Albert Einstein Aerial

Regenerative medicine demands new concepts and fabrication tools to improve our common knowledge about cell-cell and cell-environment interactions. In this work, Michele Bianchi shows that different kinds of signals, such as chemical, topographical, and electrical signals, can be arranged in a highly-controlled way. Furthermore, Michele uses scale lengths ranging from several micrometers to a few nanometers, through the employment of unconventional fabrication techniques. For each signal, Michele chose properly designed materials and fabrication methods. The external signals are capable of controlling cell adhesion and growth, opening the way for a systematic investigation of the environmental features affecting cell behaviour.

Multiscale Fabrication of Functional Materials for Regenerative Medicine Penguin

This book chronicles the evolution of architecture in the St. Louis area between 1948 and 1973, with insightful essays by established architectural scholars on the significant aspects of modern architecture in St. Louis and of the Washington University School of Architecture in the flowering of mid-century American modernism. Archival photographs and drawings illustrate the authors' historical analyses, and statements about the school written by distinguished alumni and faculty, including Fumihiko Maki, a former faculty member, illuminate a rich pocket of little-known American creativity.

The Illustrator 7 Wow! Book National Geographic Books

Following on the success of Never Built Los Angeles (Metropolis Books, 2013), authors Greg Goldin and Sam Lubell now turn their eye to New York City. New York towers among world capitals, but the city we know might have reached even more stellar heights, or burrowed into more destructive depths, had the ideas pictured in the minds of its greatest dreamers progressed beyond the drawing board and taken form in stone, steel, and glass. What is wonderfully elegant and grand might easily have been ingloriously grandiose; what is blandly unremarkable, equally, might have become delightfully provocative or humanely inspiring. The ambitious schemes gathered here tell the story of a different skyline and a different sidewalk alike. Nearly 200 ambitious proposals spanning 200 years encompass bridges, skyscrapers, master plans, parks, transit schemes, amusements, airports, plans to fill in rivers and extend Manhattan, and much, much more. Included are alternate visions for such landmarks as Central Park, Columbus Circle, Lincoln Center, MoMA, the U.N., Grand Central Station and the World Trade Centre site, among many others sites. Fact-filled and entertaining texts, as well as sketches, renderings, prints, and models drawn from archives all across the New York metropolitan region tell stories of a new New York, one that surely would have changed the way we inhabit and move through the city.

Marrying Buddha Harper Collins

Positions is an international, multidisciplinary, blind peer-reviewed scholarly journal devoted to the ongoing history, historiography, analysis, and theoretical reconceptualization of modern architecture and urbanism. The aim of the journal is not to settle once and for all the question of what modern architecture and urbanism has been or is. Rather Positions is a discursive forum for research on, inquiries into, and debate about modern architecture and urbanism; for the asking of new questions and the re-examination of old ones; for the framing of new research agendas and the reframing of familiar ones; for the excavation and analysis of unknown or understudied projects, institutions and movements and the reexamination of previously examined ones; and for the deepening of established theoretical perspectives and their contestation by new ones. In the spirit of modernism itself, the editors of Positions wish to break down the barriers that prevent the study of modern architecture and urbanism from becoming a truly international and multidisciplinary field, unhampered by linguistic barriers and the vastly different cultures of the many scholars currently at work. The contributions will lead toward multiple paths, sometimes heading in the same direction, sometimes following opposite tracks. The first issue of Positions will focus on global urbanism, providing scholars with a platform to present the latest explorations in the field, broadening its scope, and questioning the limits and inner logic of the body of knowledge amassed so far. With contributions by María González, Patricio del Real, Ellen Rowley, Wolfgang Sonne, Ruth Verde Zein, Ahmed Zaib Khan Mahsud

As Bees in Honey Drown Mit Press

This monumental work, first published in 1859, covers the history of libraries from classical times to the mid-nineteenth century, in Britain, Europe and America. The author was influential in founding municipal libraries in nineteenth-century Britain and regarded access to good libraries as crucial to education and civilisation. Volume 1, divided by the author into five 'books', is reissued here in two parts. The first two books deal with classical and medieval libraries, examining English and European monastic libraries in depth. Book 3 describes the core collections of the British Museum and other major university, ecclesiastical and public libraries of Britain and Ireland. Book 4 discusses the principal libraries of America and Book 5 those of continental Europe, from France to Hungary and Russia. This final volume (in four 'books') sets out Edwards' views on all aspects of library management, from physical layout and classification to rules and regulations.

Never Built New York Cambridge University Press

"Architects and engineers, city planners and administrators, sociologists and scientists have contributed to cover the problems of ... future development in the field of architecture, city and regional planning".--BOOKJACKET.

The Squickerwonkers Washington University in St Louis

Her second semi-autobiographical novel of desire and lust in a new city far from China...According to the author, Marrying Buddha is the continuation of her first novel Shanghai Baby, the international bestseller which was banned in China and catapulted her to fame and notoriety in the country of her birth. As in Shanghai Baby, the protagonist is Coco, a young successful female novelist who decides to leave Shanghai for New York. Coco embarks on the next leg of life's journey, a road that leads her through love, desire, and spiritual awakening. In Manhattan she meets Muju. Muju and Coco share a deep, intense passion, experimenting and exploring their desires at every available opportunity. But into this relationship enters glamorous, wealthy and impossibly urbane New Yorker Nick. And when as a result her relationship with Muju is threatened, Coco returns to China, to the tiny temple-studded island of Putu, the place of her birth. It is on Mount Putu where Coco finds some inner peace - but once back in Shanghai she is visited by both Muju and Nick and is once again caught up in the

intensity and passion of the two relationships. After both men leave Coco discovers she is pregnant, but has no idea of whether it is Muju or Nick who is the father...

