The book repositions He-Yin Zhen as central to the development of feminism in China, juxtaposing her writing with fresh translations of works by two of her better-known male interlocutors. The editors begin with a detailed portrait of He-Yin Zhen's life and an analysis of her thought in comparative terms. They then present annotated translations of six of her major essays, as well as two foundational tracts by her male contemporaries, Jin Tianhe (1873-1947) and Liang Qichao (1873-1929), to which He-Yin's work responds and with which it engages. Jin Tianhe, a poet and educator, and Liang Qichao, a philosopher and journalist, understood feminism as a paternalistic cause that "enlightened" male intellectuals like themselves should defend. Zhen counters with an alternative conception of feminism that draws upon anarchism and other radical trends in thought.

Why Stories Matter Routledge

Feminist Perspectives on Politics considers how feminist perspectives have considerably broadened the scope of what is considered 'political'. Themes and issues covered range from nineteenth century debates around women's equality and liberation, to twentieth century arguments and activities towards gaining a more nuanced understanding of women's differences and diversity. ' Difference' remains a key term in contemporary feminisms, and the author examines debates engendered from women's liberation politics to open up discussion of Black feminisms, lesbian politics and disabled feminist agendas. Formal political participation and the impact of women's movement politics are assessed in global comparisons as are the debates surrounding discourses on 'development' and transnational politics, and the influence of women at local, national and international levels. The book will be essential reading for students at all levels across the fields of Politics, Women's Studies, Sociology, History, Cultural Studies, Political Economy and 'Development' Studies more generally (such as in studies concerned with anti-racism, gender, social policy and the history of ideas within educational institutions, local government and voluntary organisations)

This is the first book to offer a systematic account of feminist philosophy as a distinctive field of philosophy. The book introduces key issues and debates in feminist philosophy including: the nature of sex, gender, and the body; the relation between gender, sexuality, and sexual difference; whether there is anything that all women have in common; and the nature of birth and its centrality to human existence. An Introduction to Feminist Philosophy shows how feminist thinking on these and related topics has developed since the 1960s. The book also explains how feminist philosophy relates to the many forms of feminist politics. The book provides clear, succinct and readable accounts of key feminist thinkers including de Beauvoir, Butler, Gilligan, Irigaray, and MacKinnon. The book also introduces other thinkers who have influenced feminist philosophy including Arendt, Foucault, Freud, and Lacan. Accessible in approach, this book is ideal for students and researchers interested in feminist philosophy, feminist theory, women's studies, and political theory. It will also appeal to the general reader.

Feminist Theory and the Philosophies of Man Routledge

This book develops an intersectional feminist approach to moral responsibility. It accomplisheses four main goals. First, it outlines a concise list of the main principles of intersectional feminism. Second, it uses these principles to critique prevailing philosophical theories of moral responsibility. Third, it offers an account of moral responsibility that is compatible with the ethos of intersectional feminism. And fourth, it uses intersectional feminist principles to critique culturally normative responsibility practices. This is the first book to provide an explicitly intersectional feminist approach to moral responsibility. After identifying the five principles central to intersectional feminism, the author demonstrates how influential theories of responsibility are incompatible with these principles. She argues that a normatively adequate theory of blame should not be preoccupied with the agency or traits of wrongdoers; it should instead underscore, and seek to ameliorate, oppression and adversity as experienced by the marginalized. Apt blame and praise, according to her intersectional feminist account, is both communicative and functionalist. The book concludes with an extensive discussion of culturally embedded responsibility practices, including asymmetrically structured conversations and gender- and racially biased social spaces. An Intersectional Feminist Approach to Moral Responsibility presents a sophisticated and original philosophical account of moral

responsibility. It will be of interest to philosophers working at the crossroads of moral responsibility, feminist philosophy, critical race theory, queer theory, critical disability studies, and intersectionality theory.

