[Community Public Health in Policy and Practice E-Book](#) Routledge

This edited book examines English-Medium Instruction (EMI) language policy and practice in higher education around the world, highlighting how English language usage affects the internationalization of universities, the way that disciplines are taught and learned, and questioning whether internationalization through EMI achieves the values of global citizenship and inclusivity/diversity to which it aspires. Written by experts in the field, the book includes data-based research from universities around the globe, with three chapters on Asia and the Far East (Malaysia, Japan and China), four on Europe (Denmark, the Netherlands and Italy) and one each on Africa (Ethiopia) and Central America (Mexico). Sources include policy documents, questionnaire surveys, focus groups and semi-structured interviews involving university policymakers, lecturers, students, and administrative staff. This book will be of interest to students and scholars of language and education policy, internationalization and applied linguistics, particularly English-Medium Instruction (EMI), academic English and English as a Lingua Franca (ELF).

Education and Elitism Elsevier Health Sciences

An incisive analysis of South Africa's ANC power-as party, as government, as state South Africa's African National Congress (ANC) is in decline, its hegemony has been weakened, its legitimacy diluted. President Cyril Ramaphosa's appointment suspended the ANC's electoral decline, it also heightened internal tensions between those who would deepen its acquired status as corrupt and captured, and those who would remodel it as redeemable. These are the incontrovertible knowns of South African politics; what will evolve from this is less certain. In *Precarious Power*, renowned political scientist Susan Booysen uses in-depth research and analysis to distill that which is bound to shape South Africa's political future, Booysen focuses on contradictory party politics and internal ANC dissent that is veiled for the sake of retaining an electoral following. Also exposed is the incongruous, populist policymaking, protest politics and the use of soft law to ensure it does not alienate angry citizens, fueling further discontent and protest. The ANC's power has become exceedingly precarious. *Precarious Power* is the name of the political game, for the foreseeable future. The comprehensive analysis in *Precarious Power* will appeal not only to political scientists and postgraduate students, but to all who take a keen interest in current affairs.

Managing Assets for the Future Cambridge University Press

This book addresses recent advances in the field of river systems. Chapters cover a wide range of topics including artificialization of rivers and banks, technical aspects of flood and sediment dynamics, physical processes and institutional vulnerabilities, watershed management and collaborative governance, water quality analysis and protection measures, acquisition and measurement of data, statistical and econometric procedures, adaptation and restoration measures, rehabilitation and sustainability of riparian ecosystems, and strategies to improve the ecological functions of riparian areas. All chapters contribute relevant information and useful content for scientists and other readers interested or concerned about the lack of adequate management actions and implementation of appropriate measures and protections, or their ineffectiveness in containing vulnerabilities and ecological sustainability of river systems.

Indigenous Knowledge, Policies, and Planning Springer Nature

"Kidney disease is frequently described as a public health problem. This book will unpack what we mean by "public health" and by "taking a public health approach." We will consider the global burden of kidney diseases and their determinants, with a focus on chronic kidney disease"-- *Cities, Space and Power* Cyclones in Southern Africa Volume 2: Foundational and Fundamental Topics The authors of the chapters included in this volume provide preliminary answers to questions such as: How extensive were COVID-19 outbreaks in prisons, jails, and community corrections systems globally? Which regions and countries reported the largest outbreaks? Why were prisons and jails found to be "hot spots" for the spread of COVID-19 in most countries? How did governments initially respond to COVID-19 outbreaks in their corrections systems? Did the mitigation strategies used in each country reduce the spread of the infection in the corrections system (both in prisons and jails, and in community corrections)? Did the corrections-focused mitigation strategies used in each country have a positive or an adverse impact on public health and public safety? How likely is it that the varied short-term mitigation strategies implemented by governments will result in long-term changes in corrections policies and practices? The book includes three chapters examining the global impact of the COVID-19 outbreaks, six regional overviews, and 27 country-specific reviews, including reviews targeting 21 of the 50 largest prison systems globally. This collection will be an excellent resource for researchers, policymakers, practitioners, and the general public interested in knowing more about the nature and extent of COVID-19 outbreaks in corrections systems globally, and about the diversity of responses developed and implemented by governments from each global region. The chapters in this book were originally published as a special issue of the journal *Victims & Offenders*.

