Visual Acuity - Visual Acuity Charts Logmar Visual Acuity ChartsA LogMAR chart or Bailey-Lovie chart or ETDRS chart comprises rows of letters and is used by ophthalmologists, optometrists and vision scientists to estimate visual acuity. This chart was developed at the National Vision Research Institute of Australia in 1976, and is designed to enable a more accurate estimate of acuity than do other charts. For this reason, the LogMAR chart is recommended, particularly in a research setting. When using the LogMAR chart, visual acuity is scored with reference tLogMAR chart - WikipediaVisual Acuity Score (VAS) is an inversion of the logMAR scale, based on $VAS=100-50 \times \log MAR$. It is more intuitive since higher values indicate better visual acuity. In the scores review, score 100 in blue indicates the reference standard, scores above 100 in green indicates no myopia, while scores below 100 in red may indicate myopia. Visual Acuity - Visual Acuity ChartsA LogMAR chart or Bailey-Lovie chart or ETDRS chart (Early Treatment Diabetic Retinopathy Study) comprises rows of letters and is used by ophthalmologists, optometrists and vision scientists to estimate visual acuity. This chart was developed at the National Vision Research Institute of Australia in 1976, and is designed to enable a more accurate estimate of acuity than do other charts (e.g ...WikiZero - LogMAR chartSnellen and LogMAR acuity testing. The Snellen Chart (fig 1), which traditionally has been used to measure visual acuity is easily recognised as one of the hallmarks of the ophthalmologists consulting room. This has been in use sine 1862 and more recently a newer LogMAR (fig 2) chart has been introduced into clinical practice. Snellen and LogMAR acuity testing - The Royal College of ...Visual Acuity Score (VAS) is an inversion of the logMAR scale, based on $VAS=100-50 \times \log MAR$.