No other cluster of medical issues affects the genders as differently as those related to procreationcontraception, sterilization, abortion, artificial insemination, in-vitro fertilization, surrogate motherhood, and genetic screening. Rosemarie Tongs approach to feminist bioethics serves as a catalyst to bring together different feminist voices in hope of actually doing something to make gender equity a present reality rather than a mere future possibility. No other cluster of medical issues affects the genders as differently as those related to procreationcontraception, sterilization, abortion, artificial insemination, in vitro fertilization, surrogate motherhood, and genetic screening. Yet, the moral diversity among feminists has led to political fragmentation, foiling efforts to create policies that are likely to serve the interests of the largest possible number of women. In this remarkable book, Rosemarie Tong offers an approach to feminist bioethics that serves as a catalyst, bringing together the varied perspectives on choice, control, and connection. Emphasizing the complexity of feminist debates, she guides feminists toward consensus in thought, cooperation in action, and a world that would have no room for domination and subordination.Tong fairly and comprehensively presents the traditions of both feminist and non-feminist ethics. Although feminist approaches to bioethics derive many insights from nonfeminist ethics and bioethics, Tong shows that their primary source of inspiration is feminist ethics, leading them to ask the so-called woman question in order to raise womens consciousness about the systems, structures, and relationships that oppress them. Feminist bioethicists are, naturally, focused on acting locally in the worlds of medicine and science. Their different feminist voices must be raised at the policy table with one message in order to actually do something to make gender equity a present reality rather than a mere future possibility. Inability to define a plan that guarantees liberation for all women must not prevent feminists from offering a plan that promises to improve the estates of many women. Otherwise, a perspective less appealing to women may fill the gap.

Global Media Studies explores the theoretical and methodological threats that are defining global media studies as a discipline. Emphasizing the connection of globalisation to local culture, this collection considers the diversity of modes of reception, reception contexts, uses of media content, and the performative and creative relationships that audiences develop with and through the media. Through ethnographic case studies from Brazil, Denmark, the UK, Japan, Lebanon, Mexico, South Africa, Turkey and the United States, the contributors address such questions as: what links media consumption to a lived global culture; what role cultural tradition plays globally in confronting transnational power; how global elements of mediated messages acquire class; and regional and local characteristics.

Feminism and the Contradictions of Oppression Routledge

At no point in recorded history has there been an absence of intense, and heated, discussion about the subject of how to conduct relations between women and men. This Handbook provides a comprehensive guide to these omnipresent issues and debates, mapping the present and future of thinking about feminist theory. The chapters gathered here present the state of the art in scholarship in the field, covering: Epistemology and marginality Literary, visual and cultural representations Sexuality Macro and microeconomics of gender Conflict and peace. The most important consensus in this volume is that a central organizing tenet of feminism is its willingness to examine the ways in which gender and relations between women and men have been (and are) organized. The authors bring a shared commitment to the critical appraisal of gender relations, as well as a recognition that to think 'theoretically' is not to detach concerns from lived experience but to extend the possibilities of understanding. With this focus on theory and theorizing about the world in which we live, this Handbook asks us, across all disciplines and situations, to abandon our taken-for-granted assumptions about the world and interrogate both the origin and the implications of our ideas about gender relations and feminism. It is an

essential reference work for advanced students and academics not only of feminist theory, but of gender and sexuality across the humanities and social sciences.

In this second edition of her 1989 survey on feminist theory, Rosemarie Tong provides a more comprehensive and substantially redrawn map of twentieth-century feminist thinking. Besides providing up-to-date coverage of liberal, radical (libertarian and cultural), and Marxist-socialist schools of feminism, she covers psychoanalytic, existentialist, and postmodern feminism. All the chapters have been rethought and new chapters on ecofeminism and multicultural and global feminism have been added. In the clear-sighted and accessible style for which she has become known, Tong guides the reader through the complexities of even the most notoriously difficult thinkers. Students will become familiar with many of the essential figures in the feminist tradition as well as some of the issues that have been of special concern to women (e.g., pornography, reproductive technology, housework, the environment, and militarism). Moreover, students are repeatedly urged to consider the many differences that separate women (class, race, ethnicity, age, nationality, religion) as well as the sameness that continues to unite women. Tong treats all views with respect and encourages the reader to think both sympathetically and critically about what feminism is and what relevance it has to their own lives. As valuable as the first edition of *Feminist Thought*, this second edition surpasses its predecessor in depth and breadth. Clearly, Tong believes that feminist thought is still developing even as it approaches the millennium.

Lambda Literary Award for Best Book in Transgender Nonfiction, 2013 If feminist studies and transgender studies are so intimately connected, why are they not more deeply integrated? Offering multidisciplinary models for this assimilation, the vibrant essays in *Transfeminist Perspectives* in and beyond Transgender and Gender Studies suggest timely and necessary changes for institutions of higher learning. Responding to the more visible presence of transgender persons as well as gender theories, the contributing essayists focus on how gender is practiced in academia, health care, social services, and even national border patrols. Working from the premise that transgender is both material and cultural, the contributors address such aspects of the university as administration, sports, curriculum, pedagogy, and the appropriate location for transgender studies. Combining feminist theory, transgender studies, and activism centered on social diversity and justice, these essays examine how institutions as lived contexts shape everyday life.