It is now clear that a narrow focus on the growth of gross domestic product (GDP) is insufficient to achieve humanity's aspirations for sustainable prosperity. Well-functioning ecosystems and educated populations are requisites for sustainable well-being. These and other too-often-neglected ingredients of national wealth must be addressed if the development path is to be sustainable. 'The Changing Wealth of Nations 2021: Managing Assets for the Future' provides the most comprehensive accounting of the wealth of nations, an in-depth analysis of the evolution of wealth, and pathways to build wealth for the future. This report--and the accompanying global database--firmly establishes comprehensive wealth as a measure of sustainability and a key component of country analytics. It expands the coverage of wealth accounts and improves our understanding of the quality of all assets, notably, natural capital. Wealth--the stock of produced, natural, and human capital--is measured as the sum of assets that yield a stream of benefits over time. Changes in the wealth of nations matter because they reflect the change in countries' assets that underpin future income. Countries regularly track GDP as an indicator of their economic progress, but not wealth, and national wealth has a more direct and long-term impact on people's lives. This report provides a new set of tools and analysis to help policy makers navigate risks and to guide collective action.

Wealth accounts can be applied in macroeconomic analysis to areas of major policy concern such as climate change and natural resource management. This report can be used to look beyond GDP, to gauge nations' economic well-being, and to promote sustainable prosperity.

[A Political Economy of the Times of My Life](#) BRILL

Access to water and sanitation remains a critical challenge in various countries in Africa. The crisis remains the crisis of governance rather than the physical and economic scarcity. In most countries, water is realized as a human right and subsidies are provided for the indigent households. The tricky issue in rural areas remains an issue of access that is often linked to willingness and ability to pay for the installation and daily consumption. The Handbook of Research on Resource Management and the Struggle for Water Sustainability in Africa presents practical examples of integrated water resources management (IWRM) implementation in African countries. It further addresses the contemporary issues of alternative energy as part of climate change mitigation and utilizes case studies to examine how communities adapt to climate change. Covering topics such as climate justice, ecological governance, and political ecology, this major reference work is a dynamic resource for government officials, sociologists, climate scientists, activists, students and educators of higher education, academicians, and researchers in the fields of social sciences, government, developmental studies, international relations, and political science.

Case Studies and Solutions Routledge

This book provides an analysis of South African urban change over the past three decades. It draws on a seminal text, *Homes Apart*, and revisits conclusions drawn in that collection that marked the final phases of urban apartheid. It highlights changes in demography, social as well as economic structure and their differential spatial expression across a range of urban sites in South Africa. The evidence presented in this book points to a very complex set of narratives in urban South Africa and one that cannot be reduced to a singular statement so the conclusions of the various investigations are in many ways open. As urban apartheid represented one clear outcome, its post-apartheid urban legacies varies greatly from city to city. As such this book is a great resource to students and academics focused on urban change in South African cities since the demise of apartheid, and scholars of urban policy-making in South Africa and Southern urbanists generally.

[Culture and Rural-Urban Revitalisation in South Africa](#) Routledge

Following the release of the Public Protector's State of Capture Report in November 2016, South Africans have been witness to an explosion of almost daily revelations of corruption, mismanagement and abuses by those entrusted to lead the nation. The extent of this betrayal is overwhelming and it is often difficult to distil what actually happened during the Zuma administration. This book draws on the insights and expertise of 19 contributors from various sectors and disciplines to provide an account of what transpired at strategic sites of the state capture project. The ongoing threat of state capture demands a response that probes beyond what happened to understanding how it was allowed to happen. The stubborn culture of corruption and misgovernance continue to manifest unabated and the predatory practices which enable state capture have not yet been disrupted. It is our hope that the various case studies and analyses presented in this book will contribute to confronting these shortcomings in current discourse, and open avenues for progressive deliberation on how to collectively reclaim the prospects of a just and prosperous South Africa for all.

