Do you want to make sure you · Don't invest your money in the next Enron? · Don't go to work for the next WorldCom right before the crash? · Identify and solve problems in your organization before they send it crashing to the ground? Marianne Jennings has spent a lifetime studying business ethics---and ethical failures. In demand nationwide as a speaker and analyst on business ethics, she takes her decades of findings and shows us in *The Seven Signs of Ethical Collapse* the reasons that companies and nonprofits undergo ethical collapse, including: · Pressure to maintain numbers · Fear and silence · Young 'uns and a larger-than-life CEO · A weak board · Conflicts · Innovation like no other · Belief that goodness in some areas atones for wrongdoing in others Don't watch the next accounting disaster take your hard-earned savings, or accept the perfect job only to find out your

boss is cooking the books. If you're just interested in understanding the (not-so) ethical underpinnings of business today, *The Seven Signs of Ethical Collapse* is both a must-have tool and a fascinating window into today's business world.

This book examines the ethical and regulatory debates surrounding the rise of the cosmetic procedures industry. In the past, cosmetic procedures were often seen as limited to a small number of wealthy older women. Today, such procedures have gone mainstream, partly facilitated by the rise of "non-invasive" techniques, such as the use of Botox and Dermal Fillers. While still a business dominated by the female consumer, there are also an increasing number of males undertaking cosmetic procedures as social expectations around appearance and ageing are challenged. At the same time, the rapid expansion of this business, and the incoherent, diverse approach to its regulation, have given rise to concern. It has been seen as a "Wild West". If cosmetic procedures go wrong, such procedures give rise to real risks of harm. This book examines the historical backdrop, current practice and risks associated with cosmetic procedures. It discusses the ethical and regulatory challenges for this area. It also examines the current legal frameworks concerning people, practitioners and products in the UK. The book also draws lessons from regulatory approaches in other jurisdictions with particular reference to the United States, Brazil and France. It then sets out a legal and regulatory framework that might better protect and empower the cosmetic consumer, now and in the future. The book is likely to be of particular interest to those working in the areas of health and medical law, socio-legal studies and political science.
