RANDOM WALK DOWN

WALL STREET TV

analysts and money managers would have you believe your finances are enormously complicated, and if you don't follow their guidance, you'll end up in the poorhouse. They're wrong. When University of Chicago professor Harold Pollack interviewed Helaine Olen, an award-winning financial journalist and the author of the bestselling *Pound Foolish*, he made an off-hand suggestion: everything you need to know about managing your money could fit on an index card. To prove his point, he grabbed a 4" x 6" card, scribbled down a list of rules, and posted a picture of the card online. The post went viral. Now, Pollack teams up with Olen to

explain why the ten simple rules of the index card outperform more complicated financial strategies. Inside is an easy-to-follow action plan that works in good times and bad, giving you the tools, knowledge, and confidence to seize control of your financial life.

The World's Easiest Guide to Finances

Making, keeping, and enjoying money isn't just about investments, salaries, inheritances, or dividends, according to Deborah Price. It's also about the games people play around money and their character type in relation to it. In *Money Magic*, Price shows how to transform your relationship with money to obtain the wealth you desire. The

book is structured around eight "types": the Innocent (the ostrich approach); the Victim (blaming circumstances); the Warrior (conquering money); the Martyr (always rescuing someone); the Fool (gambler looking for a windfall); the Creator/Artist (regarding money as evil); the Tyrant (controlling through money); and the Magician (benefitting spiritually and financially from money). The Magician is the book's ideal, and Price offers exercises to help readers attain it. Describes eight money types, and offers quizzes to determine your type. Shows readers how to stop making fear-based money choices.

A Proven Plan for

Financial Fitness Simon and Schuster
 NEW YORK TIMES, WALL STREET JOURNAL, AND USA TODAY BESTSELLER •
 A ten-step plan for finding peace, safety, and harmony with your money—no matter how big or small your goals and no matter how rocky the market might be—by the inspiring and savvy
 “Budgetnista.” “No matter where you stand in your money journey, Get Good with Money has a lesson or two for you!”—Erin Lowry, bestselling author of the Broke Millennial series
 Tiffany Aliche was a successful pre-school teacher with a healthy nest egg when a recession and advice from a shady advisor put her out of a job and into a huge financial hole. As she

began to chart the path to her own financial rescue, the outline of her ten-step formula for attaining both financial security and peace of mind began to take shape. These principles have now helped more than one million women worldwide save and pay off millions in debt, and begin planning for a richer life. Revealing this practical ten-step process for the first time in its entirety, *Get Good with Money* introduces the powerful concept of building wealth through financial wholeness: a realistic, achievable, and energizing alternative to get-rich-quick and over-complicated money management systems. With helpful checklists, worksheets, a tool kit of resources,

and advanced advice from experts who Tiffany herself relies on (her “Budgetnista Boosters”), *Get Good with Money* gets crystal clear on the short-term actions that lead to long-term goals, including:

- A simple technique to determine your baseline or “noodle budget,” examine and systemize your expenses, and lay out a plan that allows you to say yes to your dreams.
- An assessment tool that helps you understand whether you have a “don't make enough” problem or a “spend too much” issue—as well as ways to fix both.
- Best practices for saving for a rainy day (aka job loss), a big-ticket item (a house, a trip, a car), and money that can be

invested for your future. • Detailed advice and action steps for taking charge of your credit score, maximizing bill-paying automation, savings and investing, and calculating your life, disability, and property insurance needs. • Ways to protect your beneficiaries' future, and ensure that your financial wishes will stand the test of time. An invaluable guide to cultivating good financial habits and making your money work for you, *Get Good with Money* will help you build a solid foundation for your life (and legacy) that's rich in every way.

John Wiley & Sons Applied Mathematics for Personal Finance provides a general introduction to the ways that mathematics can be applied to

personal financial decision-making. This book is suitable for college students with no previous background in economics or finance; only familiarity with high school algebra is assumed. This book demonstrates how you can utilize math skills you already know in application areas that may be unfamiliar; it also introduces some new math skills that you can apply to familiar problems. The book emphasizes the development and application of the economic life-cycle model as the framework for evaluating all of your personal financial decisions. Economists, including six Nobel Laureates, have spent close to a century developing the concept

of life-cycle consumption smoothing.

“Smoothing” refers to the need to spread your economic resources over your lifetime, taking into account that your future is highly uncertain.