Focusing on a prominent episode of anti-immigrant violence in the Durban area of the KwaZulu-Natal province, *Addressing Xenophobia in South Africa* identifies the hidden, less addressed dimensions and catalysts of Xenophobia in South Africa.

[PROCEEDINGS OF THE 20TH CONFERENCE ON FORMAL METHODS IN COMPUTER-AIDED DESIGN - FMCAD 2020](#) Springer Nature

This book documents the experiences, development, and prospects of the construction industry in numerous developing countries. It will provide a strong base of reference for countries looking to improve their construction industries as part of their wider economic development programme. The opening chapter presents a strategic overview of the contents of the book, and each country-specific chapter is structured to consider the legal and policy frameworks, administrative infrastructure and procedures, and implementation mechanisms, as well as the experiences, current activities, and future plans and programmes with respect to construction industry development in each country. The concluding chapter looks forward and considers the implications of future trends for the construction industries in developing countries and the actions which will be required to address them. Chapters cover: India, Singapore, Chile, South Africa, Tanzania, Malaysia, Botswana, Ghana, Uganda, Indonesia, China, Croatia, and Eswatini. Readers will learn about the wealth of comparable stories from global coverage from the detailed country-specific cases. Building on important scholarly works in the field, this book is essential reading for academics, researchers, and policy makers in built environments, economics, construction management, infrastructure management, and the wider construction industry.

Africa First! NYU Press

This book explores the role of the university in upholding democratic values for societal change. The chapters advocate for the moral virtue of democratic patriotism: the editors and contributors argue that universities, as institutions of higher learning, can encourage the creation of critical and patriotic citizens. The book suggests that non-violence, tolerance, and peaceful co-existence ought to manifest through pedagogical university actions on the basis of educators' desire to cultivate reflectiveness, criticality, and deliberative inquiry in and through their academic programmes. In a way, universities can respond more positively to the violence on our campuses and in society if public and controversial issues were to be addressed through an education for democratic citizenship and human rights.

Preventing HIV Among Young People in Southern and Eastern Africa Rowman & Littlefield

This book captures ground-breaking attempts to utilise culture in territorial development and regeneration processes in the context of South Africa and our 'new normal' brought by COVID-19, the fourth industrial revolution, and climate change the world over. The importance of culture in rural-urban revitalisation has been underestimated in South Africa and the African continent at large. Despite some cultural initiatives that are still at developmental stages in big cities, such as Johannesburg, eThekweni and Cape Town, there is concern about the absence of sustainable policies and plans to support culture, creativity, and indigenous knowledge at national and municipal levels. Showcasing alternative strategies for making culture central to development, this book discusses opportunities to shift culture and indigenous knowledge from the peripheries and place them at the

epicentre of sustainable development and the mainstream of cultural planning, which can then be applied in the contexts of Africa and the Global South. Governmental institutions, research councils, civil society organisations, private sector, and higher education institutions come together in a joint effort to explain the nexus between culture, economic development, rural-urban linkages, grassroots and technological innovations. Culture and Rural-Urban Revitalization in South Africa is an ideal read for those interested in rural and urban planning, cultural policy, indigenous knowledge and smart rural village model.

Wildlife Tourism Futures IGI Global

This volume critically examines sources of evidence and material from the archive that historically have been used to tell southern Africa's pre-colonial story.

Sustainable and Smart Spatial Planning in Africa Academic Conferences Inter Ltd

This book examines immigration policies and politics in Africa, the social impacts and history of xenophobia and nativism in African life and culture, and the effects of xenophobia and nativism on Pan-Africanism. The chapters also offer suggestions for reducing xenophobia and nativism in Africa through social and economic policies.

