White evangelicals have struggled to understand or enter into modern conversations on race and racism, because their inherited and imagined world has not prepared them for this moment. American Southerners, in particular, carry additional obstacles to such conversations, because their regional identity is woven together with the values and histories of white evangelicalism. In *Know Your Place*, Justin Phillips examines the three community loyalties (white, southern, and evangelical) that shaped his racial imagination. Phillips examines how each community creates blind spots that overlap with the others, insulating the individual from alternative narratives, making it difficult to conceive of a world different than the dominant white evangelical world of the South. When their world is challenged or rejected outright, it can feel like nothing short of the end of the world. Blending together personal experiences with ethics and pastoral sensibilities, Phillips traces for white, southern evangelicals a line running from the past through the present, to help his beloved communities see how their loyalties—their stories, histories, and beliefs—have harmed their neighbors. In order to truly love, repair, and reconcile brokenness, you first have to know your place.

Hard Country Music and Contemporary Culture Routledge

This is the first study of "hard" country music as well as the first comprehensive application of contemporary cultural theory to country music. Barbara Ching begins by defining the features that make certain country songs and artists "hard." She compares hard country music to "high" American culture, arguing that hard country deliberately focuses on its low position in the American cultural hierarchy, comically singing of failures to live up to American standards of affluence, while mainstream country music focuses on nostalgia, romance, and patriotism of regular folk. With chapters on Hank Williams Sr. and Jr., Merle Haggard, George Jones, David Allan Coe, Buck Owens, Dwight Yoakam, and the Outlaw Movement, this book is written in a jargon-free, engaging style that will interest both academic as well as general readers.

We shut down our schools, sports, theaters, bars, restaurants, and churches—government ignored the rule of law and put individual rights on hold—but it is more than obvious now that this was all a huge distraction. The focus should have been on the aged with underlying conditions living in nursing homes. The models nowhere included what ended up being our reality, even though that reality was upon us as early as February when people in nursing homes began to die in Washington State. We should have seen it long before the lockdowns began. Now the modelers in the epidemiological profession need to learn what the economists figured out long ago: Human life is too complex to be accurately modeled, much less predicted. Socio-Historical Examination of Religion and Ministry (SHERM journal) is a biannual, not-for-profit, free peer-reviewed academic journal that publishes the latest social-scientific, historiographic, and ecclesiastic research on religious institutions and their ministerial practices. SHERM is dedicated to the critical and scholarly inquiry of historical and contemporary religious phenomena, both from within particular religious traditions and across cultural boundaries, so as to inform the broader socio-historical analysis of religion and its related fields of study. The purpose of SHERM is to provide a scholarly medium for the social-scientific study of religion where specialists can publish advanced studies on religious trends, theologies, rituals, philosophies, socio-political influences, or experimental and applied ministry research in the hopes of generating enthusiasm for the vocational and academic study of religion while fostering collegiality among religious specialists. Its mission is to provide academics, professionals, and nonspecialists with critical reflections and evidence-based insights into the socio-historical study of religion and, where appropriate, its implications for ministry and expressions of religiosity.

"In the face of the most perilous challenges of our time--climate change, terrorism, poverty, and trafficking of drugs, guns, and people--the nations of the world seem paralyzed. The problems are too big for governments to deal with. Benjamin Barber contends that cities, and the mayors who run them, can do and are doing a better job than nations. He cites the unique qualities cities worldwide share: pragmatism, civic trust, participation, indifference to borders and sovereignty, and a democratic penchant for networking, creativity, innovation, and cooperation. He demonstrates how city mayors, singly and jointly, are responding to transnational problems more effectively than nation-states mired in ideological infighting and sovereign rivalries. The book features profiles of a dozen mayors around the world, making a persuasive case that the city is democracy's best hope in a globalizing world, and that great mayors are already proving that this is so"--

Across the country and around the world, people avidly engage in the cultural practice of hunting. Children are taken on rite-of-passage hunting trips, where relationships are cemented and legacies are passed on from one generation to another. Meals are prepared from hunted game, often consisting of regionally specific dishes that reflect a community's heritage and character. Deer antlers and bear skins are hung on living room walls, decorations and relics of a hunter's most impressive kills. Only 5 percent of Americans are hunters, but that group has a substantial presence in the cultural consciousness. Hunting has spurred controversy in recent years, inciting protest from animal rights activists and lobbying from anti-cruelty demonstrators who denounce the custom. But hunters have responded to such criticisms and the resulting legislative censures with a significant

argument in their defense -- the claim that their practices are inextricably connected to a cultural tradition. Further, they counter that they, as representatives of the rural lifestyle, pioneer heritage, and traditional American values, are the ones being victimized. Simon J. Bronner investigates this debate in *Killing Tradition: Inside Hunting and Animal Rights Controversies*. Through extensive research and fieldwork, Bronner takes on the many questions raised by this problematic subject: Does hunting promote violence toward humans as well as animals? Is it an outdated activity, unnecessary in modern times? Is the heritage of hunting worth preserving? *Killing Tradition* looks at three case studies that are at the heart of today's hunting debate. Bronner first examines the allegedly barbaric rituals that take place at deer camps every late November in rural America. He then analyzes the annual Labor Day pigeon shoot of Hegins, Pennsylvania, which brings animal rights protests to a fever pitch. Noting that these aren't simply American concerns (and that the animal rights movement in America is linked to British animal welfare protests), Bronner examines the rancor

surrounding the passage of Great Britain's Hunting Act of 2004 -- the most comprehensive and divisive anti-hunting legislation ever enacted. The practice of hunting is sure to remain controversial, as it continues to be touted and defended by its supporters and condemned and opposed by its detractors. With *Killing Tradition*, Bronner reflects on the social, psychological, and anthropological issues of the debate, reevaluating notions of violence, cruelty, abuse, and tradition as they have been constructed and contested in the twenty-first century.

Hunting - Philosophy for Everyone Prepper Press

Hunting - Philosophy for Everyone presents a collection of readings from academics and non-academics alike that move beyond the ethical justification of hunting to investigate less traditional topics and offer fresh perspectives on why we hunt. The only recent book to explicitly examine the philosophical issues surrounding hunting *Shatters* many of the stereotypes about hunting, forcing us to rethink the topic. Features contributions from a wide range of academic and non-academic sources, including both hunters and non-hunters
