the school and in the faculties of education. New issues in pedagogy and education, and new roles of teachers and students, are discussed in a global and diverse context. And new methodological and formative proposals are also proposed to build the ideal school and the ideal teacher, from the initial and continuous teacher training.

Capital in the Twenty-First Century SAGE Publications

The main driver of inequality—returns on capital that exceed the rate of economic growth—is again threatening to generate extreme discontent and undermine democratic values. Thomas Piketty's findings in this ambitious, original, rigorous work will transform debate and set the agenda for the next generation of thought about wealth and inequality.

7th European Conference on Technology Enhanced Learning, EC-TEL 2012, Saarbrücken, Germany, September 18-21, 2012, Proceedings Del Rey

Essay from the year 2007 in the subject English Language and Literature Studies - Culture and Applied Geography, grade:

2,0, Ruhr-University of Bochum, language: English, abstract: "Passing" and "passing" stories have been a great topic in literature and in the movie scene since the beginning of the 20th century. That does not mean that "passing" has not been a topic in life before, but the literary interest in it began much later. There are stories and movies about race "passing", class "passing" and gender "passing", but class passing does not seem to be too interesting, as there are millions of people pretending to be richer or better than they actually are; it is almost a normal thing in society today. It does not make you suffer hard when you're not as rich or famous as you would like to be, although it makes you suffer in other ways when you are really poor. But this is not the main topic of class "passing" anyway, the suffering of the poor. Race and gender "passing" are much more interesting, but not because the people suffer in those stories, but because it takes a great and strong character to race- or gender-"pass". Race and gender "passing" are much harder to perform than class "passing".

Big Data for Twenty-First-Century Economic Statistics John Wiley & Sons

Literacy in the 21st century is about constructing and validating knowledge. Digital technologies have enabled the spread of all kinds of information, displacing traditional formats of usually more carefully curated information such as encyclopaedias and newspapers.

New Pedagogical Challenges in the 21st Century BoD – Books on Demand

What makes the 21st century different from the 20th century? This century is the century of extremes -- political, economic, social, and global black-swan events happening with increasing frequency and severity. Book of Extremes is a tour of the current reality

as seen through the lens of complexity theory – the only theory capable of explaining why the Arab Spring happened and why it will happen again; why social networks in the virtual world behave like flashmobs in the physical world; why financial bubbles blow up in our faces and will grow and burst again; why the rich get richer and will continue to get richer regardless of governmental policies; why the future of economic wealth and national power lies in comparative advantage and global trade; why natural disasters will continue to get bigger and happen more frequently; and why the Internet – invented by the US -- is headed for a global monopoly controlled by a non-US corporation. It is also about the extreme innovations and heroic innovators yet to be discovered and recognized over the next 100 years. Complexity theory combines the predictable with the unpredictable. It assumes a nonlinear world of long-tailed distributions instead of the classical linear world of normal distributions. In the complex 21st century, almost nothing is linear or normal. Instead, the world is highly connected, conditional, nonlinear, fractal, and punctuated. Life in the 21st century is a long-tailed random walk – Levy walks -- through extreme events of unprecedented impact. It is an exciting time to be alive.

A Comparison of 20th Century Theories of Style (in the Context of Czech and British Scholarly Discourses) Psychology Press

The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our

country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.

Book of Extremes Springer
 Second in a series of publications from the Institute of Medicine's Quality of Health Care in America project Today's health care providers have more research findings and more technology available to them than ever before. Yet recent reports have raised serious doubts about the quality of health care in America. *Crossing the Quality Chasm* makes an urgent call for fundamental change to close the quality gap. This

book recommends a sweeping redesign of the American health care system and provides overarching principles for specific direction for policymakers, health care leaders, clinicians, regulators, purchasers, and others. In this comprehensive volume the committee offers: A set of performance expectations for the 21st century health care system. A set of 10 new rules to guide patient-clinician relationships. A suggested organizing framework to better align the incentives inherent in payment and accountability with improvements in quality. Key steps to promote evidence-based practice and strengthen clinical information systems. Analyzing health care organizations as complex systems, *Crossing the Quality Chasm* also documents the causes of the quality gap, identifies current practices that impede quality care, and explores how systems approaches can be used to implement change.