Memoirs of Libraries New York : Philosophical Library

THE STORY: Evan Wyler has just finished a photo session with his shirt off. No, he's not a supermodel; he's a twenty-something New York writer savoring the success of his debut novel. Defined by the media as the hot-young thing-of-the-moment, Eva

The Federal Presence Yale University Press

The definitive story of the rise of Nintendo. In 1981, Nintendo of America was a one-year-old business already on the brink of failure. Its president, Mino Arakawa, was stuck with two thousand unsold arcade cabinets for a dud of a game (Radar Scope). So he hatched a plan. Back in Japan, a boyish, shaggy-haired staff artist named Shigeru Miyamoto designed a new game for the unsold cabinets featuring an angry gorilla and a small jumping man. Donkey Kong brought in \$180 million in its first year alone and launched the career of a short, chubby plumber named Mario. Since then, Mario has starred in over two hundred games, generating profits in the billions. He is more recognizable than Mickey Mouse, yet he's little more than a mustache in bib overalls. How did a mere smear of pixels gain such huge popularity? Super Mario tells the story behind the Nintendo games millions of us grew up with, explaining how a Japanese trading card company rose to dominate the fiercely competitive video-game industry.

A Macintosh CD-ROM is included with this step-by-step book, which features techniques, tips, and tricks from 80 leading illustrator artists. Illustrator 7's basic tools and functions are explored, professional production techniques are demonstrated by using real-life examples, and full-page gallery samples are included in full color.

Video Invaders Hachette UK

Andre Rival, at home in both Paris and Berlin, has created a fascinating project out of a relatively simple idea: 100 women taking photographs of themselves. The outcome is both startling and impressive. It is an expression of contemporary female identity - self-aware, distinctive and thoroughly positive, in a series of nude photographs that inexorably capture and hold our attention, revealing at the same time the artist's highly creative approach to the medium of photography and to the individual selves of the women portrayed. The author describes his project in this way: "We are inundated with pictures of women in the media. Ordinarily, the pictures we see seek to achieve a kind of 'sameness' based on unwritten ideals of beauty; physical perfection, total fitness become the determining factors. These images of women, provoked as they are by the media industry, awakened in me the urge to confront both that industry and myself with something else. I chose to set aside my own ways of thinking and do a series of 100 women in which it was not I who would put together the photographs, but the women themselves. For this purpose, I gave them each a shutter-switch and left the room. That represented the beginning of the attempt to enable the women to become photographic subjects rather than objects; they were left to decide on their own which personal image of themselves they wanted to convey. The conditions were the same for all of the women: the same lighting, the same white background and the same unchanged camera position. It was essential to fix the location of the camera, so that the women did not perceive themselves as being pursued by an 'observer'; instead, they were able to establish distance and camera angle themselves with the aid of a video screen that showed them each camera exposure as a still photo".

The Evolution of Gospel Music

Discusses the immensely popular video game which resulted from the marriage of the computer and the television.

The 2000 Year Old Man in the Year 2000

This kaleidoscopic survey of architecture and design traces the federal government's role in shaping America's built environment from L'Enfant's baroque plan for Washington, D.C. to the space-age technology of Cape Canaveral. Its rich exhibit of documents and photographic material accompanied by a lively text reveal the U.S. government to be one of the most active, and at times most creative, patrons of architecture and design.

A stunning look at the profound impact of the jet plane on the mid-century aesthetic, from Disneyland to Life magazine Vanessa R. Schwartz engagingly presents the jet plane's power to define a new age at a critical moment in the mid-20th century, arguing that the craft's speed and smooth ride allowed people to imagine themselves living in the future. Exploring realms as diverse as airport architecture, theme park design, film, and photography, Schwartz argues that the jet created an aesthetic that circulated on the ground below. Visual and media culture, including Eero Saarinen's airports, David Bailey's photographs of the jet set, and Ernst Haas's experiments in color photojournalism glamorized the imagery of motion. Drawing on unprecedented access to the archives of The Walt Disney Studios, Schwartz also examines the period's most successful example of fluid motion meeting media culture: Disneyland. The park's dedication to "people-moving" defined Walt Disney's vision, shaping the very identity of the place. The jet age aesthetic laid the groundwork for our contemporary media culture, in which motion is so fluid that we can surf the internet while going nowhere at all.

A Decade of Contemporary Architecture

Meet Selma of the Rin-Run Royals, a clever little girl who is spoiled to the core. One day Selma stumbles upon a band of colorful marionettes, and gets more than she bargained for. The remarkable Squickerwonkers of the fabulous Squickershow are about to teach Selma that she'll not always get her way. Evangeline Lilly is best known for her work as an actress, but her foremost

passion has always been writing. This book is her first published work. Beautifully illustrated by Johnny Fraser-Allen, this eccentric and visually stunning cautionary tale will appeal to adults and

children alike.