Human resource strategies to improve newborn care in health facilities in low- and middle-income countries Channel View Publications

The COVID-19 pandemic has introduced a new paradigm in education that has forced school management teams to re-imagine their curricula delivery functions and obligations during and post COVID-19. Now there are concerns about the state to which curriculum delivery in schools is likely to become planned, implemented, and managed. Investigating the Roles of School Management Teams in Curriculum Delivery improves the quality of planning, implementation, and management of curriculum delivery to advance the quality of teaching and learning in schools. Particularly, it envisages innovative strategies, best practices, and addresses problems in the planning, implementation, and delivery of curricula by school management teams. Covering topics such as curriculum delivery theory, curriculum delivery in planning, implementation, and management during and post COVID-19; curriculum delivery in assessment and alternative assessment; and reimagining inclusivity in curriculum delivery, this edited book is essential for departmental heads, deputy principals, education district officials, department of basic education curriculum designers, instructional designers, administrators, academicians, university teachers, researchers, and post-graduate students.

A Sourcebook Karger Medical and Scientific Publishers

This book provides a novel and holistic perspective on the deployment of prepaid electricity meter technology among energy impoverished (vulnerable) households based in developing or under-developed communities of Sub-Saharan Africa. It explores and reviews the nexus between the technology and socio-economic development, technology acceptance and rejection in low-income households, and ultimately proposes a contextual model to avert or assuage energy poverty in the region using the technology. Science is applied as a convenient, valid, and reliable model to

generate bespoke, contextual, and relevant knowledge for policy makers on the development of prepaid meter market in the region. The knowledge shared contributes to extant discourse and debates around the effectiveness of the technology within indigent household settings. The book is intended for energy/electricity utilities, prepaid electricity businesses, policy developers, and other interested parties whose work is related to prepaid electricity meters.

Cyclones in Southern Africa Frontiers Media SA

The need to promote academic activities in telehealth remains a high priority as the discipline expands into new areas of healthcare. Response during 2020 to the COVID-19 pandemic has provided an excellent example of the rapid diversification and impact attainable with telehealth, and may kindle a new momentum for accelerated service design and adoption processes in the future.

This book, Telehealth Innovations in Remote Healthcare Services Delivery, is the tenth in the Global Telehealth series. Due to the prevailing COVID-19 pandemic and the restrictions placed on academic gatherings, the organizers issued a general call for contributions, with the intention of attracting a wide cross-section of contributions reflecting the breadth of different aspects of telehealth internationally. The resulting collection offers snapshots of research projects and studies of service experience from five continents, with an emphasis on delivering benefits in regional settings in keeping with the theme of the book's title. Articles range from descriptions of telehealth networks and clinical-service instances such as cardiac health, mental health and pathology, several in Pacific-rim settings, to more generic papers on the evolution of such services, as well as commentaries on innovative considerations for telehealth such as the emergence of the concept of virtual care, the suitability of health apps, and the status of eHealth readiness in the developing world. This book is a valuable contribution to the body of knowledge on current telehealth research interests and trends, and will be of interest to all those working in the field.

Decolonial Perspectives on Political Economy and Corruption IGI Global

Education and Elitism discusses polemical debates around privilege, private schools, elitist universities, equal access to education and underlying notions of fairness. The overarching question that runs through the book is about the future of education worldwide: how can schools and universities tread the tightrope between access and quality? This book investigates the philosophical positions that characterize elitism and anti-elitism to establish three types: meritocratic, plutocratic and cultural. These types of elitism (and their counter-positions) are used as reference points throughout the book's analysis of successive educational themes. The conclusion leads to suggestions that bridge the worlds of elitism and egalitarianism worldwide. The book covers critical questions related to the sociology and philosophy of education with particular focus on contemporary disruptors to education such as the COVID-19 pandemic and protest movements for social justice. With an attempt to offer readers an objective overview, this book will be an excellent compendium for students, academics, and researchers of the sociology of education, education policy and comparative education. It will also be of interest to school leaders, university provosts and professionals working in curriculum design.