Defence Industries in the 21st Century Random House

Book of Extremes Why the 21st Century Isn't Like the 20th Century Springer
[Security and Migration in the 21st Century](#) Academic Press
 One of the most important transformations in the world today is the adaptation to education and teaching methods that must be made to enhance the learning experience for Millennial and Generation Z students. The system in which the student is passive and the teacher is active is no longer the most effective form of education. Additionally, with the increased availability to information, knowledge transfer is no longer done solely by the teacher. Educators need to become moderators in order to promote effective teaching practices. *Paradigm Shifts in 21st Century Teaching and Learning* is an

essential scholarly publication that examines new approaches to learning and their application in the teaching-learning process. Featuring a wide range of topics such as game-based learning, curriculum design, and sustainability, this book is ideal for teachers, curriculum developers, instructional designers, researchers, education professionals, administrators, academicians, educational policymakers, and students.

What Knowledge is of Most Worth
Routledge

Defence Industries in the 21st Century explores the transformation in the global defence industrial production through examining the interaction between international and domestic factors. With the global defence industry and arms market likely continue to expand and mature, the ways in which this progression could influence international politics remain obscure. In practice, as the contents of this book show, the defence industrial bases and arms export policies of emerging states display significant variance. This variance is the result of a unique balance between domestic and international factors that has shaped the defence industrialisation behaviour and policies of the less industrialised states. One of the most important conclusions of the book is that the interplay between domestic and international factors clearly influences the variation in the emerging states' defence industrialisation policies, as well as their success or failure. While international factors create opportunities, they also limit the options available to emerging economies. Domestic factors also play an important role by shaping the policy choices of the states' decision makers. Exploring the balance between

international and domestic factors and the ways in which they influence defence industrialisation in emerging states, *Defence Industries in the 21st Century* will be of great interest to scholars of Defence Industries, Arms Manufacturing, and Defence, Strategic and Security Studies more generally. The chapters were originally published in *Defence Studies*, *Comparative Strategy* and *All Azimuth*.

Learning for Life in Our Times Routledge

The papers in this volume analyze the deployment of Big Data to solve both existing and novel challenges in economic measurement. The existing infrastructure for the production of key economic statistics relies heavily on data collected through sample surveys and periodic censuses, together with administrative records generated in connection with tax administration. The increasing difficulty of obtaining survey and census responses threatens the viability of existing data collection approaches. The growing availability of new sources of Big Data—such as scanner data on purchases, credit card transaction records, payroll information, and prices of various goods scraped from the websites of online sellers—has changed the data landscape. These new sources of data hold the promise of allowing the statistical agencies to produce more accurate, more disaggregated, and more timely economic data to meet the needs of policymakers and other data users. This volume documents progress made toward that goal and the challenges to be overcome to realize the full potential of Big Data in the production of economic statistics. It describes the deployment of Big Data to solve both existing and novel challenges in economic measurement, and it will be of

interest to statistical agency staff, academic researchers, and serious users of economic statistics.

Chinese Culture in the 21st Century and its Global Dimensions Springer

Marriages and Families in the 21st Century puts contemporary relationships and family structures in context for today's students. Using a bioecological framework, the book reveals how families are shaped by multiple influences, from biological to cultural, that interact with one another. Chapters cover topics from parenting to gender issues within an interdisciplinary context, weaving in stories, visuals, and examples of diverse families to dispel longstanding myths. The book creates a personalized learning experience with frequent self-assessments and strengths exercises, while ensuring that students come to understand the research and build scientific analysis and critical thinking skills along the way. Robust digital tools and resources including SAGE edge and an interactive eBook with SAGE Premium Video help readers develop a multi-layered understanding of today's modern families while challenging them to re-evaluate their own assumptions and experiences. SAGE Premium Video included in the Interactive eBook! Families Today videos boost comprehension and bolster analysis—easily accessible via the interactive eBook. Your students save when you bundle the interactive eBook with the new edition. Use bundle ISBN 978-1-5063-9879-2. Learn more. SAGE coursepacks: Our Content Tailored to Your LMS! SAGE coursepacks makes it easy to import our quality instructor and student resource content into your school's learning management system (LMS). Intuitive and simple to use, SAGE coursepacks allows you to customize

course content to meet your students' needs. Learn more.

The Multiplayer Classroom St. Martin's Press

The conservation and management of cultural landscapes, interpreted as the result of the interrelationships among economic, social and environmental factors through time and space, emerges as essential components in the definition and application of a modern approach to sustainable development. Cultural landscapes are the result of management practices and knowledge accumulated in human history and contribute not only to the cultural heritage of the world, but also to biodiversity and aesthetic beauty, providing also multiple goods and services for the development of rural areas. However, landscapes are severely endangered not only by some effects of the socioeconomic development, but also by inappropriate policies in agriculture, forestry and nature conservation. This interdisciplinary book presents a range of different methods developed to analyse, restore and manage cultural landscapes, reporting a number of case studies from Europe and north America, but raising some questions about the need for a revision of some past orientations.

Comparing US Alliances in the 21st Century University of Chicago Press

This book constitutes the refereed proceedings of the 7th European Conference on Technology Enhanced Learning, EC-TEL 2012, held in Saarbrücken, Germany, in September 2012. The 26 revised full papers presented were carefully reviewed and selected from 130 submissions. The book also includes 12 short papers, 16 demonstration papers, 11 poster papers, and 1 invited paper. Specifically, the

programme and organizing structure was formed through the themes: mobile learning and context; serious and educational games; collaborative learning; organisational and workplace learning; learning analytics and retrieval; personalised and adaptive learning; learning environments; academic learning and context; and, learning facilitation by semantic means.

Pharmacy Education in the Twenty First Century and Beyond ANU Press
The 21st century has brought new and challenging dimensions to our understanding of security and migration. The old Cold War framework of security as related to war and peace, international relations and foreign affairs has given way to a multiplicity of competing notions, including internal security, human security and even social security. At the same time, migration has become a hotly contested issue, characterised by an enormous difference of views and objectives. So what do we mean by security and migration in the contemporary world? How do these two important fields intersect? And what does this collision of policy concerns and public interests mean for states and individuals alike? In this cutting-edge book, Elspeth Guild seeks to answer these pressing questions, drawing on a wide range of recent examples from the impact of asylum seekers on state border security to identity security in citizenship rules to illustrate her arguments. By approaching the topic from the perspective of the individual – citizen of one state, migrant in another – the book examines key aspects of the security-migration nexus, such as the relationship with refugees; torture;

extraordinary rendition; privacy and the retention of personal data; and human rights' protection. The first volume in Polity's new 'Dimensions of Security' series, this book is a must-read for all students of international politics, development studies and related fields.

21st Century Skills National Academies Press

A radical new management model for twenty-first century leaders
Organizations today face a crisis. The crisis is of long standing and its signs are widespread. Most proposals for improving management address one element of the crisis at the expense of the others. The principles described by award-winning author Stephen Denning simultaneously inspire high productivity, continuous innovation, deep job satisfaction and client delight. Denning puts forward a fundamentally different approach to management, with seven inter-locking principles of continuous innovation: focusing the entire organization on delighting clients; working in self-organizing teams; operating in client-driven iterations; delivering value to clients with each iteration; fostering radical transparency; nurturing continuous self-improvement and communicating interactively. In sum, the principles comprise a new mental model of management. Author outlines the basic seven principles of continuous innovation The book describes more than seventy supporting practices Denning offers a rethinking of management from first principles This book is written by the author of *The Secret Language of Leadership*—a Financial Times Selection in Best Books of 2007.
